Dear Sir—

For many years my wife has had serious Organic, and of course, Functional Disease of the Heart, and frequently has 'seizures' of the most terrible description, menacing her with instant death. I have tried many prominent Heart Remedies without avail, but in Dr. Campbell's 'Heart Regulator' I am free to confess, we have found the 'Supreme Palliative,' "if not the 'Radical Cure." Your preparation, Doctor, alreays relieves her instantly and perfectly, while the 'seizures' are much less frequent and sayere. I have also prescribed your remedy in my practice, I can and do, most conscientiously commend its nee to all suffering from Organic or Functional Cardiac Derangements. a fragment of mould was cast by the sex-ton on the coffin-lid. The service was seen concluded, and the coffin was car-ried into the vault and placed in a wooden shell. It will so remain until preparations are completed for the interment in the family vanit of the late Judge Sherwood. ganic or Functional Comments.

The scarcity of potatoes has made farmers alive to the necessity of having a substitute for this tuber, hence bears are going to be more generally grown than in former years. The French and German scientists have long demonstrated that potatoes were but a poor staff to rely upon, containing 75 per cent, of water, leaving but 25 per cent. of mitriment. The common white bean contains over 35 per cent. of mitriment. The common white bean contains over 35 per cent. of the elements required to support the human system. As an article of food, a very great advantage will be seen in favor of this cercal. In the western counties of the Province, thorough Essex and Kent and several parts of the U. S., also in France and Germany, beans are grown as a staple crop, the same as wheat, and handsome profits are realized.

The Board of Trade Hall was the

some of great excitement during to-day owing to the collapse or recent speculative movements in grain and provisions. The market opened heavy, and by ten o'clock everybody was selling. Before II there was a panic, and wheat was down four cents before closing prices on Saturday. Corn sympathetically fell 32 cents, oats 2 and barley Iţcent: The shrinkage in value of grain in store there in an hour was over a quarter of a million dollars. The scene on the Board as wheat and corn fell wiff cent by cent recalled the time of the bursting of Lyon's cornex two years ago. Provisions fell also, so that at the closing of the market there was a total of shrinkage in value of nearly half a million, and it is feared that bottom is not reached, and that all grain will fall to morrow until it has reached a point where it will be possible to ship it. There are over 200 lame docks, but no failares are yet reported. I have not been able to hear of a single Canadian firm that has suffered severest ly, although seyeral have been slightly seorched.
