#### "Hold Fast!"

That is the advice which the fishermen of the North, who have been delayed from getting along by adverse winds and unfavorable weather, send to those already in St. John's. This does not look as though there were any backing down on the part of the men who organized the United Fishermen's movement. Rather, if we are to judge from messages exchanged, they are more determined than ever to of the resolutions already endorsed. These are not the quality of men to be treated with conthese men, the Advocate but which to base its assaults on as not so many at that, the organ gentlemen, and the best words not sufficient to eulogise them. But a change has come over the spirit of the "suum cuique" but the suum has been eliminat- ready when needed. ed. The reason is not far to seek. So long as the men of the North obeyed all the commands of the dictator, and were submissive to his wishes, they were great fellows. The fishermen are no more to be turned from St. Andrew's their purpose than are the steady currents of the Gulf Stream. They have united in a common cause—the greatest common cause of all, viz., the right to live. They are tolerant they will not stand for the quality of abuse thrown at them by who at that time led, or prefessed to lead, them was a modern Moses or Joshua, a deliverer, combined. Our evening contemporary is peeved because the fishermen of the hour have not danced to its piping, hence friends, and to take advantage of an the men who have broken away opportunity to witness the Poultry from the trammels of other days are not to be considered by the faithful as deserving of the past 5 years with the Hudson's either support or sympathy.
