

# KIA-ORA ORANGE SQUASH

A most delightful beverage at lunch or dinner is "KIA-ORA" Orange Squash made from fresh orange juice and sugar, rich in flavour of sweet oranges but not too sweet. Everybody likes oranges—everyone will like "KIA-ORA" Orange Squash. It is simplicity itself to serve. Simply add water for still Orangeade, soda water for Orange Squash, and for quick service empty the whole or portion of a bottle into a large jug or bowl and add water. Decorate it with slices of orange and lemon and in other ways.

A large bottle will make sufficient Orangeade or Orange Squash for 24 to 30 glasses. Perhaps Orange Squash is most popular with younger people. Not only is it agreeable to drink, but it is wholesome and beneficial and can be used with advantage as a beverage at lunch and dinner.

Sold by all good stores

Sole Makers—KIA-ORA Limited, Blackfriars, London, England

## A Thrilling Story at the Majestic

THEY TORE HER REPUTATION TO SHREDS—BUT WHAT OF IT? SEE "THIS WOMAN."

By Howard Rokey, the author who knows our shameless upper layers of society inside out.

You'll laugh; you'll cry; you'll run the gamut of every emotion.

If you had a good singing voice, would you incorporate it? See "This Woman."

They incorporated her—a cold-blooded business proposition carefully concealing the underlying lava of love.

Those who admired Howard Rokey's popular novel, "This Woman," will be more than pleased with the screen version which is the feature at the Majestic Theatre to-night.

It is one of those rare pictures which prevents one from making up his mind as to whether the cast, the director, or the story deserves the most credit. Irene Rich as Carol Drayton does even better work than she did in "Brass." It is an acknowledged fact now that she has exceptional ability and can be classed with the best.

There are very few actresses to-day who can go through an emotional scene with the same sincerity that makes Irene Rich an outstanding character on the screen.

Louise Fazenda, who not so long ago discarded her pigtail shows her versatility in a sympathetic role that gleams with humor.

Others in the cast are Ricardo Cortez, Frank Elliott, Creighton Hale, Marc McDermott, Helen Dunbar Clara Bow, and Otto Hoffman.

The story is unusual, and the picture well directed—another victory for Phil Rosen.

with the object of adding to the sum of human knowledge is a foundation builder. He may never be able himself to use the knowledge he has gained but he will leave it behind him as material for other builders, and as surely as the world goes around will it be used to increase the sum of human liberty and happiness.

## Twelve Dollars

The United States Treasury is richer by twelve dollars derived from taxing a British flag brought by a delegation of British visitors for presentation to a United States city.

Nor are the customs officers who exacted the twelve dollars to be blamed overly much. They merely followed very much. They merely followed Government when dealing with Britain in connection with the war debt. Cash down, or a satisfactory endorsed note, was demanded in respect to the war debt. Cash on the nail had to be paid to the United States treasury before the presentation flag was admitted.

Last year United States advertising men carried to England three flags, that of the United States, of the State of New York and of the City of New York. Those flags were admitted gladly and received a warm welcome at the City of York at the hands of the Duke of York and many prominent people and a press of citizens. They hang in the town hall at York.

This year the advertising men meet at Houston, and Britfishers thought to return the courtesy, of their United States fellows by presenting a British flag to the City of Houston. An explanation to the customs officials was met with a demand for twelve dollars.

United States advertising men and a deputation from Houston in New York to meet their overseas guests protested against the discourtesy, but the customs would have its twelve dollars, or the flag would not hang on the walls of Houston town hall.

## Didn't Know He Was Ugly

Sir Richard Temple, the celebrated Indian administrator, was, by a long way the ugliest man in the British House of Commons, says Sir Arthur Griffith-Boscawen in his interesting book of reminiscences.

"It was a matter on which no division of opinion was at all possible, and was probably the one thing about which both sides of the House were in complete agreement; but in spite of this undeniable fact about his physical attributes, he thought himself a perfect Apollo.

"I don't know why they call my wife and myself the beauty and the beast," he once complained; "she is not so bad looking after all."

## Canadian Prayers in English Book

ANGELIC LADY MOVE TO HAVE SOME FORMS INCLUDED.

LONDON, June 22.—(C.P.)—The House of Laity of the Church of Eng-

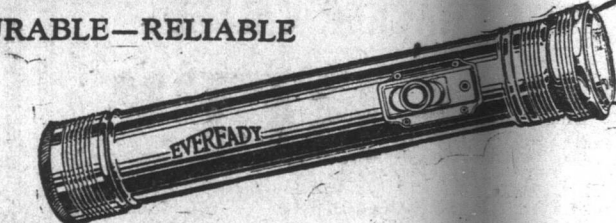

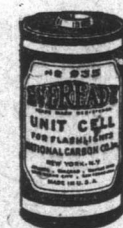

land, comprising the lay branches of the Church Assembly which, subject to the final approval of Parliament, legislates for the Anglican Church, recommends that the proposed new prayer book of the Anglican Church include forms of prayer to be used in families as appearing in the Canadian revised prayer book. It also recommends that the family prayers be both patriarchal and apostolic.

On the motion of Sir Edward Clarke the House disapproved of any passages of Apocryphal books being used as liturgical epistles. By a vote of 80 to 40 the House registered the undeniability of the Thursday after Trinity Sunday being used for the commemoration of the Holy Sacrament of the Body and Blood of Christ. Lord Hugh Cecil, the mover of the motion, said that to adopt the House

of Clergy's proposal to appoint Corpus Christi would vex Evangelists very much by creating the false impression that it carried with it belief in transubstantiation. Another speaker said that the day had been observed by 3,000 Anglican churches for over a century.

A little chopped mint, nutmeg or vanilla gives iced tea an interesting flavor.

Step without Fear — Use your Flashlight  
**EVEREADY** Flashlights  
SAFE—DURABLE—RELIABLE

EVEREADY Flashlights give a bright, white light, instantly available at the snap of a switch. Wind or rain cannot dim them. The most reliable emergency light for the home, outdoors and in the auto.

## Earl Haig Urges Women's Branch

OTTAWA, July 2.—(C.P.)—The suggestion that a women's division be formed in conjunction with the Empire Service League was made by the Hon. Field Marshal the Earl Haig, when he spoke to the Ottawa Women's Canadian Club at luncheon in the Chateau Laurier. The Earl and Countess Haig spoke briefly to an audience of 200, one of the largest gatherings of club members held in some years.

"While England owes a deep debt of gratitude to the boys who fought for her, it is to the mothers of the Empire that she owes the greatest debt. It is to them that the greatest tribute should be paid." These were the words of Earl Haig, who gave the highest praise to the splendid spirit of the Canadian Corps.

The desire to form one organization for the best purposes of all parts of the Empire, was evident in Canada and the need of such organizations as the Canadian Club was very great. "My heart is so full, just from the recognition you have given my husband and myself," Lady Haig said.

"Now I turn to the work done by the women during the war." Lady Haig continued. "I feel sure it is such as was done in England. But why did they do it? Just for the men who fought for us. What a pleasure it is to feel that we can do a little in that direction. The Women's Canadian Club represents, I know have worked very hard and are still continuing to do so."

"I have had a good deal of experience myself of various work and know to gain real success, they can only accomplish it by working energetically in co-operation with the men. Amongst the women as well as the men, is the only chance of helping one another to do it. And what an example our men give us."

## History Repeated

London Times: This is not the first time in our history, as Lord Emmott recently reminded the House of Commons, that the immediate outlook has been anxious, gloomy and menacing. A century ago, after the Napoleonic wars, it was infinitely worse. What he rightly called the enormous improvement in the position of working classes which has taken place since that period there is, as he said, a good deal of consolation to be found. The inhuman conditions of those days no longer exist. In the middle of the century there was then, there is now, a period of acute depression, which lasted for nearly a generation. From that depression it is the business of the nation to find a way, as it did then, a way of escape. Men and all parties are concerned with the quest. It may be, said Lord Emmott, that Labor will never be satisfied until its quack remedy has been tried and proved a failure. If so, it is what the future holds in store. His prayer is that the country may not be ruined by the experiment.

## Uncommon Sense

(By John Blake.)  
FOUNDATION BUILDERS.

Before the tall building or Cathedral begins to rear its walls in the air so that men can see and begin to marvel at its future magnificence and beauty men must delve in the earth to lay its foundation.

This is not pleasant work. There is for them none of the joy that the builders of the superstructure get as they see the walls or towers taking shape.

Heavy stone must be piled on heavy stone, plastered with mortar and made ready to bear more heavy stones.

The job is about as interesting as must be that of the coral insects who climb upon a pile of other coral insects and die and fossilize there, until at last an island can thrust itself above the ocean.

Yet foundation building has been going on since the beginning of civilization and still continues.

We who live to-day can see something of the work that we do; we can see edifices rise in the air with their cornices and towers, and some of us who are fortunate can help to shape those cornices and towers.

But the first man who piled stone upon stone to build a habitation that would keep the wild animals away was one of the foundation builders of the modern business building or church or palace.

He could neither see nor dream of the work that was to be erected upon what he was building.

Nor did he in truth care much about what was to follow beyond the discomfort of the wolves when they found

that they could not get at him.

But to-day, with many of the buildings that were founded in the past standing before us, we are still slowly building foundations for the future, and we are fortunate that we can dream of that future and to some extent realize it before it is built.

I was recently asked what possible service to the world could be done by the expedition of Prof. Beebe to the Sargasso Sea. To seize strange creatures from the deep and classify them seemed to my questioner of no possible use to the world.

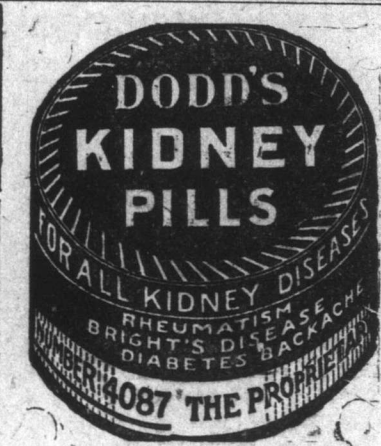

I told them that such expeditions of such men had reared the whole fabric of science, and it is on science (which means exact knowledge) that the whole fabric of industry is reared.

Prof. Beebe is a foundation builder, and a very useful one.

On the discoveries he has made and is making other men will build, and slowly all that we are permitted to know about this universe will be known.

That will mean the end of disease, the prolonging of life, the promotion of happiness and the dissemination of beauty.

It will mean the end of war and of quarrelling. It will bring the world as close to heaven as it was ever intended to be by the Creator; perhaps it will establish heaven itself on this earth.

that they could not get at him.
