METEOROLOGICAL SERVICE OF CANADA

Fair to Cloudy and Warm, With

Showers-Cooler To-morrow. Toronto, April 30, 8 p.m.-A depre considerable importance has developed by over the Western States with greater of considerable importance has developed to-day over the Western States with great rapidity, and it will now probably move into the lake region. The weather here has been very warm from the lower lakes to the Atlantic, attended by a few scattered thunderstorms, and cool from Lake Superior to the British Columbia coast. Snow is falling to-night over Alberta. Minimum and maximum temperatures:—Victoria, 34—52; Calgary, 22—24; Qu'Appelle, 32—60; Winnipeg, 28—56; Port Arthur, 32—48; Parry Sound, 54—80; Toronto, 50—79; Ottawa, 54—84; Montreal, 58—82; Quebec, 46—80; Halifax, 38—76.

Probabilities:—Lower lakes and Georgian Bay—Winds increasing to strong breezes or moderate gales; easterly to southerly and south-westerly; fair to cloudy and warm; showers and thurderstorms, more generally at night, turning cooler on Tuesday. Local temperature.-The highest and

Local temperature.—The highest and observatory on Saturday, April 29, 1899, were:—Highest, 82 above; lowest, 51 above. Local temperature.—The highest and lowest readings of the thermometer at the Observatory on Sunday, April 30, 1899, were:—Highest, 82 above; lowest, 60 above. HIS FORECAST FOR MAY.

REV. I. R. HICKS, OF ST. LOUIS, GIVES Rev. I. R. Hicks, of St. Louis, gives out the following weather prophecy for May:—"A regular vulcan storm period is central on the first moon being at perigree and at her declination south. If moon were north of the equator at this time an unseasonably warm wave might be exwere north of the equator at this time an unseasonably warm wave might be expected; as it is, a marked low barometer with rising temperature, ending in storms of wind, thunder and rain, may naturally or more of the four first days of May. Ordinarily, these disturbances would reach a crisis about the 2nd and 3rd, but moon being on the equator on the 4th, high temperature and thunder and rain will hardly reach their culmination before that date. Change to much cooler weather will follow these disturbances and last for two or reaction to very much warmer, with falling barometer and more storms of rain, hall and thunder in many localities. Moon being in conjunction with the sun on the three days. From the 7th to 9th look for freaction to very much warmer, with falling barometer and more storms of rain, hall and thunder in many localities. Moon being in conjunction with the sun on the three warms are not color to the scene of the accident, and had the injured woman removed to the form the rest. The Mr. James O'Neil, the C. P. R. ticket agent and despatcher, on Friday evening at the Grand Pacific Hotel. Mr. O'Neil leaves to-day for three weeks.

\*\*Some time ago the telephone line to Pelee Is:and was broken and all intercourse with the island stopped. The Government has sent a force of men to repair the cable, as a result of a strong petition from the rest. The Mental three days. From the 7th to 9th look for the falling barometer and more storms of rain, hall and thunder in many localities. Moon being in conjunction with the sun on the Mr. O'Neil leaves to-day for the course with the island stopped. The animal got beyond control and to Pelee Is:and was broken and all intercourse with the island stopped. The Government has sent a force of men to repair the cable, as a result of a strong petition from the rest. The Mental three days. The matter of the island and people on the mainland.

\*\*J. Chalmers, the English market. The Mental three days is the most problem. The carriage with the cable as a result of the carriage. hail and thunder in many localities. Moon being in conjunction with the sun on the 5th, we name that date as the most probable for foreible electrical and atmospheric perturbations. The change to high pressure, with cooler weather, will follow promptly behind these storms. One or two nights of probable frost will result in latitudes northward, about the 9th and 10th, but marked change to warmer will quickly return. The vulcan brace in the storm diagram shows that a regular storm period is central on the 12th, covering the 11th to 15th. This period will develop a very high temperature for the season over most of the country. The barometer will be depressed generally, and some wideraching storms will appear on and touch-
