

B. PRESENT SITUATION

1. With the limited accommodation at present available, required work is now being conducted for students of the first two years, but the requirements of Corporation call for work for the first three years. Lack of accommodation is the only reason why it is not at present being applied for students of the third year. In addition, the Department has been exceedingly liberal in the matter of giving credits for the elective phase of the work, from which, in many instances, students are not deriving as much benefit as they should if the program were being conducted in a more efficient manner.
2. Seven different buildings are being used at the present time for indoor practical activities. For the various practical activities in the School of Physical Education, B.V.C. and the men undergraduates 133 hours per week are at present being used.

Molson Hall	70 hours
Royal Victoria College	37 "
5 other buildings	26 "
Total	<u>133</u> "

In addition to the above the B.V.C. and Molson Hall are used for medical consultations for the women and men students respectively.

3. The School of Physical Education has, this session, a record enrollment of 23 full time students in the first year and 5 full time students in the second year, there being more than twice as many first year students as any previous session. The demand for graduates is greater than the school can supply. It is the only school of its kind in Canada, and is almost certain to maintain its present standing or even continue to grow. As the length of the school course is extended there must be a still further interlocking of the schedule with the academic work of the first and second years, in such subjects as English, Physics, Chemistry, Psychology etc. If a separate Department or Faculty of Education is established in the future, to take care of such departments and phases of education as the School of Social Service, School for Graduate Nurses, Department of Religious Education and Education proper, it seems that the logical place for the School of Physical Education should be in this newly formed Department or Faculty, provided that sufficient opportunity is given for the special subjects and practical work that must necessarily be on the Time Table. In such a school there must be a judicious alternating of practical and theoretical work which can only occur if the building in which the practical work is to be conducted is in close proximity to the academic buildings.
4. The present program is only made possible by the fact that a one hour period in the academic schedule can be used for practical work. A student at the present time can leave any of the buildings on the lower campus, take his period in the gymnasium, and return for a lecture at a succeeding hour.

C. ACCOMMODATION & LOCATION

1. It is felt that all the indoor practical activities in the Department could be carried on in a new building, with an estimated capacity of 1,000,000 cubic feet is erected somewhere on the lower campus. This program could not be carried on if the building is erected adjoining the Stadium on Macdonald Park unless an auxiliary gymnasium is erected on the lower campus. It would be impossible to conduct a gymnasium class period in one hour as could be done if the building were situated in the neighbourhood of the academic buildings. It is felt that great difficulty would be experienced in securing two hours from the academic time tables during which a gymnasium period could be held. Eminent more satisfactory arrangements could be made with the Faculties concerning time tables so that the hour devoted to this work could be used to far greater advantage in striving toward the objectives outlined under "A". Even with the building conveniently situated, the question of arranging a time table for practical physical activities which will fit in with the academic time tables of the 8 Departments or Faculties is an extremely complex one. It is highly desirable that all the required class work should be conducted between the hours of 9 A.M. and 4 P.M. so that the hours from 4 - 7 P.M.

might be set aside for voluntary exercise and competitive athletics, thus leaving the evening free for study
