

CANTON MONITOR ENGINE TESTIMONIALS.

BRUSH CREEK, PA., November 21, 1883.

C. Aultman & Co.

Dear Sirs—We bought one of your 12-Horse Plain Canton Monitor Engines of your agent, John Snyder, Brush Creek, Pa., last January, '83, to run a saw-mill. We are glad to say that the engine gives us plenty of power, and does all you recommend it to do. Our timber is all hard oak, which we can saw from three to six thousand feet per day; just depends on the kind of logs and the number of hands we have. The engine gives plenty of power to run right through an oak log without stopping. We can say this rig is one of the best portable rigs now offered to the trade, and we would advise any one that wishes to invest in a portable mill to buy no other, as it is no trouble to move. We can load the whole mill on a common farm wagon in thirty minutes, and be ready to move. It don't take us a week to move this rig, but we can pull up in the morning and move five or six miles and set and be ready to saw the next day. We can afford to set for 100 or 800 logs, and make it pay. This is the kind of a rig to buy, which don't take all you make to move it.

CHARLES GUNNING & CO., Brush Creek, Pa.

GALLATIN, SUMNER CO., TENN., November 22, 1883.

Messrs. C. Aultman & Co.

Gents—We bought of your agent, W. H. Brown, Gallatin, Tenn., one of your 10-Horse-power Traction Engine in September, and are as well pleased with it as we possibly could be; would not give it for any make of engines; could not be better pleased.

Respectfully,

BABER & DOUGLASS.

BARNESVILLE, BELMONT COUNTY, O., November 14, 1883.

Messrs. C. Aultman & Co., Canton, O.

Gentlemen—We purchased the engine of Blowers, Smith & Bundy. We have been using your Canton Monitor Ten-Horse Engine the past season, and can freely say that it is ahead of any thing we have seen in the way of traction engine, especially on rough roads. We can go anywhere that you can take an ordinary two-horse wagon. Very truly, A. E. DUDNY.

F. W. BUNDY.

GREENWOOD, MICH., August 31, 1883.

C. Aultman & Co., Canton, O.

Gents—Ten years ago we bought a sweepstakes thresher of you which we have run every season since, and the machine is still running and doing first-class work.

Five years ago we bought another "sweepstakes," and it proves as good as our first purchase—both doing fast, clean work and pleasing every customer.

Five years ago we bought a No. 12 Canton Monitor Engine, and three years later a second Canton Monitor, and they have given us the best of satisfaction. They are quick set, easy to fire, and never lack steam or power. We have recently added to our stock of Monitor Engines a No. 16 Horse-power for saw-mill purposes, which also proves satisfactory. We would candidly say to every thresherman, if you want the best threshing outfit in this or any other country, buy a "rick" of C. A. AULTMAN & SONS.

ANDREW LOHR & SONS.

MAXVILLE, JEFFERSON CO., MO., November 6, 1883.

C. Aultman & Co.

Sirs—I purchased through your agent, W. J. Kirby, at Maxville, Mo., one of your 10-Horse Traction Monitor Engines to run one of your old No. 5, 33-inch cylinder, Sweepstakes, which I have been running for the last five seasons, and which does as much and as nice a work as any machine of its size and capacity to this day. Your Traction Monitor certainly beats anything in the steam power line. I have pulled over the steep hills of Jefferson county the water wagon and separator without any inconvenience. It uses less fuel, and can raise more steam in a short time than any steamer I know of. Threshing with it for the last two seasons, I have not been delayed a moment on account of steam, and no repairs yet, so far, except for a couple of water gauge glasses. I would not give it for any horizontal steamer I know of.

Yours respectfully,

LOUIS FREDERITZI.

EATON RAPIDS, MICH., June 4, 1883.

C. Aultman & Co.

Messrs.—I wish to say to you that the 10-Horse Traction Engine, No. 1583, that I purchased of you through your agents, Messrs. Brown & Myers, of Jackson, Mich., has given perfect satisfaction to me and all that have been in any way concerned with its work. I have handled several other engines and most emphatically say that I would not trade for any 10-horse plain engine in the world and \$500, for threshing purposes.

I only used one span of horses threshing. Also I have sawed 150,000 feet of oak timber with her and one of Messrs. Chaudier & Taylor's saws of Indianapolis, Ind.

Tell the boy the man that buys a plain engine to thresh with feels him, and the ones he works for. Everybody waits for the Traction Monitor team rather than to feel two extra teams and wait for the boys to fire up after they get the extra.

Yours respectfully,

H. E. HATHAWAY.

Messrs. C. Aultman & Co.

WITTS, O., November 10, 1883.

Sirs—The engine I got of you last spring has given entire satisfaction, and does more than what she was represented to me to do. I took the engine as soon as she was delivered at my house and went wherever I wanted to go with her, and I never had any experience in machinery. I could go up any hill with the Separator attached. This is all the engine of the kind in this section of county, and it raised quite an excitement in the neighborhood.

Yours truly, M. MERCKLE.

BELLE PLAINE, IOWA, October 2, 1883.

C. Aultman & Co., Canton, O.

Gentlemen—I have thoroughly tried my Monitor Engine and am pleased to report that it exactly fills the bill for a Threshing and Traction Engine. The engine is easily managed, and quickly set. In this it is far superior to all others. Any man with good common sense can run this engine without any trouble. The Independent Steam Pump is a splendid thing. Pulls water tank and Separator with ease.

Yours very truly, C. W. PAGE.

WASBURN, ILL., August 23, 1883.

Messrs. C. Aultman & Co., Canton, O.

Gentlemen—The Canton Monitor Engine which I bought last year of your agents, Stenger & Sharp, works to a charm. I have run this season without stopping at all. The boiler has never leaked a drop. Upright it runs as steady as a clock. The boiler has never leaked a drop.

Yours respectfully, B. F. FEAZEL.

NIMISILA, SUMMIT CO., OHIO, February 12, 1883.

C. Aultman & Co., Canton, Ohio.

Gentlemen—I have been using one of your 8-Horse Monitor Engines since 1879 in running a thresher and sawing lumber. Last week, in short days, I cut 2,800 feet of lumber in a day, running a 30-inch saw, 1/4 feed, and can run right through any log. I run with it also, a 34-inch saw. Last summer I cut regularly from 2,500 to 3,500 feet per day.

WILLIAM CAIL.

Messrs. C. Aultman & Co.

EASTON, MN., April 29.

Your agent, Mr. Matthews, was here to-day and asked me to write a few lines, stating how much I have done with my Canton Monitor Engine this last season: I threshed about 12,000 bushels wheat, hulled about 400 bushels clover seed, shelled about 20,000 bushels corn, and traveled about 400 miles with the Monitor Engine. Was running all winter, when the weather was fit to run, and never stopped on account of bad roads. Went through some bad places and up and down some big hills. I threshed in Island Creek Neck, Oxford Neck, Little Neck, Bamberg, Boiling Brook Neck, Bailey's Neck, Edmondson's Neck, near Hole in the Wall; in Bay Hundred, on the other side of St. Michael's, in Miles River Neck, in Goldsboro Neck, on the Squaw Farm, near Wooden Hawk Bridge, near Dover Bridge, and near Long Woods. All these above places are in Talbot County. Last March I was up to Queen Anne's County and threshed for Dr. Gross, Mrs. Rhoads, and others; when we were on our way home we stopped in Skipton to take dinner, and met a man who asked me if the Monitor Engine could pull as much as ten horses. I told him that if he would get ten good horses and hitch them behind the Monitor Engine, on good dry roads, I would take my horse away and let a man take the tongue, and if I could not pull his horses, would give him the Engine; but, if the Engine pulled the horses, I was to have them. Am not afraid to try it at any time when it will not interfere with my work. Any one who wishes my Engine on the above terms can have a trial for it, but I want all good horses to pull for it, Engine for horses.

Yours respectfully, N. C. RITTENHOUSE.

N. B.—Mr. Rittenhouse uses but one horse, in shafts, to guide his Monitor Engine.

C. Aultman & Co.

NINETEEN-SIX, S. C., April 12.

The 8-Horse Monitor Engine and Improved Thresher bought from you has proven to be as near perfect as human ingenuity can make it. I have run the Monitor this season without a moment's lost time for breakage, or being out of fix. Your Traction Pump never refused to work, not even for a minute, during the whole time I have run it. It uses less wood and water than most engines, and runs very easy.

J. N. KING.

MINONKE, ILL., September 3, 1883.

Messrs. C. Aultman & Co., Canton, O.

Gents—In response to your agents, Messrs. Stenger & Sharp, I herewith write a few lines in behalf of the Canton Monitor, as engineer, am running one of the Canton Monitor Traction Engines for Mr. Hock, and will say the Monitor has no superior. It uses less fuel and water than any engine I ever saw run and do the work it does. I ask no man to take my advice, but will say if he wants a good, durable, easily managed, and ever ready farm engine, buy no other but the Canton Monitor and you will never have cause to regret your purchase, as she is the farmer's friend.

Truly yours, JOSEPH E. HOLCOMB.
