M. J. Buston, Sec.-Treas. YORK COUNTY COUNCIL.

Testerday's session of the York County Council was a moderately busy one, and a lot of business of one kind and another was put thru. The members were in session until well on to 6 o'clock, intent on getting the order paper cleared off on Saturday.

W. H. Pugsley, who has occupied the position of auditor for a number of years and is thoroly familiar with every phase of the work, was respondented. The appointment is a good one, and was practically unanimous in its nature.

The propenty committee, to whom had been referred the matter of purchasing the Holland River-road, reported adversely to the project, and the deal will not go thru.

No action will, it is thought, be taken with respect to Mr. Pugsley's motion relative to the proposal to divide the county into high school districts. While there is much to commend it, the question will stand for the present.

It is a good thing for Toronto that the ratepayers use a little better judgment in these things than some of their advisers do. All of these small village ideas only mean one thing, that a little more of such foolishness will bring about great good, namely, government by a com-mission of business men on a broad businesslike basis. I cannot think for a moment that under a government by commission the ratepayers of To-ronto would have to walt so long for good, pure water, that the members of a commission would sit idly by and talk clap trap in an effort to divert the attention of the public to small matters in connection with a railway company, when the real great danger les in impure water, that they would be content to sit and talk on small matters when it is necessary to appoint a general manager for the hydro-elec-tric, who is brainy enough to successfully handle the proposition, when they have been told by their hired expert that they must not sit idle and talk and think the business will come to them. It is a very safe bet they would not. A strong effort should be made to get our system of municipal government on a higher plane, a com-

It is simply weakness—a break-down, as it were, of the vital lorces that sustain the system. No matter what may be its causes (for they are almost numberless), its symptoms are much the same; the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of energy for all the ordinary affairs of life.
