Price 50c a box, 6 for \$2.50, from your dealer or by mail, postage paid. C. B. Hacking, Phm. B., Listowel. 16u

LONDON TROOPERS IN FRANCE

This photograph, one of the official Canadian war records pictures, shows a group of Canadian Light Horse This photograph, one of the official Canadian war records pictures, shows a group of Canadian Light Horse troopers watering their horses behind the lines in France. Although the same picture appeared in the London Sketch with the information that the troopers were all from the Western Canadian plains, the third from the left is Trooper Fred Spicer of 253 Richmond street. Trooper Spicer went overseas with the 2nd Divisional Cavairy under Lieut. Col. Ibbotson Leonard. Before he enlisted he was employed at McCormick's. The sixth from the left is another London boy, Trooper L. M. Turnbull, of 712 Lorne avenue, a son of J. Turnbull of that address. Trooper Turnbull was a fireman on the Grand Trunk before enlisting. The service of the Canadian Light Horse in France and Flanders has made the

Missed the Car.

Nearly an hour had elapsed before the work of interviewing the men who went on the floor was completed, and in the meantime about forty of the dancers whose homes were in St. Thomas, began to wonder how they would get home. Manager George Holding endeavored to get into touch with the London and Port Stanley Railway offices, but failed to get word to them in time to hold the last car. which left at 11:20. How or when they reached their homes has not been discovered.

DENIES DANGER OF DISEASE SPREAD IN ISOLATION WARDS

Most Modern.

HAS ANSWER TO CHARGE

Says Patient Contracted Sec-

Says Patient Contracted Second Disease by Another's Carelessness.

Petrolea, Ont., Feb. 25.—There are many people in this district who have reason to be thankful to friends for the recommendation of Dr. Chase's Nerve Food, and Mrs., Thomas is one of them, as you will learn by reading her letter.

There are not many things more distressing than being unable to rest and silve at might and this is about the first entering with measies and contracting whooping cough, scarlet fever, chickenpox, diphtheria, or some other contaglous disease from association with other sufferers from these.

A specific case was given as illustration of a child being taken to Victoria Hospital suffering from measles and contracting chickenpox as well.

Concerning this charge, Capt. (Dr.) H. W. Hill, M. H. O., says; "In treatment of communicable diseases in Victoria Hospital, the modern plan is followed, whereby each patient has a separate room. By the old plan, the parate room. By the old plan, the parate room and the present of the substant was supposed to be diphtheria, Nerve Food, and a treatment of this morning. A friend of mine one day a davised me to try Dr. Chase's Nerve Food, and a treatment of this morning, and query's Park was supposed to be diphtheria, Nerve Food, and a treatment of this morning, and query's Park (all, about 1500 men, and the present call is expected to yield about 1500 men, and the present call is expected to yield about 1500 men, and the present call is expected to yield about 1500 men, and the present call is expected to yield about 1500 men, and the present of the six dound completely, and be in bed for a week at the first call about three or four o'clock in the morning. A friend of mine one day advised me to try Dr. Chase's parate room. By the old plan, the parate with the morning and the present call is expected to yield about 1500 men, and the expected the summons in this military district. Of those who answered the first call, about 1500 men, and the present call is expected to yield about 1500 men, a

ment of communicable diseases in Victoria Hospital, the modern plan is followed, whereby each patient has a separate room. By the old plan, the patients brought in suffering from say, what was supposed to be diphtheria, which was supposed to be diphtheria, were put in the diphtheria ward. Half the cases that are diagnosed as diphtheria as a matter of fact are not diphtheria as a matter of fact are not diphtheria ward was pretty sure to get diphtheria ward was pretty sure to get it even if he hadn't it when he went in The same applied to other communicable diseases. I object strongly to putting two patients in the same room, even two brought in from the same family, with every symptom of the same disease.

"Each case of contagious disease is now isolated in a room by itself. There is a fact of the morning. A friend of mine one day action of this month, and the organization at the armories, and at Queen's Park Camp, which handled smoothly 250 per the armories, and at Queen's Park Camp, which handled smoothly 250 per those who are coming in today with medicine proved to be just what I needed. It soothed my nerves, made me in every way. I continued using the last four days of this month, and the organization at the armories, and at Queen's Park Camp, which handled smoothly 250 per those who are coming in today action in recommending it to anyone suffering from nervousness or rundown system."

"I am acquainted with Mrs. Thomas, and believe her statement to be correct."—Thomas Kelly, Post master.
