FURNISHED CAMP TO LET, LONG Reach. Private bathing beach. Box Y 4, Times. 7697-7-24.

TWO WEEK-END DROWNINGS IN NOVA SCOTIA

Halifax, July 18.—The toll of deaths by drowning during the summer months was increased by two over the week-end. At Cole Harbour, William McEwen was seized with cramps while swimming in the harbor on Saturday afternoon and drowned before help could reach him. He was thirty-one years of age and unmarried.

Leo Giles, nineteen years of age, also of Cole Harbour, was drowned in Bisset's Lake today when a leaky boat sank under him. Both the bodies were recovered.

Amherst, July 18.—Aubrey Gould while canoeing with a companion at Blair's Lake was thrown into the water when a squall hit the craft. Gould sank immediately. His companion managed to reach shore. The body was recovered late tonight.

CANNERIES CLOSE FOR LACK OF TIN

Bad news spread all along the Passamaquoddy Bay district Saturday when it was announced that all the factories of the Seacoast Canning Co., the largest sardine packing concern in North America, had been shut down on account of the scarcity of tin plate and the

SHOPS YOU OUGHT TO KNOW

lack of transportation facilities. The plants closed on Saturday and it is not known when they will re-open. This gave employment to one thousand hands or more. It was further announced that other sardine factories in Eastport, Quebec, Robinson and elsewhere would close for the same reasons. The sardine plant of the Booth Fisheries, Ltd., in West St. John, has not been in operation this season. The general shut-down will curtail the pick of the year, as the season is so far advanced that the drop in production cannot be made up later and comes as bad news to the Passamaquoddy trading centres, the fishermen and Eastern steamship people who have handled heavy freight from Eastport and Lubec.

PLUMBING

R. M. SPEARS, PLUMBING AND Heating. Jobbing a specialty. Phone Main 1888-81. 6701-7-21.

USE The Want Ad Way

JOHN H. PACKER, well-known electrical engineer, of Liberty, Mo., who says that to look at him today no one would ever take him to be the same man he was before Tanlac restored his health. His gained forty-four pounds.

"For two years previous to the time I began taking Tanlac, I lived principally on a raw-egg diet. During this time I was laid up in the hospital for five months and practically no hope was held out for my recovery. I don't suppose any man had a worse case of stomach trouble than I did, in fact they said I could not live. "Tanlac did not seem to help me much at first, and I had almost made up my mind to give it up, but if I had given it up it would have been the mistake of my life. I stuck to it and for a fair test and am thankful that I did for after finishing my fourth bottle, my appetite was better and I noticed myself improving. "This encouraged me to keep on taking it and in two months I was able to eat a good square meal and digest it as good as anybody. Then it wasn't long until I got so I could go back to work and at the time I had finished my last bottle, I found I had actually gained forty-four pounds in weight. "To look at me today no one would ever take me to be the same man I was when I began taking Tanlac. "The above remarkable statement was made recently by John H. Packer, well-known electrical engineer of Liberty, Missouri. "Tanlac is sold in St. John by the Ross Drug Company and F. W. Munro; by G. W. McKay, Beaver Harbor; Wilfred J. Colwell, Bras; C. V. Parsons, Highland; John F. Mesinger, Debec; O. D. Hanson, Lepreau; E. L. Conley, Leonardville; N. H. Johnson, Clarendon Station; and by the leading druggists in every town. (Adv.)

BIG INVESTMENT

Shipbuilding Industry in Cumberland, N. S., Represents a Lot of Money.

A few days ago an American News representative had occasion to interview a well known shipbuilder in Pictou with a view to finding out the extent of the ship building industry in Cumberland, N. S. The information that he got on the subject was so much more than he had expected to get that he has to give our inland readers the gist of it.

Since the year 1914, there have been built in Cumberland county, along the harbor shore alone, over fifty vessels of sizes varying from 500 to 900 tons, but averaging about 400 tons. With the cost of each vessel, over fifty vessels of \$75,000, this one industry, which by many people was hardly considered worthy of more than mere mention, totals an investment of nearly four millions of dollars. For the benefit of the many who will be interested, we are publishing with this article, a list of the ships, their tonnage and their builders. It is a list which Cumberland county can exhibit with just pride, and one which can hardly be equalled by any community of like size in the land.

Regarding the future of the ship building industry, the prospect is perhaps not quite so promising as the past. In fact it is the consensus of opinion that the boom of the past is over. This is attributed to several causes among which, the high cost of building materials, and the fact that the demand for tonnage is rapidly going back to a pre-war basis, are the most direct reasons.

There is a fair volume of business being done in machine tools, although none of the dealers have anything in the line of large orders for equipment. Several firms hold to the belief that an easing off in the price of building will be a good thing for the sale of machinery, as an order for a large amount of equipment generally means new housing for it. Several fairly large expenditures in machine tools are being made on account of the too high price of the necessary building. There is a dull market in the scrap metal trade. Some dealers have had to come out and buy this week, but they have done it at a fraction under the quoted prices. As a general thing, the having material to sell are advised to hold, as there may be an improvement in the market.
