HE TAUGHT KING GEORGE V. TO PLAY GOLF

When Bobbie went to see his grandmother he was much interested in what she was doing in the kitchen. One day she said to him: "I'm going to make you a nice little pie in a saucer, all for yourself. Don't you think I'm pretty good to take so much trouble?" Bobbie pondered. "Grandma," he said at length, "mother told me not to be a bother, and if it's going to be any trouble, you can just as well make my pie regular size."

MILK IN MONTREAL GOES UP TWO CENTS

Montreal, Oct. 5.—Another gentle reminder of the high cost of living was given the weary householder yesterday when the price of milk took its annual jump of two cents a quart. Together with the worry of the coal bill and getting the double windows up, this action of the milkmen comes as an added burden at an inopportune time. The price during the months until May 1 next will be ten cents a quart.

EMPHASIZING QUALITY

Great stress is laid upon the quality of INVICTUS SHOES

Modelled upon natural-shape lasts—made of the best materials obtainable—up to the minute in Style—perfect in finish, these superior shoes more than hold their own in the good opinion of good Canadians.

It has been said that the people of the Northern American Continent are the smartest and neatest shod in the world. This is no less true of Canada than of our neighbors "across the line".

The modern tendency is to demand fine footwear as a requisite. Judging by their popularity, "Invictus Shoes" would seem to be synonymous with "Superior Shoes"—at least it is the endeavor of the Manufacturers to attain this end.

Invictus Shoes are the practical man's "Two foot rule."

THE BEST GOOD SHOE INVICTUS

This mark upon shoes is a guarantee of good faith.

MAY REVOLUTIONIZE BIG RIFLE FIRING

Discoveries By an Obscure Inventor In France

Paris, Oct. 6.—An obscure inventor named Sava Rogozza has just demonstrated discoveries which promise to revolutionize rifle-firing. His invention consists of a special cartridge and double infammable bullet, primarily designed for the destruction of airships.

In his experiments Rogozza used an old gun built in 1880. Although the cartridge was filled with black powder, spectators were astonished to see neither smoke, flash nor recoil as he fired, the strange long bullet travelling fleet and straight to the butt instead of executing a series of irregular bounds, as it should have done according to accepted ballistic laws.

The bullet carried 1,200 metres, but it is calculated that with a modern rifle it would have carried 3,000 metres. Rogozza also says he has invented a cannon costing only about \$60, easily carried by two men, which can throw a shell 7,000 metres.

Another invention which he has brought forward is a shrapnel shell which scatters its contents along the level of the ground, mowing all in its path, instead of dropping from above.

A POSTAL FROM JAPAN

A postal card from Japan, received by the Times, has the following: Question.—Mr. Carnegie! His millions! His Hague palace! His fine address What can they do? Answer.—They can make an Edat in the world.

Question.—What is it that they cannot do? Answer.—They cannot bamboozle God.

Question.—Why cannot Mr. Carnegie his millions, his Hague palace and his fine address bamboozle God? Answer.—Because the blood of the Armenians is crying up to God from the soil of Armenia; and neither gold nor marble nor fine words can stifle the voice of that blood. God asked Cain: Where is Abel? God is now asking "The Powers": Where are the Armenians? Mr. Carnegie cannot prevent God from asking the question.

Question.—"The Peace of Europe" How must it be analysed and defined? Answer.—The jealousies, the rivalries, the intrigues, and the criminal policies of "The Powers." These have been cooking in the Devil's cauldron in Constantinople in the blood of the Christians of the East (nige-tenths Armenian blood); long years of cooking in innocent blood have solidified the ingredients into the lump which is now called "The Peace of Europe." It is bitter as Dead Sea fruit. Mr. Carnegie cannot change it into a honeycomb.

Question.—Why cannot Mr. Carnegie, his millions, his Hague palace and his fine address change Dead Sea fruit into a honeycomb? Answer.—Because God has been keeping watch over the cooking of the Dead Sea fruit; and God is greater than Mr. Carnegie—greater than "The Powers."
