Plague Situation Bad

Amoy, June 12.—(Canadian Press)—The Dutch consul here has advised his government that the plague situation in this vicinity is such as to warrant the quarantine of the Dutch East Indies against Amoy.

Consular Regan left this morning for a vacation in Nova Scotia.

FIVE DEAD; FIVE MISSING; MILLION LOSS IN STORM

New York Hard Hit But Water Supply is Helped—Panic on a Ferris Wheel

(Canadian Press)

New York, June 12.—Five dead, five missing and a property loss of nearly \$1,000,000 is the result of a two-day storm which has raged intermittently in New York.

The storm may continue today, but the rain has been boon to the dried water famine, ten days supply having been accumulated in the Croton watershed since.

The lightning at Clason Point on the Sound struck a revolving Ferris wheel which carried several passengers, 215 was thrown from its axis and stuck fast. The lightning blinded the passengers and there was a panic. Several women attempted to leap from the wheel, but were restrained. The passengers were taken down on ladders rigged together.

Several mills in Patterson, N. J., were uprooted. Streets were flooded in several New Jersey towns. Trees uprooted and cellars filled with water.

The primary department of the Victoria stables doing something which will give a concert in the vestry of the church Thursday evening.

We want to thank the large number of our gentlemen customers at the Main street store who so kindly volunteered their time for service to some whose duties made it difficult for them to wait too long for service, and we apologise also who were inconvenienced in any way because of delay in service or inability to serve; we had not anticipated such a rush.

At your dealer's or from Father Morrice, Medicine Co., Ltd., Montreal, Que. 83

Rev. Miss Howard of Fredericton arrives at the city this morning.

Miss Vera Palmer, who is visiting her aunt, Mrs. Arthur W. Sallis, at Renfrew, will leave for her home in Kamloops, B. C. tonight.

Miss Alice and Margaret Kerr have returned after a visit to friends in St. Martins.

Police Magistrate Marsh of Fredericton is in the city on Saturday.

Mrs. E. Parker Baker, of Alexandria street, will receive her friends at her home on Wednesday afternoon next.

Walter G. Goding arrived in Vancouver on Friday night.

The St. John friends of Clayton L. Beckett, will be pleased to learn that he is among the graduates of South Portland High School this year.

Mr. R. E. Wiggins left for Toronto on Saturday to attend a meeting of the High Court of the Canadian Order of Foresters.

The largest electrically operated valve ever made was completed recently at Ingham (Beckett) street, and is for the service at the hydroelectric station of a large power plant at Niagara Falls. This valve is one of three in this plant, each to control the water supply of a 12,000-horse power turbine. They weigh 65 tons each, are 30 feet high and 11 feet wide. The gate is generally constructed of cast iron, but the valve is of steel, having a capacity to withstand a pressure of 90 pounds to the square inch. The operation of these valves will be by means of a 15-horse power electric motor. The opening to permit the passage of a touring car.

SUFFERED THREE YEARS

THIRTY Dr. Morse's Indian Root Pills cured his Kidney Trouble

There are few diseases that cause more acute suffering than Kidney Trouble, and Mr. F. A. Thomas of St. Mary's, is one of those who have suffered.

"For over three years I suffered from kidney disease. First, I thought I had sprained my back, for I had aching pain in my back, and it was so bad that I would catch the smallest fly and it would be in my back for me to straighten myself up for three or four minutes. I had aches across my kidneys, and my back was so stiff that I could not get up.

Before one year I was so weak that I could not walk, and I was so thin that I could not see my ribs. I tried many medicines, but they failed.

It was advised by a friend to try Dr. Morse's Indian Root Pills, as they had cured my wife years before. A few boxes affected a complete cure. I no longer enjoy the sting of good health, which is due to this remedy.

Don't neglect kidney trouble—it's too dangerous as well as too painful. That old, reliable family remedy, Dr. Morse's Indian Root Pills, has cured thousands, and will cure you. It is equally effective in curing constipation and its attendant evils, biliousness, indigestion and sick headaches, and in purifying the blood.

Get a box at your druggist's.

CANADIANS IN LONDON FOR CORONATION

Sir Wilfrid's Fine Impression at the Canadian Club Dinner

(Canadian Press)

London, June 12.—Canadian visitors who are now staying in London, awaiting the coronation season, are enjoying a rapid succession of delightful surprises, and not the least, the unexpected sunshine which every day for weeks has made the grey old city the most brilliant and jubilant of holiday resorts.

At the dinner at the Princess Restaurant, in Piccadilly, saw a proud and joyous scene for Canadians—for it was the annual dinner of the historic old Canada Club. As usual Lord Strathcona presided and took occasion to announce that his latest member is the Duke of Devonshire who is to follow Earl Grey as governor-general of the Dominion.

The guests of the evening were of course Sir Wilfrid Laurier who sat at the chairman's right while on Lord Strathcona's left sat the distinguished Right Hon. Lewis H. Murray. The speech of the evening was delivered by the silver-tongued premier in responding to the Canadian history. The guests that surprised the queen were the Duke of Devonshire who is to follow Earl Grey as governor-general of the Dominion.

The queen's crown which weighs some nineteen ounces, is less elaborate than the monarch's state crown, but its design and fineness and delicacy of the workmanship is more admirable. The famous crown is made of platinum, and is the inheritance of a thousand years of ancient legend and tradition. The gem that surmounts this proud crown is a diamond of some 3,000 carats and the individual brilliancy of each is estimated at 100,000,000,000.

It is remarked that a large proportion of our London coronation visitors are Canadians. It is therefore interesting to note that the most highly expressive of their delight at the appearance of London as a city and their surprise at the general condition of London as a people, which they lauded with the preconceived notion that Britons are cold and reserved and that colonial visitors have therefore received this misunderstanding of English character.

It may be true that the provincial reserve and exclusiveness at this season of national rejoicing and family reunion, have given way to the hospitable feelings of the coronation. The coronation may therefore be credited with the awakening of a fresh feeling of brotherhood between the British and the Canadian people.

It is interesting to note that the Canadian and colonial visitors have therefore every reason to look on London as home.

London barricades are at this moment besetting to strangers for whose accommodation they are being erected as seats to view the procession. But these visitors will be disappointed to see that many of the most interesting and picturesque spots are hidden from the sighter's view.

On coronation day millions of strangers will be seated, obscuring the beauties of London. There is nothing for it—Canadian visitors would really see London—to wait till the processions have passed and the pillars of white timber have been hauled away.

Things Worth Seeing

Pending the sights of the coronation procession Canadians are spending amid glorious sunshine the delights of the coronation exhibition at Shepherd's Bush, and of the festival of empire at the Crystal Palace. Its of the navy and army tournament at Olympia, Canada, as usual, is notably represented at the exhibition. For this occasion at Shepherd's Bush the impression sought to be created is not so much of Canada's capacity as an industrial and manufacturing country, but rather of its natural resources and grandeur.

Instead of wheat sheaves and reaping and mowing machinery there are tableaux which show to all the world topographical features of the Canadian coast, from Montreal and Quebec to Winnipeg and Vancouver.

In this respect there is the most interesting and instructive exhibition of Canada ever seen in England. The colonial visitors are especially gratified by the very comprehensive and educative tableaux which in realistic fashion bring to their eyes the actual sights of the beauty spots of the British Isles.

Before entering the magnificent grounds of the White City where each of the departments overseas is represented in the white palaces, a winding road through Merrie England gives the delighted but not wearied traveller the distinct impression of what he actually sees when he journeys to Windsor, Shakespeare's land and Devonport or Cardiff, the highlands of Bonny Scotland, Edinburgh and Glasgow, or to the Giant's Causeway or Killarney and the glorious scenery of the Green Lake.

The naval and military tournament has been no less a fascinating attraction daily till this close at Olympia today and Canadians have been receiving thrilling impressions of the might and power and skill of the navy and army of the old country. The performances of men and especially of the cavalry horses is a wonder even to the sensible folk of the new countries who think less of the chivalry.

CROP BULLETIN SHOWS CONDITIONS IN CANADA GOOD

(Canadian Press)

Ottawa, Ont., June 12.—A bulletin of the census and statistics office states that the season this year has been favorable for field crops in all parts of Canada, and excellent reports have been received from all the provinces. The lowest percentage of condition is made for fall wheat, which suffered from inadequate protection in the winter months, and also to some extent from spring frosts.

The areas of fall wheat are greater than last year by 13.70 per cent. The total area in wheat is 10,858,000 acres, as compared with 9,594,800 in 1910, and 7,750,000 in 1909. The per cent condition of fall wheat at the end of May was 86.82 and of spring wheat 96.00. The areas in oats is 10,279,800 acres and in May was 86.82 and of spring wheat 96.00. The areas in oats is 10,279,800 acres and in May was 86.82 and of spring wheat 96.00.

Barley and rye show a small decrease in area, but the condition is higher than at the same period last year. Slight decreases are also reported for areas in peas, mixed grains and hay and clover, with per cent conditions more than 90. Hay and clover have a reported condition of 100 per cent for the Dominion, being practically 100 in Manitoba, Saskatchewan and Alberta.

The area of the field crops named is 32,051,500 acres for 1911, compared with 30,544,200 acres for 1910, and 28,120,800 in 1909. In the provinces of Manitoba and Saskatchewan and Alberta, the area in wheat, oats and barley was 11,423,400 acres in 1910, 10,939,800 acres in 1909, and 13,809,200 acres in 1910, and it is 13,355,900 acres this year. The area in oats and barley was 11,423,400 acres in 1910, 10,939,800 acres in 1909, and 13,809,200 acres in 1910, and it is 13,355,900 acres this year.

The area of the field crops named is 32,051,500 acres for 1911, compared with 30,544,200 acres for 1910, and 28,120,800 in 1909. In the provinces of Manitoba and Saskatchewan and Alberta, the area in wheat, oats and barley was 11,423,400 acres in 1910, 10,939,800 acres in 1909, and 13,809,200 acres in 1910, and it is 13,355,900 acres this year.
