All Quebec and its visitors seemed to have turned out this morning to see the big military review. Of course the Plains of Abraham could not hold them all, but as many as the men who kept the parade ground clear would allow upon the field forced an entrance, while the others had to content themselves following the troops as far as they could reach along the Grand Allee and other streets leading towards the Plains. Several members of the royal party remarked today upon the happy condition of affairs, when descendants of those who at one time met in mortal combat upon its historical plains, could parade shoulder to shoulder in military costume on

Unfortunately for the royal party and the many thousands who had gathered around, rain began as the party approached the stand that had been erected for their accommedation. The gradual drizzle increased to a full fledged shower, which drenched those who remained under it without protection from the inclement weather. His Royal Highness and the officers who were out under the rain, were not to be deterred by the rain, and the review proceeded. These presentations elicited tremenlous enthusiasm. The applace was just as deafening when H. H. H. pre

Those entitled to the South African edal filed rapidly past His Royal Highness and each received his medal from the royal hand. a grand one Estimates of the number of people who saw the royal procession from Viger station to Lord Strathcona's residence vary. Some put it as high as half a million. This is probably a little exaggerated. There were certainly 300,000 people on the line of march. It was the biggest thing Montreal her ever seen and the authorisem. real has ever seen, and the enthusiasm vas quite as great as the crowds. people had completely encircled Place Viger station. And how important and beneficent is the part given to the royal family of England to act in the develpment of those distant and rising countries who recognize in the British rown and their allegiance to it their preme bond of union with the mothe country and with each other.'

shind which the people were massed. From start to finish there was concheering. The Duke and Duchess smiled and bowed as the populace vociferated its welcome. At Laval University an imposing sight met the eye. Standing on the broad steps of the approach to this stately pile were dignitaries of the Catholic church, and with them a hundred students from Montreal, Laval and other colleges. The buildings, decorated with flags, made a pleasing background to the human picture in ront. As the regal cavalcade came into view, the host in front of the college cheered enthusiastically.
