## THE GREATEST Medical Discovery, OF THE AGE.

Three for four bottles are warranted to cure
the most pepereic cose of rheumatism.
Five to eight bottles are warranted to cure
the worst case of scorfula.

A benefit is always experienced from the first bottle and a yerfect cure is warranted when the above quantity is taken.

Reader, I have peddled over a thousand bottles of this in the vicinity of Boston. I know the effect of it in everycase. So sure may are humor. I have never sold a bottle of it but that sold another; after a trial it always apeaks for itself. There are two things about this herb that appear to me sueprising; first that it grows in our pastures, in some places vuite plentiful, and yet its value has never been known until I discovered it in 184 vescond, that it should cure all kinds of humor. In order to give some idea of the sudden rises and great popularity of the discovery, I will state that in April, 1853, I peddled it, and sold abiut six bottles per day—in April, 1354, I sold over one thousand bottles per day of it. Some of the wholesale Druggists who have been in business twenty and thirty years, say that nothing in the annals of patent medicines was aver like it. There is a universal praise from all quarters.

In my own practice I always kept it strictly for humors—but since its introduction as a general family medicine, great and wonderful virtues have been found in it that I never sus pected.

Several cases of epileptic fits—a disease which was always considered incurable, have hear every day a few hottles. On what a very hear of the whole say of the hear of the whole was always considered incurable, have hear every day a few hottles. On what a very hear of the work has always considered incurable, have hear every day a few hottles. On what a very large of the work has always considered incurable, have hear every day a few hottles. On what a very large of the work has always considered incurable, have hear every day a few hottles. On what a very large of the work has a large of the work of the work of the work of the work of the work

Several cases of epileptic fits—a disease which was always considered incurable, have been cured by a few bottles. O, what a mercy if it will ; rove effectdal in all cases of that awful malady—there are but few who have seen more of it than I have.

I know of several cases of dropsy, all of them aged people cured by it. For the various diseases of the liver, Sick Headache, Dyspepsia, Asthma, Fever and Ague, Pain in the Side, Diseases os the Spine, and particularly in diseases of the Kidney's, &c. the discovery has done more good than any m dieine ever known.
