Agent Marine Department.

MARKET REPORTS

STOCKS, BONDS AND PRODUCE

HOW THE RATE OF EXCHANGE OPERATES

A Question of Supply and Demand for Money Regulated by Trade is What Causes the Fluctuations.

With the exchange rate between Canada and the United States operating against the currency of this country to the extent of five per cent., roughly speaking, the question is attracting the attention of many business men and others who under normal conditions would not be greatly concerned. The Financial Post, for the benefit of those who may be interested in the matter, gives the following reply:

"Exchange rates between countries are regulated by the law of supply and demand. One country pays another country for goods imported either by goods exported or in money. Thus as Canada is purchasing more goods in the United States than the United States is purchasing in Canada there is a balance which we must settle. Canadian importers, therefore, must make settlement by purchasing in the United States funds which Canadian exporters receive for their product. When there is a shortage of these funds the price rises and the value of Canadian money correspondingly declines. Canadian funds in the United States are offered daily in the open market and the fluctuations in the rate of exchange are the result of the bidding of those who have settlements to make.

"There would then be no way to alter the rate of exchange by government regulation except in so far as the government might rule on international finance. At one time, for instance, there was the ruling of the United States against the sale of Canadian securities in the American market. The only natural way to solve the problem is for Canada to sell more goods in the United States, buy less there, export gold or float loans in the American money market.

"The exchange question is a very complex one and it is difficult to give a brief explanation which will cover

TRADING NARROW AND RESTRICTED IN STOCKS

Strongest Features Were Speculative Issues Which Owed Their Prominence to Pools and Allied Professional Interest.

New York, August 23.—Trading in stocks today was narrow and restricted, dealings dwindling to the smallest total of any weekend session since the early part of the year.

What the market lacked in activity and breadth, however, was largely made up in strength, even though the strongest features were speculative issues, which owe their prominence to pools and allied professional interests. Motors and associated specialties scored extreme gains of two to thirteen points, oil, shippings and tobaccos rose one to five, and equipments, metals and several of the better known specialties finished at gains of one to three points.

Rails were listless most of the brief session, but came forward towards the end, some of the secondary western and outwestern shares gaining one to almost two points.

United States Industrial Alcohol was again the one weak feature, extending yesterday's severe decline by almost two points, but kindred issues kept pace with the market's upward trend.

Sales amounted to 325,000 shares. For the second time this year, the weekly bank statement reports a depletion of actual reserves, the deficit being slightly more than \$800,000. This exhibit is the more interesting because actual loans were contracted by almost \$35,000,000.

One of the factors contributing to the stock market's improvement was the further strength of sterling exchange, rates on Paris and Rome also rallying partially.

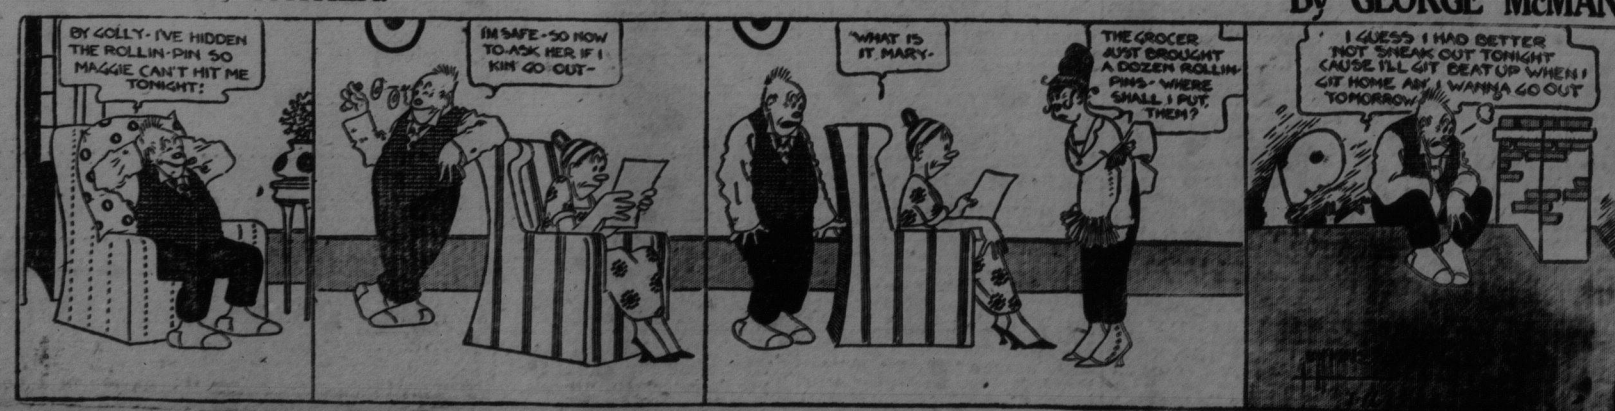

Bonds were steady in the main, despite slight irregularities in liberty and international issues.

Total sales, par value, aggregated \$4,750,000.

United States bonds were unchanged on call.

London Free Press: London Punch makes the following comment: "County Tyrone has a dog specially trained to trace whiskey. Several people in this country have already offered it a good home, where it will be treated as one of the family." Who said wake up Canada?

BRINGING UP FATHER.

ALLIED TROOPS FOR SILESLIA

Supreme Council Discusses the Advisability of Sending Troops There for Policing Purposes.

Paris, August 23, (By The A. P.)—The Supreme Council today discussed the question of sending troops to Silesia, in case the Germans are willing to permit foreign troops to enter the district for police purposes before the peace treaty has been ratified.

The general impression in conference circles is that the Germans will consent, because of the large property interests involved. The American delegation has advised the council that it will be unable to provide troops without instructions from Washington.

GOODYEAR

MADE IN CANADA

EXTRA POWER BELTING

Almost Unbelievable Power-Saving and Economy

Time and again industrials have told us not only of lower belting costs, but also of increased and faster production, time and power saved.

To-day there is no reason for any plant to buy belting on promises.

On file in our office are letters which enable you to buy belting by proof.

Records of Goodyear Belting performance.

Records of extreme long-life, which means economy.

Records of pulley-gripping non-slip qualities which save power.

Records of work under strenuous conditions of heat, cold, damp.

Records of strength and flexibility.

Records which prove that without Goodyear Extra Power Belting enough power is wasted in Canada every year by poor belts to reduce earnings of industry's capital.

Better belting, scientifically applied, will save you money. Without obligation to you, a belting man, trained by Goodyear, will call and make a record of your needs and experiences. Our recommendation will come from engineers who fit belts to conditions. Phone, wire or write the nearest branch.

Branches—Halifax, St. John, Quebec, Montreal, Ottawa, Toronto, Hamilton, London, Winnipeg, Regina, Calgary, Edmonton, Vancouver.

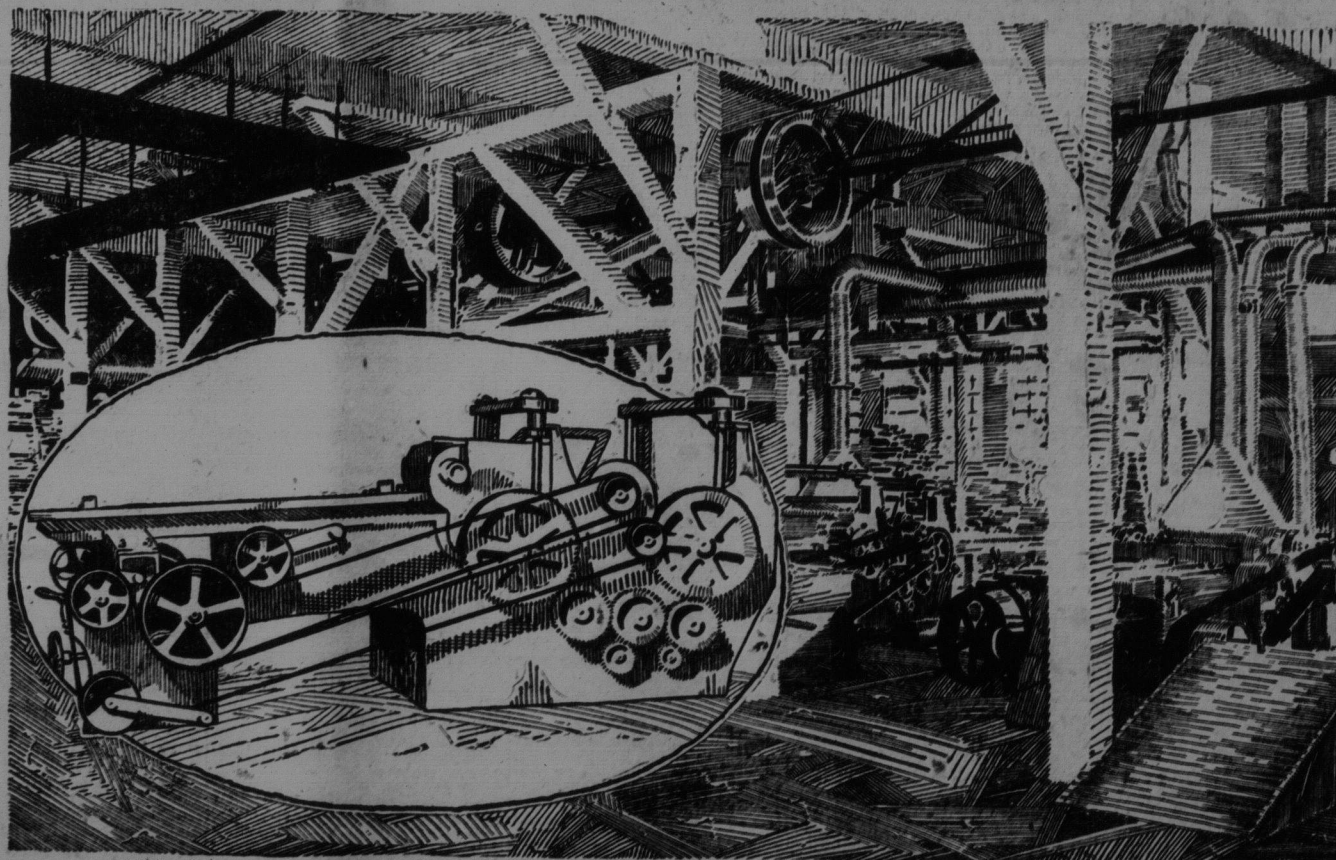

ANOTHER CONVERT

HALEY & SON, ST. JOHN, N.B.

LONGER MESSAGE

Gentlemen—We want to tell you about the Goodyear Extra Power Rubber Belting we bought for our new mill two years ago and what great satisfaction this belting has given us. As you are aware, we bought this kind of belting from you for the equipment of our mill throughout, even to planers and sawmills. We were skeptical at the time about using this belting on our machines, especially on the side rolls, as that is a very trying place for any kind of a belt. We concluded we would try your belting, as we thought then, as a makeshift. Now it has been something over two years since we belted up our machines with your belting and the original belts are yet on these machines and still giving good service. We thought where this belting of yours had proved so eminently satisfactory that we should tell you just as we thought about it and you know we are giving you this testimonial of Goodyear Extra Power Rubber Belting entirely as our own initiative.

Yours truly,
HALEY & SON
