

Landmarks of Typewriter Progress

Such are all the recent developments of the

Remington

VISIBLE MODELS
10 and 11

Among these developments are:

The Built-in Decimal Tabulator—which makes the decimal tabulating mechanism an integral part of the typewriter.

The Tabulator Set Key—which eliminates all hand setting of the tabulator stops.

The Column Selector—which determines, by the stroke of a single key, the exact point on each line where the writing is to begin.

The Adding and Subtracting Remington (Wahl Mechanism)—which combines in one typewriter, and in one operation, the functions of the writing machine and the adding machine.

Every one of these new developments is an evidence of the perpetual leadership of the Remington Typewriter. Illustrated booklet descriptive of all recent Remington improvements, sent on request.
