**THE KELSEY HEATING SYSTEM**

One of the reasons why the Kelsey can deliver more warm air than any other Heating System is based on the construction of the zig zag Heat Tubes or Sections.

The zig zag tubes have great heating surface. They are very heavy and easily retain the heat a long time.

They warm large volumes of air in separate currents. They can be capped in groups to heat distant rooms. They are corrugated and deflect the air from side to side thoroughly warming it.

They are the means whereby the Kelsey has three times as great an area of heating surface as any other heater.
