IMPROVED

PORTABLE

Hot - Blast

FAN FORGE,

Manufactured by the

PORTABLE HOT-BLAST A FORGE MANU-
FACTURING COMPANY,

LONDON, ONTARIO.

This Forge possesses innumerable advantages over those in ordinary use, and its excellence is attested by hundreds of testimonials in the possession of the Inventor. It is made principally of wrought iron, is portable, and takes up but little room, requires no cumbersome or expensive brickwork and may be worked in the open air or in any building, and is always ready for use.

The peculiarities of its construction render it extremely desirable, and from its simplicity is not liable to get out of order, while the fan-blower is infinitely superior to the leather bellows, both in the heat, by which any size bar can be welded.

This excellent arrangement produces the following desirable effects—and needs but to be seen to be understood and appreciated—namely, that of the creation and ejection of a hot blast, which facilitates in heating, besides greatly improving the quality of the steel or iron.

Numerous experiments prove beyond question that it consumes less fuel than any other forge; any small boy can easily work the fan by hand or foot, and in less time and with less fuel can produce a more intense and better heat, without possibility of burning the iron—a great desideratum with smiths.

It stands unrivalled, and in sizes to suit any purpose.
N.B.—The above cut represents our forge which, being always ready for use, is an article of indispensable utility to the farmer, saving both time and money, and will pay for itself in three months' use. No farmer should be without one. Also kept in stock, the combined anvil and vise, hammers, ongs, bite and plates, and blacksmiths' outfits.
