Our personal interest in Christ's

resurrection may be briefly stated as

follows;—1. It is the foundation of

our faith and hope. It set the seal of God on His redeeming work. It

proved the acceptance of His sacrifice.

It is impossible to trust in a crucifi-

ed Saviour, unless we can believe in

a risen one. 2. It is the symbol, and

also the effective cause of our spiritual resurrection. When we die unto sin

we are crucified with Christ, and

then we rise with Him through the

faith which is of the operation of

God, and walk in newness of life

(Eph. ii. 5, 6; Col. ii. 12; iii. 1). 3.

It is the earnest and pledge of the resurrection of our bodies (John Xi,

23; I Cor. xv. 20; Phil. ni. 21).

Thus we see the full force and mean-

ing of the statement "that life and

immortality" are brought "to life

The Lancet, in a suggestive article on food states that three-fourths by weight of the human body is constituted by the fluid consumed and the remaining fourth from solid food material. It urges the importance of food selection as a means of modifying character. It is impossible to change inherited nature, but the individual organization may be much modified, as is indicated by the effect the food of animals has on their temper.
