A Bad Job.
The main was built in 1913 and in 1914 a large leak occurred in Leave Brantford 10.05 a.m.—For Buffalo and intermediate stations.

Leave Brantford 6.00 p.m.—For Buffalo and intermediate stations.

Leave Brantford 10.10 a.m.—For Goderich and Intermediate stations. ter it was put in. The Milling Com-pany has noted a serious shrinking of power and by a rough estimate given below. The standing obtained from the figures given above have in each subject is indicated after arrived at the conclusion that except in wet weather when there is an excess of water, about one-fifth or one-sixth of power of the dam on a 12 hour work basis, has been going through via the "Grand Trunk Pactively."

The statement of standing of all candidates will be mailed in the ific" sewer route. Experience of the four years since its installation have clearly demonstrated that the main should have been built of iron or supported with plank. With the continual pumping of all this leakage water from the station to the plant and the liability of a break anywhere along the dam at any time. this trunk sewer is undoubtedly a white elephant. Had deputy-reeve John West's contention been entertained and an iron sewer pine used

was a similar break further up the 7.36 a.m. except Sunday.—For Hamilton and intermediate points, Welland, Nigara Falls, Buffalo and New York.
