Phil Wilse has added a fresh coat of paint to his store front which adds very much to the tasty and substantial appearance of the brick building. Brown manipulated the paint brush.

About two a.m. this (Tuesday) morning Mr. and Mrs. Chas. F. Kerr, of this village were horrified to find that their six months old babe, which was lying beside its mother was dead. The little one had been in the best of health and was not even restless during the night and could not possibly have been smothered as it was lying in its place in bed with features as fresh as when it was born. Dr. C. J. Kerr well made an examination of the child, a few hours afterwards but could give no cause of death.

Special sermons were preached throughout the Dominion on Sunday last for the O. O. P. Rev. Mr. Fleming preached in the Presbyterian church to the Mallorytown, Delta and Athens Lodges. There were 57 on the march but many more were present in Delta for other lodges on Sunday.

The church was beautifully decorated including the emblematic three links, in flowers, which was suspended to the wall in rear of pulpit. We regret that the space did not permit to describe the different rooms. We then proceeded up the Round Tower, circumference is 302 feet. In reaching the top of the tower, per capita describe the different rooms. From the Home Park to the top of the Flag Staff is 295 feet. Around the wall is something "maddening." The long walk from the tower to the distance of three miles straight, at the end of the walk is a statue of George IV. After leaving Windsor Castle, we made our way towards Eaton College, a handsome building where one of our greatest warriors had been educated. As we boarded the train for home, we viewed the castle from the Thames, a more handsome sight, per capita not to describe the interior of the train we walked over Waterloo Bridge, and viewed the lights of London, a sight once seen never to be forgotten, also the Thames embankment by gas light.

The young lady named Sunday, in connection with Epping Forest, where the fair consists of swings, roundabouts, shows, run on the same principle as an American circus. There was a gathering of 200,000 persons on the ground. On another outing we took a walk around a place called Petticoat Lane where Jews sell all kinds of things from china to clothing. It would be useless to describe the different classes of people. Sunday is their money-making day. I have seen some of the streets where the poor unfortunate women were murdered by Jack the Ripper, although I have not come across him yet. I forgot to mention one of the largest stores in London, called White's, where you can buy anything from a pin to a white elephant. It covers 3 to 4 acres of ground, and employs 500 hands, and you can pass from one room to another and not go out of the building.

Our London Letter.

The following extracts are taken from a letter received from one of our subscribers, now residing in London, England:

I have visited Madame Tessaard's, and there saw all noted characters, such as Birchell, life-size, rather a short man, also Mrs. Peasey, she that was hanged during our stay in London. The Hamlet Heats and the murderer that we put to death by electricity in New York, those belonging to the Chamber of Horrors. Other noted characters such as John Wesley, Stanley (the African explorer), all the old kings and queens of home and abroad, all the royal family and thousands of other characters can be seen in life-size wax, in the Museum of the Chamber of Horrors, in commemoration of Prince Consort, the height of which is between 80 and 100 feet. On the four corners of the museum is the representation of Europe, Asia, Africa and America, and the animals of each nation. Above the corners is Prince Consort sitting in an armchair, which is of a massive gold gilt. The monument itself is white marble, and is guarded night and day by a body of police. Opposite the memorial is the Albert Hall, a handsome, round building, the inside of which is covered with a horse shoe. We next visited the mint where the money is made, and the new Tower Bridge which is under construction, when finished, this bridge will be the longest bridge over the Thames. We went under the Thames by the subway, a distance of about 10 minutes walk. Just imagine walking under the River Thames. I think after this experience I will never cease. We viewed the Thames, and the enormous traffic passing to and fro is beyond description. We saw one of the finest churches in the world, called St. George's, Southwark. Our next visit was Windsor Castle, a distance of 35 miles from Plaistow, one of the Queen's residences, a magnificent ancient building, the residence of the Duke of Devonshire. Passing up the main entrance we saw the statue of Queen Victoria in commemoration of Jubilee year. Our first view was St. George's church, a handsome interior of carved wood-work, with banners and armor on each side, and on the same ground floor, is the memorial of Prince Leopold and the Duke of Albany, King of the Belgians, in a large marble statue in life-size in a chapel called the Albert Chapel. We visited the state apartments called the Vandyck, noted for its paintings prepared by the painter Vandyck, in a large reception room, the Walls, is embellished with some fine needle work, representing the story of Jason and Medea. From this room we passed into St. George's Hall, an apartment of enormous dimensions, being 200 feet long and 34 feet wide and 32 feet high. Its walls are decorated with the portraits of the sovereigns from James I to George IV. The rest of the rooms are called Vandyck, Yuccardill, State, Ante, Grand Vestibule, Waterloo Chamber, Throne Room, and Accessory Room, St. George's Hall, Presence Chamber and Queen Audience Chamber. Passing through these rooms we had a grand view of the present given to the Queen in the year of jubilee. This is not permitted to describe the different rooms. We then proceeded up the Round Tower, circumference is 302 feet. In reaching the top of the tower, per capita describe the different rooms. From the Home Park to the top of the Flag Staff is 295 feet. Around the wall is something "maddening." On Friday last a private letter from Friend, Nebraska, conveyed to us the sad news of the death on the Monday previous at her husband's residence near Friend, of Elizabeth Olds, wife of Daniel Blanchard well known in this section as a former resident of Greenbush. Mrs. Blanchard had been in poor health for some months past, but was not considered at all dangerous as she was able to be around and assist in the household. On the Saturday before her death she got breakfast and done some cooking and about six o'clock in the evening was taken violently ill with a gripe and after suffering dreadfully until two a.m. on Monday morning she passed away. The physician who attended her, gave as his opinion that she could not, from the nature of her disease, have lived more than a few weeks, even if she had not been attacked with the gripe. Mrs. Blanchard was the youngest daughter of the late James Olds, and was born and always resided in the vicinity of Greenbush, until the family removed to Nebraska, some nine years ago. About two weeks ago she was in Canada and spent several months in visiting her numerous friends and relatives in Canada and New York State. Mr. James Olds of Brice Hill, St. Lawrence Co., is now the only surviving one of the large family left by the late James Olds of Greenbush. On Tuesday all that was mortal of a loving wife, a kind and indulgent mother and a warm friend, was laid in the silent tomb, all the members of family being present, excepting their son Clarence, who resides near Addison.

Mr. James Olds of Brice Hill, St. Lawrence Co., is now the only surviving one of the large family left by the late James Olds of Greenbush.
