He Protected the Clerk.

A typical story of Lord Curzon is the ving: A government clerk in India visit to his home overstaid his leave a day or two and was dismissed by the head of his department. As the man had over 20 years' service he appealed to the viceroy, and in due course the head was asked to explain. He gave the rea-son for the dismissal as general incom-petence. The viceroy ordered the clerk to be reinstated and wrote across the report that in his opinion the incompetence lay with the man who took 20 years to over such a shortcoming in his clerk.

A Liberal Education

That man, I think, has had a liberal education who has been so trained in youth that his body is the ready servant of his will and does with ease and pleas-ure all the work that, as a mechanism, is capable of; whose intellect is clear, cold, logic engine, with all its parts of equal strength and in smooth working order, ready, like a steam engine, to be turned to any kind of work, and spin the gossamers as well as forge the anchors of the mind; whose mind is stored with a knowledge of the great and fundamental truths of nature and of the laws of her operations and who, no stunted ascet-ic, is full of life and fire, but whose passions are trained to come to heel by a vigorous will, the servant of a tender conscience; who has learned to love all beauty, whether of nature or of art, to hate all vileness and to respect others as himself.—Huxley.

SNOGGLES, THE SNORER.

Fricks Played by His Tent Companions to Make Him Stop.

"One of the worst snorers I think that I ever had the misfortune to be personally acquainted with," began the white haired dry goods drummer reflectively. fellow is dead long ago. I believe, and I don't want to say anything to injure the feelings of his friends, but the truth of the matter was that when Snoggles slept there was mighty little rest for any one in the neighborhood.

"The minute he got to sleep he would roll over on his back, open his mouth and tune up. He would begin with a noise something like a man gently scraping a fiddle bow across the strings, and as he went on the sound would gradually rise higher and higher and spread out and increase in volume until the whole as he went on the sound would gradually rise higher and higher and spread out and increase in volume until the whole tent was packed so full of it that the sides bulged out, and then he would suddenly wind up with a terrific snort that nearly shook the ground.
"Naturally this was rather was rather than the state of the state of

"Naturally, this was rather wearing on the rest of us, and we tried various schemes to break him of snoring, but without success. Finally we hit upon the plan of tying a piece of hard tack to a string, attaching the other end of the string to a pole and then, after daugling the cracker over the remaining rather wearing dangling the cracker over the yawning cavity until it was exactly in the right position, dropping it gently into his mouth. This would tickle his palate mouth. This would tickle his palate and set him to coughing, and as it would take him some time to settle down and get his snore foundry going at full blast again the other occupants of the tent would manage in the meanwhile to secure a little rest

"But it used to puzzle Snoggles greatly to know why he had these sudden chok-ing spells in his sleep, and he finally consulted the company's surgeon, who examined his throat and told him there was nothing wrong there and that his choking must be all in his imagination.

"'Imagination be hanged!' growled Snoggles. 'I reckon a man's imagination don't set up nights tryin to choke im to death. "Well, he began to suspect what the

trouble was finally, and one night when we were trying the cracker cure on him as usual he suddenly shut his teeth or as usual he suddenly shut his teeth or it, and the next instant he was sitting up spitting hard tack and harder language out of his mouth, and as soon as he got fully awake and had secured a club we had to fly for our lives.

"Snoggles went to the captain next morning and entered a complaint against us for disturbing his sleep, and we promptly entered a counter complaint

morning and entered a companin against us for disturbing his sleep, and we promptly entered a counter complaint against him for his diabolical snoring, and the matter was finally settled by giving Snoggles and that double bass snore of his a tent all to themselves at the extreme edge of the camp.

"Many years have passed since that time, but never have I forgotten Sam Snoggles' snore, and frequently on a summer night, when I am awakened by the loud rumble of thunder overhead. I spring up in my bed, and for an instant I have all I can do to keep myself from imagining that I am back in Company G's tent on the Rappahannock listening to one of Snoggles' slumber annihilating midnight solos."—Woman's Home Companion.
