BASSINETS FOR BABY

Nothing can be Found That is Better for all

WHERE baby shall sleep from the very first day of his appearance is a subject upon which far too little thought is usually expended. The mother usually either lays him on the bed next to her or else upon a pillow which rests upon two chairs beside the mother's bed.

Both of these places for baby's sleep are objectionable. In the first place, no baby should lie under the same covers as the mother. Not only is she apt to turn upon him, and thus injure him, but he will be a nursing baby he will soon acquire the habit of demanding food at frequent intervals the night through. The pillow is as bad. It is altogether too soft to support the weak little back, and it does not admit of baby's being tucked in as snugly as is desirable when he first appears. Some mothers lay their child in the carriage. This would do at a pinch for awhile, if it contained a mattress laid upon a pillow, in order to raise it high enough to give the baby air, but he should not be put in the bottom of the carriage or upon a pillow alone. Some mothers use the crib right from the beginning. This, of course, is all right, but it is not so desirable at the outset, as it is a trifle spoken of above, and as it gives no sort of support to the weak frame.

Nothing can be found that is better for all round purposes than the willow bassinet. This comes in several sizes, is very light, and rests upon a small stand, from which it can be lifted at will. It has the advantage that it is light and portable, and therefore convenient to carry the baby about in without disturbing him.

For the mother who feels that she cannot afford to pay \$5 or \$7 for a bassinet, the cloth-covered one is recommended as an excellent substitute. But care should be had in selecting it to get one with sides not too high, and, if possible, with sides of very open weaving. If this is not practical, the mattress can be raised high in the basket, resting upon a pillow which lifts it almost to the top.

But whether the mother elects to have the crib at once or chooses the bassinet, the arrangement of the bed should be the same in either case. First of all, there must be a mattress of soft curled hair. This is essential. Pillows are not fit for baby to lie upon. His back needs a firm support. He should not lie upon one in the carriage when later on he is taken out. A small mattress can be fitted to the carriage, and sometimes the one for the bassinet will fit the carriage.

Over the mattress should be laid a piece of rubber cloth to cover its entire width, and about eighteen inches in length. This is not necessary during the first few months of life. It is only when baby is old enough to roll and move about freely in his crib that this becomes desirable. Over the mattress, then, is laid the sheet of muslin or linen, upon which rests a small, thin pillow of feathers or hair, preferably the latter, covered with a linen case, over the sheet, in the centre, just beneath the pillow, is placed the pad. This is made of the very best quality of white Turkish toweling, and about twelve inches square. It is fastened with buttons or tapes. Into it is slipped a doubled piece of rubber cloth. This will prevent moisture penetrating to the sheet. Now come the second sheet and the crib blankets. These may be the knitted blankets of cream white yarn, the softly quilted cheese cloth blankets, with carded wool or cotton between, or for the more fortunate baby, the comfortable of down. One of the comforts of a pair of blankets ought to be enough, unless the temperature be very low.

Have everything about the bed spotless. Change the bedding morning and evening. Have plenty of pads. Hang the night bedding in the sun to air each day, however put a thing back upon the bed if it becomes the least bit soiled. Sponge the rubber cloth off every day with a two per cent solution of carbolic acid.

It is said to see in the parks on a summer day the hot and soaked feather pillows upon which babies are expected to go peacefully to repose. The carriage canopy is let down over the little faces, excluding all the air, and the inexperienced child nurses roll the carriage about interminably, wondering why the children cry so incessantly. And what a pleasant contrast is the cooling clean, smiling baby who lies in his spotless bassinet or carriage and kicks contentedly at you, or falls to sleep quiet unconscious of any desire to be rocked or soothed to slumber because nature has been allowed to assert herself.

Never put baby into a cradle, and never acquire the habit of rocking or singing him to sleep. Just lay him down. Then you will not need to waste hours later on in getting him to sleep and teaching him to go to sleep of his own accord, like a rational bit of humanity.

The Color of Children's Hair.

A Regular Reader—Don't attempt to do anything to keep the children's hair light excepting to shampoo it well, which makes it fluffy and keeps it free from superfluous oils and dust, giving it a lighter appearance. The color of the hair depends upon the pigment, which is composed of various minerals. No external application that will really lighten the hair is anything but a bleach, and I certainly should not think of using a preparation of this nature. The effect of cutting the hair, generally speaking, is to make it darker. If I were in your place I should not cut the little girl's hair. My personal experience leads me to believe that it does not increase the growth or luxuriance. The French hygienic soap is the one I refer to.

Imitation is the sincerest form of flattery, and the latest thing in Paris is the "imitated" oyster. As the demand for the delicious live oyster is in excess of the supply, ingenious Parisian caterers have bethought themselves of manufacturing false oysters, which are made of some harmless gelatinous matter and served in real shells, properly flavored with lemon juice and salt.

ITCHING LIMBS

For Three Years, Nightly Itching and Burning Terrible.

Wife Suggests CUTICURA. Uses it. Presto! What a Change.

Feels Like Kicking Doctors for Three Years' Suffering.

The itching and burning I suffered in my feet and limbs for three years was terrible. At night they were worse, and would keep me awake a greater part of the night. I consulted doctors after doctors, as I was travelling on the road most of my time, also one of our city doctors. None of the doctors knew what the trouble was. I got a lot of the different samples of the medicines I had been using. I found them of so many different kinds that I concluded I would have to go to a Cincinnati hospital before I would get relief. I finally decided to try CUTICURA. I had heard of it, but I had no faith in them. My wife finally prevailed upon me to try them. I used CUTICURA. I used it for three years when I could have used CUTICURA. I used it for three years when I could have used CUTICURA. I used it for three years when I could have used CUTICURA.

BABy'S FACE SOLID SORE

My little nephew, John Stanton, was afflicted with a solid sore on his face. His head and face at times were swollen and he suffered terribly. He was under the treatment of a physician, but no relief came. His father used all the remedies that he heard of, and doctored with all the doctors. He was a poor case, and which do you think? I used CUTICURA. I used it for three years when I could have used CUTICURA. I used it for three years when I could have used CUTICURA.

CUTICURA

Begin with the Blood and Ends with The Skin and Scalp.

It is a fact that CUTICURA, a powerful purifier of the blood and circulator of the blood, and that it removes all the impurities from the blood, and that it cures all the diseases of the skin, and that it cures all the diseases of the scalp, and that it cures all the diseases of the face, and that it cures all the diseases of the body, and that it cures all the diseases of the mind, and that it cures all the diseases of the soul, and that it cures all the diseases of the universe.

Brussels and Antwerp are to be connected by an electric tram service provided by the government. The new line will be three years in construction, and the trams will run every five minutes each way without stopping between, the journey of twenty-eight miles being accomplished in twenty-five minutes.

"Have by some surgeon, Shylock, on your charge to stop his wounds lest he do bleed to death." People can bleed to death from loss of blood, and the body. It must follow that gain of blood gives the body strength. The strengthening effect of Dr. Pierce's Golden Medical Discovery is in large part due to its action on the blood-making glands and the increased supply of pure, rich blood it produces. It is only when the blood is impoverished and impure that disease finds a soil in which to root. The "Discovery" purifies the blood and makes it antagonistic to disease. When the body is enfeebled, the lungs are weak, and there is obstinate lingering cough, "Golden Medical Discovery" puts the body on a fighting footing against disease, and so increases the vitality that disease is thrown off, and physical health perfectly and permanently restored. It has been the means of curing the hopeless and helpless, and who had tried all other means of cure without avail.

Thirty-one one-cent stamps to cover expense of mailing and customs will obtain a copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, in paper cover. Send 50 stamps if cloth binding is preferred. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE MARKETS

CHATHAM GRAIN MARKET.

Plant Office, Tuesday evening, August 14.

The Kent Mills gives the Planet the following grain quotations:

Wheat—The market rules about the same, at 65c. a bushel. There is not much coming in, but what offers is of good sample.

Barley—There is quite a large quantity offering, but nearly all is too dark for malting purposes.

Oats—This grain is quite plentiful at from 22 to 23 cents a bushel. There is a heavy crop this year. Old oats are scarce and command from one to two cents more a bushel.

Beans—The growing crop looks well and gives indications of a heavy yield. There is very little doing in the bean market and quotations are made nominally at \$1.20 to \$1.30 a bushel.

Wheat, 65c.
Mixed oats, 25 to 26c.
White oats, 26c.
New oats 22 to 24 cents.
Corn, shelled 35 to 36c.
Beans, \$1.20 to \$1.30.
Barley, new, 50 to 55c.
Alaska, \$5 to \$6.50.
Red clover, \$5.25 to \$5.50.
Timothy, \$1.15 to \$1.25.

HAY AND HOGS.

Hay, timothy, per ton, \$7 to \$7.50.
Hay, clover, \$5.50 to \$7.
Hay, baled, \$5.50 to \$10.
Live hogs, 5.25 to \$5.50, per cwt., for hogs from 175 to 200 lbs.

GRAIN WANTED.

Nelson Stringer, corner King street and Aberdeen bridge, buys all kinds of clover and timothy seed. Farmers call on him with samples.

LOCAL WOOL AND HIDES.

Wool, washed 15c cash; 16 trade.
Wool, unwashed, 10c trade; 8 to 9c cash.

TORONTO LIVE STOCK.

Toronto, Aug. 13.—Notwithstanding the excessive heat there was an exceptionally good trade done in all lines last week.

Export Cattle—There was a large supply offered, and choice were rapidly picked up by local shippers. The supply included a number of inferior grades, which were not wanted. The prices showed no quotable change, but the market was not as firm as in the early part of the week the warm weather no doubt being accountable for this change. The ruling price was \$4.50 to \$4.75 for choice selections, and heavy exporters, averaging 1,320 per cwt., common and inferior grades were in heavy supply, but were unsaleable at prices ranging from \$3 to \$4 per cwt.

Stocks and feeders—Canada stockers for Buffalo were a little staidier, and the bulk of the offerings were made up of good stock; choice stockers, 400 to 700 lbs., fetched \$2.75 to \$3.00 per cwt., and lighter stockers and feeders brought \$2.25 to \$2.50 per cwt.

Cows—An unusually strong feeling prevailed in this line, the large supply meeting with a brisk demand. Large steady prices of \$35 to \$50 for good milkers.

Sheep and lambs—Prices for sheep underwent no quotable change, but choice lambs were a little firmer, being quoted at \$4.50 to \$4.75 per cwt.; choice butchers' sheep fetched \$2.50 to \$3.50 each and export ewes brought \$3.75 to \$4 per cwt.; bucks were quiet at \$2.75 to \$3 per cwt.

Hogs—The market remained unchanged, and quotations underwent no quotable change in any line.

It Dazzles the World

No Discovery in medicine has ever created one quarter of the excitement that has been caused by Dr. King's New Discovery for Consumption. Its several tests have been on hopeless victims of Consumption, Pneumonia, Hemorrhage, Pleurisy and Bronchitis, thousands of whom it has restored to perfect health. For Coughs, Colds, Asthma, Croup, Hay Fever, Hoarseness and Whooping cough it is the quickest, surest cure in the world. It is sold by A. L. McColl & Co., who guarantee satisfaction or refund money. Large bottles 50c. and \$1. Trial bottle free.

DON'T BE DUPED

There have been placed upon the market cheap reprints of an obsolete edition of "Webster's Dictionary." They are being offered under various names at a low price.

By dry goods dealers, grocers, agents, etc., and in a few instances as a premium for subscriptions to papers.

Assignments of these comparatively worthless reprints are very misleading; for instance, they are advertised to be the substantial equivalent of a high-priced book, when in reality, so far as we know and believe, they are all from A to Z.

Reprint Dictionaries, phototype copies of a book of over fifty years ago, which in its day would be about the value of a high-priced book, when in reality, so far as we know and believe, they are all from A to Z.
