**It is Necessary  
These Days**

that you see things—and see them as others see them. Isaac Newton was hit on the head with an apple; it made him sit up and take notice. He saw the apple—he also saw "our laws of gravitation." In those days glasses were almost unknown. To-day there is no excuse for not seeing things. Spectacle lenses are made upon the most scientific principles and with mechanical precision. Let us examine your eyes if you don't "see things" as you should. Our examination will show the defects, if there are any present.

**CHAPLIN'S,**

The Store that Pleases.

**PICTURE MAKING  
By Enlarging.**

Small prints as a rule only possess a passing interest, it is difficult to make them decorative; but if you have them enlarged this feature is added. That snapshot of the kiddies would make a fine enlargement, and you took it yourself. You have already heard about and seen our wonderful enlargements, let us make some enlargements for you from your own snaps.
