

The Wool Clip in the North-West.

It appears that the wool clip of the North-West promises to come in late this season, owing to the backward spring, which has retarded general farm work, and hence made it necessary to postpone shearing very generally until other work has been disposed of. As to the amount of the clip, there is reason to fear that it will not exceed, if indeed it will not fall somewhat below, that of last year. In Wisconsin the flocks are not as large as at this time last year, and in Michigan it is estimated that there will be a falling off of at least ten per cent. There seems to have been no general effort made to keep up and increase the flocks in the North-West, owing to the moderate price of wool last spring; while the drought of last fall injured the pastures and compelled many of the sheep raisers to begin fattening a month or so earlier than usual; consequently flocks were reduced in number to save fodder, which was neither abundant nor cheap. The advance in the price of wool later in the season came too late to stimulate production, and there seems, therefore, to be good ground for believing that the amount of the clip in the North-West will be somewhat, and possibly considerably less this year than last. In Ohio, the largest wool-growing State east of the Rocky Mountains, the condition is reported to be much the same. Nor is there any good reason for believing that there will be any considerable increase of production in this or the New England States. In West Virginia, Kentucky, Tennessee, Missouri, Kansas and Iowa, however, the clip is likely to be in excess of last year, though not sufficient to offset the deficiency reported elsewhere, while the production of Illinois, Indiana, Wisconsin, Minnesota, and other States is so small as not to affect the supply materially.—*Financial Chronicle.*

DR. HOWE ON THE USE OF FELLOW'S HYPOPHOSPHITES.—Pittsfield, Me., March, 1872. Mr. Jas. L. Fellows—Dear Sir: During the past two years I have given your Compound Syrup of Hypophosphites a fair though somewhat severe trial in my practice, and am able to speak with confidence of its effects. In restoring persons suffering from emaciation and the debility following diphtheria, it has done wonders. I constantly recommend its use in all affections of the throat and lungs. In several cases considered hopeless it has effected a relief, and the patients are fast recovering; among these are consumptive and old bronchial subjects, whose diseases have resisted the other modes of treatment. For impaired indigestion, and in fact for debility from any cause, I know of nothing equal to it. Its direct effect in strengthening the nervous system renders it suitable for the majority of diseases.—*W. S. HOWE, M.D.*

BR. EPPS'S COCOA.—GRATEFUL AND COMFORTING.—By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctors' bills.—*Civil Service Gazette.* Made simply with boiling water or milk. Each packet is labeled "James Epps & Co., Homoeopathic Chemists, London." Also, makers of Epps's Milky Cocoa (Cocoa and Condensed Milk).
