No sane man would sit down to discuss a business deal on that basis. The realtor would know he was wasting his time, and the prospective buyer would think he was being made the subject of a practical joke. The whole basis of legitimate trading is on laying all the cards on the table so that both parties can see all the details.

In this case, instead of a house, government selling is being offered to the people of Ontario. They look around at other provinces to see what is going on there. They see many things that are not pleasing, and they wonder if these features will be included or eliminated from the law for Ontario. Mr. Hume Elliott's frank statement, "Nobody knows what the law is going to be in Ontario," furnishes the answer. There is not a precedent for it in business, legal or political dealings. Ontario is being asked to go it the other fellow spills the beans. blindfolded.

It is estimated that the corn borer drilled the pockets of Western Ontario farmers for a million and a quarter dollars in 1924. Given a chance, the worm will repeat the operation on a larger scale in 1925.

There is a degree of urgency here that dare not be passed over lightly. It is of small assistance that one farmer take up the battle while win if they go it together, but the thing can be done on no other basis.

MEN THE BEST COOKS.

There seems to be little doubt that men are better cooks than women, and the question arises

Many answers have been given. One is that man cooks because he likes it and woman only likes it as a means to an end. Another is that he sacrifices nothing on the

stumbling block of a woman. Again, man is said by nature to be an epicure. This gives him an instinct for subtly blending flavors to tempt the palate. It is said that women accept cooking as an

everyday duty, but men look upon it as a pro-Man is more exact; whereas woman dislikes

accuracy and works by rule of thumb. It is said that man is more original and inventive, while woman merely imitates.

Again it is said that cooking needs good health, and men can stand and walk about and endure heat for long hours better than women. One writer says that men have tradition behind them and a recognized status; their remuneration is good; they are allowed to concentrate; they have an unstinted larder and their extravagances are overlooked.

One woman says that women are expected to produce a rich menu on a limited allowance, also to mind the baby, clean the house and answer the door bell while they are cooking.

The best explanation is that men, when they cook, give their entire attention to the matter, while women are busy also with something else,

MY FIRST visit to Strathroy was with my grandfather in the year 1849. At that time Strathoy was a very small place, consisting of a small waterpower gristing mill, erected on Bear creek, by a gentleman by the name of Buchanan, who named it after a parish or some place of that name in Ireland, his native country. He did not remain there long, for Mr. Timothy Cook was the owner of the mill immediate neighborhood. A Mr. Clark Same All the Way.
