#### The French National Party.

The Riel scaffold has become the policy of the Grit party, and it is upon that issue that they expect to win the next Dominion election. It is upon that also, that they hope to triumph in the preliminary skirmish of the Quebec local elections this autumn. That issue is now being worked for all it is worth in Quebec. It carried the election for Mr. Blake's friend Prefontaine, in Chambly, Friday, and it will doubtless score many more victories for him in the future. But what a policy for a great leader, and a great party! Its direct issue is "whether the law is to be administered by the properly constituted tribunals of justice, or by politicians at the dictation of mercenarily led mobs." Are the loyal, law abiding people of Canada, content that any set of men shall ride into power on the bloody scaffold of a rebel-murderer? Is all fair play and justice, to be overriden, that Mr. Blake, and not Sir John A. Macdonald, shall rule at Ottawa? Is lawlessness and rebellion, murder and rapine, henceforth to be French masses of Quebec, but it won't work in New Brunswick. It will not go down, we should hope even with the secessionists of Nova Scotia: the loyalists of Ontario will stamp it out, and we have confidence in the educated Frenchmen of Quebec, that they are not so blinded to prejudices of race and creed, as to assist in making Riel a political martyr to bolster up the fallen fortunes of a discredited party.

The full account of the Tatnall County Georgie, cannibal affair, mentioned briefly in the FARMER last week, is as follows: A few days ago some of the colored people in the lower end of the county held a picnic. They had engaged as cook and general overseer of the culinary department an old negro woman. Breat preparations had been made for the festivities, and the sport ran high. It was a ungry band that gathered for dinner and awaited the summons. It was served at last and the merrymakers fell to with a will.
