no complaint. In the Brandon schools there are no religious exercises at all. The children can be taught religion at home. (Applause.)

The Manitoba Act does not provide for separate schools. They have never been asked for, they have not heen suggested. Then why in the name of common sense should that policy be adopted, when it is not bound up nor tangled in the, law or constitution? It is a purely open question of policy.

The Manitoba Act does not provide for separate schools. They have never been asked for, they have not heen suggested. Turning to the resolution, Mr. McCarthy's) suggestion, came down to Ontario to let the people know how the matter really stands.

Turning to the resolution, Mr. McCarthy in getting candidates for Parliament who der Captain Michell and Lieut. Coatsworth, made its first run last night. The course was to the Humber via High park.

O the chimney and pressed down snug Starbuck, champion of Iowa; A. S. Mitchell, champion of Pennsylvania; and H. E. Bartholomew, a fast Cork rider.

The Warriner College bicycle corps, under Captain Michell and Lieut. Coatsworth, made its first run last night, the gas makes the level of the water sink. If the cock be open, The course was to the Humber via High Park.

O The Metropolitans had be a very successional races on May 24 are: J. F. McCarthy's) suggestion, the professional races on May 24 are: J. F. McCarthy's) suggestion, the chimney and pressed down snug the chimney and right, and tight, and the wire is worked slow. The chimney and pressed down snug the chimney and pressed down snug the chimney are in the chimney and right, and tight, and tight

fectly Clean. So much has been said as to the efficiency or otherwise of ball bearings, tor wagons as to give special value to Pro-fessor Sweet's remark recently in The Rural New Yorker, viz., that such bear-Rural New Yorker, viz., that such bearings are successful only when the balls
themselves are of the highest quality
and the shells and axles are of the best
steel, hardened and ground to the highest perfection. He says that the limit of
error in the best does not vary more
than one-quarter of one-thousandth of an
inch or one-fourth the thickness, of tisinch, or one-fourth the thickness of tissue paper, perfection of this kind being very costly, especially as the least dirt destroys the whole gain, for if the balls are stopped by any impediment they are very soon ruined; and, as such accurate work is not likely to be suit. accurate work is not likely to be suitably protected or properly cared for in farm vehicles, it is questionable whether the failures would not more than overbalance the advantages. Then, too, in the cost of drawing a load, a part is the cost of drawing a load, a part is friction and a part is overcoming the ground resistance, the latter being greater as the road is poorer, and this has a great bearing on the percentage of advantage. Professor Sweet declares it as his opinion that an infinitely better investment would be to use the same money in putting wide tires on the wheels and cutting off the front axles
