## HIGH SCHOOL REGULATIONS

The new regulations made by the Department of Education for High School courses of study and examinations contain several changes. High Schools must now be opened with reading of the Scripture and prayer and closed with prayer. Formerly this was optional.

Writing and spelling are no longer to be taught formally by one teacher but all teachers are to insist on correct spelling and good writing, and at the Departmental Examinations a maximum of ten marks shall be deducted for bad spelling on each paper at the rate of one mark for each misspelled word. The courses in history have been altered, and several new books of reference are required in the H. S. library. The Synthetic geometry of Upper School may be replaced by a course in solid geometry.

Graduation diplomas are now available for High School students. These diplomas give the student a good standing, and should be highly prized.

When recommended by the local authorities and approved by the Minister such subjects as the following may be introduced: Spanish or Italian, manual training, household science, music, business practice, stenography and typewriting.

## How Clothing and Furnishing sales are increased by Long Distance

Some quotations from recent reports:

"Long Distance brought us so much business that we expect to enlarge our factory."

"Tried Station-to-Station service and find it very satisfactory for selling goods to distant points."

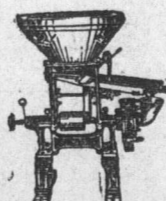

"Thanks to Long Distance we are able to carry on without a large stock of goods. We call up wholesalers for our needs."

"We call up customers in outside towns and make appointments for try-ons."

## I Want to Put Dollars In Your Pocket

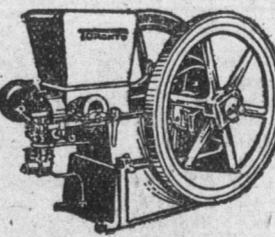

There is no need to make a special trip to town for a load of chop if you have a Toronto Farm Engine and Grain Grinder of your own. And besides, it will save you a few cents on every bag.

Coarse or fine chop—for cattle or hogs—I would recommend the Toronto Grinder for efficiency and economy on your farm.

A Toronto Farm Engine, too, is a great labor saver. Attach it to your pulper, pump, cutting box, cream separator or fanning mill.

Think of the labor saved! It pays for itself in one winter.

I'll put dollars in your pocket if you'll come in and discuss Toronto Farm Equipment with me.
