

Why IHC Cream Harvesters Are The Choice of Careful Farmers

Careful farmers judge the cost of a machine by its value. They know that a cheap price means nothing if quality is lacking. And they know that it is genuine economy to pay a little more for a machine that is worth double.

A high standard of values has been set by IHC Cream Harvesters. No one without IHC facilities can ever reach that standard. Today an IHC Cream Harvester simply means the utmost for your money—the biggest value you can get at any price.

If you investigate all cream separators you will appreciate IHC features and advantage all the more. Comparison proves IHC superiority in materials, construction, and efficiency. For instance, you will find that IHC Cream Harvesters are the only separators with gears which are dust and milk proof and at the same time easily accessible; IHC Cream Harvesters are protected against wear at all points by phosphor bronze bushings; IHC Cream Harvesters are constructed with larger spindles, shafts, and bearings than any other separator, insuring greater efficiency and durability; the IHC bowl is free from slots or minute crevices—that is why it is so remarkably easy to clean.

You will find an IHC in a style and size to meet your needs. Dairymaid is chain drive—Bluebell is gear drive. Each is made in four sizes, from 350 to 850 pounds capacity. The IHC local dealer will be glad to explain the above IHC Cream Harvester advantages and many others, all of which have much to do with your dairy profits. Ask him for catalogues and all information, or, write nearest branch house for the information desired.
