

MONTREAL MINING EXCHANGE.

Business was decidedly slow, transactions being limited to six issues.

There was a little stir in Big Three, in which several sales were made, but the price was poor, although stationary. Altogether 4,500 shares sold at 20.

There was little demand for Virtue, one sale being placed at 63 for 1000 shares. Buyers were only offering 50 and sellers at the close were asking only 62.

Golden Star keeps its position and late advance well, considering the lack of interest manifested in mining stocks at the present moment. Some 2,500 shares sold this a.m. for 65.

The demand for Summit was poor, 1000 being sold for three.

There were no sales concluded in either Surprise or Black Tail, two of the unlisted mines about which much is being said. These two mines are neighbors; Surprise is just south of Black Tail, and the Surprise lead, in which such rich ore has been found recently, runs through several hundred feet of the Black Tail.

The first work done on the Black Tail was to run a cross-cut tunnel, the purpose being to cut the lead known as the Black Tail lead, and for this reason no drifts were run either north or south on the Surprise lead. This drift can be run 400 feet on Black Tail ground.

There is known to exist three cross veins on the Lone Pine and one has been found in Black Tail. There is a regular system of these veins running at right angles to the main north and south vein, running through the Quilp, Surprise, Black Tail and Pearl.

MORNING SALES.
