DR WHERLER'S COMPOUND ELIXIR OF PHOSPHATES AND CALISAYA.

THIS elegant and agreeable preparation is a Chemical Food and Nutritive Tonic, being composed only of ingredients that enter into the formation of the system, and in such carefully adjusted proportions as are readily absorbed and assimilated. It supplies the waste constantly soing on from the decomposition of tissues, as the result of physical and mental exertion, preventing Nervous Prostration and General Debility. Its action is purely physiological, building up the constitution in the same manner as our daily food. It has been used in private practice with eminent success in the treatment of Chronic Wasting Diseases, depending upon depraved nutrition and impoverished blood. It acts immediately on the stomach, invigorating Diseases, Assimilation, and the formation of Healthy Blood, energizing the nervous and muscular systems and all the vital organs. Sold at \$1.00: 6 bottles, \$5.00. TITHIS elegant and agreeable preparation is

DOMINION TELEGRAPH

89 ST. JAMES STREET, MONTREAL, P.Q.

GEORGE E. DESBARATS. Proprietor.

Established for the purpose of qualifying Operators for the new Telegraph Lines now building throughout the Tourinton and the United States.

This Institution having been established three years, may now be considered discrimanent College. Its rapid growth and prosperity are due to the demands of the Telegraph community, and the great success which has attended the Proprietor is due simply to the able manner in which the system has been conveyed to the Pupils by the Professors attached to the Institute.

The rapid development and avolutness of the Electric Telegraph, so the consuptent ever-increasing demand for First-Class (0 gratter renders the opening of Colleges for instruction apositive necessity. Telegraphs Superintendents view this movement as one made in the right direction. Commercial Colleges have, to some extent, as under the tranches of business education. The knowledge of Telegraphy gained in this matther has always been backed upon as being second rate. So much so that the Colleges in Chicago, Milwankee, Butalo, New York, Ac., have discontinued the practice of Teaching, and recomment the Telegraph Institute as the proper place to acquire this highly interesting, eventific and profitable art.

acquire this highly interesting, essentific and probable art.

The prisopects for Young Men and Ladies to at only the system of Telegraphy could not be better than at present, and we call upon all who wish to engage on a present, and we call upon all who wish to engage on a present and locative unployment to quartly their solves as Operators on the Lines of Telegraphy, draduates on leaving the Institute are present in with a diploma of protosency, which will enable the with a diploma of protosency, which will enable the to act immediately as vacassies eccur throughout to Dominion of Chanalas and the United States. After salaries of \$20 a month may be recurred; after the years' experience on the lines, from \$20 to \$0.00 a month can be commanded; while in the United States.

The passession of a knowledge of Telegraphy is concisilly open to Ladies; in fact, they are the favor to acceptable both in England and America, commanding higher wages, as compared with other employments, than men, while they have the natural facility of acquiring the systems somer. A fair knowledge of freathing and writing are the only qualitations necessary and any person of ordinary ability can become a conjectent operator. This has been proved by graduates who with a very slight education and no idea of the mornoground of Telegraphy on cutering, have been negrood operators in a few months. Students have also our students who could but hardly write they name how take down a message at the rate of from 25 to 30 worsta a minute.

THE DUTIPS OF AN OPERATOR. words a minute.

THE DUTIES OF AN OPERATOR.

words a minute.

THE DUTIES OF AN OPERATOR.

There is no trade or profession which requires so small an amount of labour, and at the same time where the employee has the same amount of freedom and independence, being at all times master of the instrument over which he presides, generally in an office by themselves, without either foreman or master, merely to take and despatch messages. The usual hours of attendance required is from 10 to 12 hours per day, less the usual hours for meals. Operators are not tequired to work on Sundays. The Institute is fitted up in a most complete and practical manner, with all the usual fixtures, &c., of a regular Telegraph office on a large scale. Messages of every description. Train news, arrivals and departures, Market Reports and Cable messages are sent and received, as daily practised on the lines. Individual instruction is given to each publi, according to capacity of learning the science. Neither pains for expense are spared to qualify the students for important offices, in the shortest precible time. Students may commence their studies at any time, and costinue at the College until they are professed operators, without any further charge. There are no vecations. Hours of attendance, from 9 a.k. to noon, and from 1.30 to 6 r.k. The time occupied in learning sverages fibers weeks; but this, of course, depends principally on the capacity of the pupil for instruction. Some pupils who are now on the lines completed their course of study in from five to eight weeks.

The terms for the full course of instruction is Thirty Dollars. There are no extra expenses, as all necessary materials, instruments, &c., are furnished to each student.

A life has been constructed on which students.
