30-1yr

The Result of the Exhibition RECENTLY HELD IN HALIFAX Proves unquestionably the GREAT VALUE of

The North British Cattle Food Co.'s NUTRITIOUS CONDIMENT In the Feeding of Live Stock.

All the cattle which took the leading prizes, as well as the special prizes presented by the agent of the above Company, were really SUPERB AND HANDSOME LOOKING ANIMALS, and received the encomiums of all who saw them. As a consequence of the demand for the Condiment has increased a hundred fold.

Wherever used according to directions, this valuable article, never fails to produce the most satisfactory results. See pamphlets.

THE NUTRITIOUS CONDIMENT.

The Reporter says:—"This article has become an institution. Its great success and unlimited demand are victorious and have proved its efficiency; cattle to whom it is given are always in first-class condition, and a large per centage is saved in the cost of feeding by the use of this condiment, and they are less liable to be attacked by disease or plague; but, if attacked, it has been proved that they are most likely to escape fatal results; in fact they enjoy an almost complete immunity from the ravages of any disease. Geo. Fraser, Esq., the managing agent for Nova Scotia, generously offered special prizes for cattle using this condiment, and the condition of the various animals entered for the following prizes was the best proof of the excellence and value of this celebrated and useful condiment, and furnished handsome testimony of its advantages. These facts are of interest to stock-raisers, and others owning cattle. The following is the list of Mr. Fraser's special prizes for the nutritious condiment:—Best and fattest ox, \$15, C. Baker, Amherst; best milk cow, \$15, 50, Colonel Starratt, Paradise, Annapolis Co.; fattest cow, \$12.50, Edwin Chase, Port Williams, Kings; fattest hog, \$10, Dr. Lawson, Lucyfield, Bedford; fattest sheep, \$10, P. Allison, Newport.

Agricultural, &c.
FARM stock must always be regarded as the best capital a farmer can have, for it furnishes the manure by which rich harvests are secured; and through these good husbandry creates the capital which is needed upon the farm.

The Swede turnip became introduced to the circle of useful agricultural plants in England about 1700, and the Spring variety of wheat, which was before unknown, in 1795. Robert Bakewell commenced his celebrated experiments in improving domestic animals in 1760.

It has been found true that the use of steam in transportation, instead of diminishing the number of horses, has actually increased the number. Thus in Great Britain, before railways were generally formed, about 1832, the total number of horses used for riding and drawing carriages was 182,878; in 1862 their number had increased to 309,798, besides 263,391 used for heavy traffic; while in 1872 their number was 907,000.

The largest wheat farm in the world is said to be the Grandin farm near Fargo, Dakota, on which 40,000 acres were this year in wheat. The product of one field of 2316 acres was 66,285 bushels, or about 25 bushels per acre. The farm has on it, immense granaries, machine shops and elevators, and during seed-time employs 70 to 80, and at harvest from 250 to 300 workmen. The farm is almost all level land, and the soil a rich, black loam.

SALT seems to be more necessary to the health of sheep than to that of most other domestic animals, though with them all we think it is more necessary than many farmers are apt to think. It is said that in Spain, wherever sheep are kept in the neighborhood of the rock-salt hills, or sea salt, and have access to it, they thrive better than in other situations; and in France the same thing is found to exist in the neighborhood of the sea coast and the salt works of the north, the sheep giving more and better wool, and the mutton being more highly esteemed than that from other localities. Where it is given to them when at pasture, the amount should be from half an ounce to an ounce to each sheep never stray from an enclosure in which salt and water are provided for them.

Domestic Hints.

How to MAKE A CURTARD.—Take four teaspoonful of Wilson's Custard Powder, mix with a little cold milk in a basin, boil about a pint of milk in a tin placed in a saucepan of boiling water with two ounces of sugar; when milk is at full boil pour it on the cold mixture, then pour it back into the tin replaced in saucepan, stir until it thickens.

DANDY PUDDING.—Four eggs broken and beaten separately, five tablespoonfuls of white sugar, to be added to the whites after they are well beaten, so that they will stand alone. Four heaping table spoonfuls of brown sugar must be beaten into the yolks with two tablespoonfuls of corn starch. Pour over the yolks one quart of boiled milk, stirring until well mixed. Any flavoring may be used that suits one's taste. The whites are to be put on too and nicely browned.

HAM CROQUETTES.—Take a quarter of a pound of grated ham or tongue, and mix it with two ounces of mashed potatoes; melt a piece of butter in a saucepan, add the mince, season with a little pepper, a very little stock, a little powdered sweet herbs and chopped parsley; stir until quite hot, then add, off the fire, the yolks of two eggs; lay the mince on a plate to cool, make it into croquettes, roll them in egg, and then in baked bread-crumbs, and fry in hot lard.

REMEDY FOR EARACHE.—The *Journal of Health* gives the following: There is scarcely any ache to which children are subject so hard to bear and difficult to cure as the earache. But there is a remedy never known to fail. Take a bit of cotton batting, put upon it a pinch of black pepper, gather it up and tie it, dip in sweet oil, and insert into the ear. Put a flannel bandage over the head to keep it warm. It will give immediate relief.

Use Wilson's make of Woodill's German Baking Powder.
