A most enthusiastic meeting was held, a large number being in attendance. The chairman, J. T. Edworthy, after making a few appropriate remarks, called upon Edmund Bristol, M.P. The latter bespoke a prosperous future for the organization. In speaking of the war he said he was proud of the stand Toronto hed taken. He

was sorry a man like Bourassa should be allowed to stir up race hatred. He thought the descendants of France should be among the first to appreciate what Great Britain is doing.

When hundreds of men and women —and there are hundreds, with more coming every day—living in every nook and corner of this broad land,

voluntarily testify to weight increases fanging all the way from 10 to 35 pounds, given them by Sargol, you must admit, Mr. and Mrs. and Miss. Thin Reader, that there must be something in this Sargol method of flesh building after all.

you let the scales tell the story.
Sargol is just a tiny, concentrated tablet. You take one with every meal. It mixes with the food you eat for the

purpose of separating all of its flesh-producing ingredients. It prepares these fat-making elements in an eas-

ily-assimilated form, which the blood

can readily absorb and carry all over your body. Plump, well-developed persons don't need Sargol to produce

this result. Their assimilative machinery performs its functions without aid. But thin folks' assimilative

organs do not. This fatty portion of their food now goes to waste through their bodies like unburned coal
