Crop Reports.
 Mr. Lacouture wires from Cortland, N.Y.: "Heavy showers yesterday; think large area well watered, but corn will not make over 75 per cent. of crop."
 Howard wires from Bowling Green, Mo.: "Crop fairly to six weeks late. Weather too dry and crops only fair. Maize on Hannibal much late replanting, uncertain promise, so much out of season. Hannibal to here short acreage, but early plant big promise."
 Show says: Increased yield of winter wheat shown by government report will be duplicated later in spring wheat yields. Outturn in favored districts in South Dakota and Central Western Minnesota are heavy and too much attention has been centered on North Dakota. Looks as if the final government wheat total will exceed 75,000,000 bushels.

Broomhall's Cables.
 France.—Broomhall cables as follows: Our agent at Paris reports further deterioration as a result of unfavorable weather during harvest. Complaints from this condition are almost general. It is generally conceded among the best informed that the import requirements will be 35,000,000 bushels, and many estimate 40,000,000 bushels as being certain.
