IN WALL STREET.

New York, Jan. 5.—Events over the week-end were favorably interpreted by financial interests, judging from the firm to strong opening of today's stock market.

Shipments, oils and metals were especially prominent at gains of one to two points, several of the food and utility stocks also displaying strength. Steels and equipments were irregular and mostly under last week's final prices. Rails moved within narrow bounds, some of the Pacific and coalers reflecting moderate pressure.

Engagements Announced

The engagement of Miss Mildred Thomas, of Calais, to Hardy N. Ganong of St. Stephen has recently been announced. The wedding is to take place on January 7.

Mr. and Mrs. C. D. Goodill, of St. Stephen announce the engagement of their daughter, Olive Faith, to Ellery Sanford Johnson of Montreal, the marriage to take place at an early date.

Mr. and Mrs. Michael McLaughlin, of Buctouche, N. B., announce the engagement of their eldest daughter, Mary Aureole Helen, to Raymond Alfred Leger, of the Leger Drug Co., Moncton, the marriage to take place at an early date.

The "Pros." and Hockey

Moncton Transcript.—J. H. Brown went to Sussex Saturday afternoon to meet A. W. Covey, of the M.A.A.U. A conference was held in that town in an endeavor to have some proposed men in the different hockey teams of the new Eastern League reinstated, as some of these are classed "professionals," while the league itself is "amateur."

23 THE PHARMACY

ST. JOHN'S MAN
PRAISES "LIV-RITE"

Walter Anderson, 200 Waterloo Street, Says He is Much Improved Since Taking This Great Tonic—Read His Letter.

More words of praise for "Liv-Rite Tonic" have come from another local resident, Walter Anderson, 200 Waterloo Street. He was in ill-health and tried this new tonic which has already made so many friends. He has written to the Maritime Drug Co., 108 Prince William Street, the following letter:

"Dear Sirs: I feel compelled to write of the great improvement which your 'Liv-Rite Tonic' has made in my health to write you in praise of what I consider a wonderful remedy. I was for some months in very bad shape physically, was run down, nervous, and irritable and unable to eat. I had tried several medicines with little or no results when I noticed your advertisement. I purchased a box of 'Liv-Rite Tonic' and must say that it has made a remarkable improvement. I have just begun upon the second box and already feel ever so much better. It helped me when I was beginning to despair and I consider it the best tonic sold. I strongly advise any one who is run down, to try it and I shall be pleased to let you publish this letter with my name if it will be of any service to some other poor sufferer who may find relief in the good that 'Liv-Rite Tonic' can do."

If your druggist can't supply you, send his name to the Maritime Drug Co., 108 Prince William Street, or send them a dollar and they will supply you. If you send or bring them an empty 'Liv-Rite' box they will furnish you with an order entitling you free of charge to a consultation with a reliable local physician.

(Adv.)

CHILDREN AND HIGH PRICES.

"Irreducible Minimum." Even, Not Always for Them.

The need for surveys to reveal exactly what a child ought to have in order to be properly reared and what his chances are for getting it under present conditions is one of the topics emphasized in the seventh annual report of the chief of the children's bureau of the United States department of labor, which has just come from the press. "Considering the possibility that the high cost of living may endanger the health of the growing child if economies are made in the food, clothing and other commodities used by him, intensive and general surveys should be made at this time to ascertain the irreducible minimum requirements of a growing child, and whether attainment is being affected by high prices."

Special investigations made by the Children's Bureau in three American cities show how babies have suffered as a result of the advance in the price of food. In Boston, half of those between two and seven years of age, only 29 per cent are now having fresh milk to drink, as against 60 per cent a year ago. In Washington, half of those between two and seven years visited by the public health nurses were receiving no fresh milk, and in New Orleans conditions were even worse. As to the statement made by Dr. William R. P. Emerson that about one-third of the American babies attend school, children are mal-nourished, and that from 20 to 40 per cent of those graduating from elementary schools are physically unfit and you have a situation that demands attention.

While national attention has been drawn to the food needs of the child, the attention has been given to the other factors, such as housing, clothing and recreation, which affect his development. Studies of the type emphasized by the chief of the children's bureau would seek to determine all a child's needs. They would be based upon actual living conditions in various localities and would accordingly have a practical and not merely a theoretical value. Through them mothers would obtain a more authoritative statement concerning the basic needs of growing children and communities would be given an insight into the way in which those needs may be met.

LIBERAL LEADER TO SPEAK TUESDAY NIGHT

Ottawa, Jan. 5.—Hon. W. L. Mackenzie King, Liberal leader, will leave tonight for Newmarket, Ont., to attend a banquet given by the Newmarket Liberal Association. His speech will be the first of a series. With the exception of this one all will be delivered in the maritime provinces. Mr. King may visit the western provinces before long.

Americans Won

Melbourne, Jan. 5.—Norman Ross, an American swimmer, won the 220 yard championship sprint in an athletic meet here today. Spencer and Oger Clerk, Americans, were winners of the six-day bicycle race, carrying off the prize of £300 sterling. Fourteen teams competed.

The French Presidency

Paris, Jan. 5.—Premier Clemenceau again denied yesterday that he was a candidate for the presidency of the republic, but added: "The truth is, the presidency of the republic is being forced upon me. I am being carried to the post." The Echo de Paris says: "The Tiger has said the word. There is nothing to it now."

NERVY HOLD-UP IN BROOKLYN RESTAURANT

New York, Jan. 5.—Three armed men held up fifteen persons, including two women in restaurant of Geo. Doumjos in Brooklyn early today, collected their money in two hats and escaped after shooting the proprietor in the jaw. Most of the patrons were sailors.

FREDERICTON MARKET.

Saturday's prices in Fredericton market were: Beef, 13 to 15 cents; pork, 22 to 24 cents; mutton, 13 to 15 cents; veal, 14 to 20 cents; chickens, 45 cents; eggs, per dozen, 85 cents; butter, per pound, 60 cents; potatoes, per barrel, \$4.50; apples, \$3.50 to \$5.00; buckwheat meal, per cwt., \$6.00; hay, per ton, \$20 to \$25.

At the home of Mr. and Mrs. Street Wilmet, Lower Coverdale, on Thursday, their daughter, Mabel Lavina, was united in marriage to Duncan G. H. Cameron, of the audit department, C. G. R. Mr. Cameron is a son of the late Rev. Peter Cameron, of Durham, England, and served with the Canadian expeditionary forces, having enlisted with the 25th Battalion in 1914.

THE POWER BEHIND THE LORD MAYOR

Soulsby, Forty-five Times Private Secretary, Made No Blunders.

Lord Mayors of London come and go at the rate of one a year, but the Lord Mayor's private secretary, Sir William Jameson Soulsby, remains a fixture. He was first appointed to that office in 1875, and he has just been re-appointed for the forty-fifth time, says the Philadelphia Public Ledger.

He is the one indispensable man on the Lord Mayor's staff. He knows just how everything should be done "according to precedent." And to follow that precedent in all things without a hair-breadth's deviation is the chief duty of the Lord Mayor. It is Soulsby who tells him how to do it so as to avoid introducing an innovation which would be regarded as a blunder worse than a crime. For he it known, the code of etiquette by which the official conduct of the Mayor is regulated is more rigid than that which obtains at Buckingham Palace. Each successive Lord Mayor after his inauguration puts himself unreservedly in Soulsby's hands, and the secretary sees him through. He is the power behind the throne, the man who pulls the strings on ceremonial occasions.

Foreign potentates who have been entertained by Lord Mayors from time to time have recognized Soulsby's capacity for running things smoothly. In consequence, besides being an English knight, he is a knight of more foreign orders. It is said, then he can count on both hands the number of times he has been knighted. The Lord Mayor that has to get along without him will have a trying time of it. But it is reported that somebody is carefully studying the secretary so as to be able to passably fill the gap that must occur some time, for Soulsby is sixty-eight years old.

BOGOTA CAPITAL OF LAND OF MANY VIVID CONTRASTS

Latest Paris Styles Jostle Baroque Poles in Church-Lined Streets of the Colombian City.

(By R. DeF. Boomer, in the New York Herald.)

Bogota, Colombia, Dec. 4.—Columbia is a land of contrasts. Merchandise shipped from a factory in the United States to Bogota, the capital, must be transhipped a minimum of seven times, and no one finds the latest Paris styles, American automobiles, golf and polo clubs, in this one little town. The city is situated four degrees from the equator, but one wears an overcoat and shivers under four blankets.

One finds that the American dollar is worth only ninety-eight cents, that the bank objects to paying checks in paper money and insists that one must spend about three months salary in an old Spanish measure. The Indians sell platinum without scales, deciding the value of a specific amount by "hefting" it in the hand. The maid who takes care of my room receives \$4 a month and the laundress who washes my clothes charges me sixty cents a dozen, but leaves it to me to decide how much three dozen amounts to, as she can use figure it out herself.

Half Go Barefoot.

On the streets of Bogota half the people are dressed in the extreme of fashion and the other half are barefoot. It is seen constantly. The silk hats are barefoot or wearing the "alpargatas" on their feet with "rums" or pencils over their shoulders. There are innumerable priests with black skirts, churches every two or three blocks and a constant changing of the bells calling the faithful to worship.

There is a great shortage of transportation facilities, but there are more railways near the capital than near the coast. The first railway built in the country, thirty years ago, was built near the capital. The rails locomotives and cars were brought by river boat and mule to the scene of construction at an expense which would have allowed for the construction of the entire line from the coast to the capital. The country is now in a period of expansion and development. There are immense natural resources which have not been touched. Local capitalists are active and much foreign investment is anticipated.

NOT MUCH YET

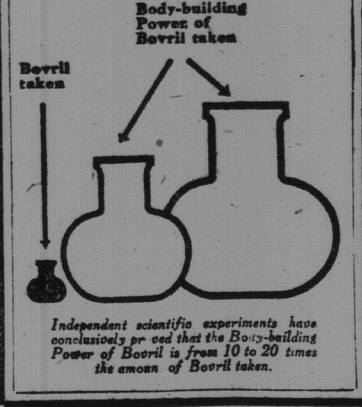

At one of the express companies today it was noted that no large shipments of liquor had as yet come in from Montreal as had been expected, following the release of the war time restrictions.

A Boy Escaped

Wentworth Kenney, an inmate of the Boys' Industrial Home in St. John, escaped from custody Friday afternoon and was reported to the Moncton police.

BOVRIL

The great "key food" that makes other foods more nourishing.

Independent scientific experiments have demonstrated that the food value of Bovril is from 10 to 20 times the amount of Bovril taken.

PERSONAL

James Pringle of Fredericton is in the city today.

Gerald Regan, son of Mr. and Mrs. P. Regan, left on Saturday for St. Francis Xavier University, Antigonish, to resume his studies.

William Drake returned today to Sackville to resume his studies at Mount Allison University. He has spent the Christmas vacation at his home in Summer Street.

Miss Marion Patterson and Miss Marion Smith left today for Sackville to resume their studies at Mt. Allison Ladies College.

E. C. Davis of 45 Elliott row returned to Halifax today to resume his studies in Dalhousie University.

Friends of T. L. Irvine, general yardmaster with the C. N. R., will regret to learn that he is confined to his home in Dalhousie lane through illness.

Mr. and Mrs. E. W. Henry and daughter, Miss Florence, returned home on Saturday from Boston, where they attended the celebration of the golden wedding of Mrs. Henry's parents, Mr. and Mrs. G. E. Lachner.

Master Kenneth T. Irons, who has been spending the Christmas holidays with his parents, Mr. and Mrs. W. McInnis Irons, in Mala street, returned this morning to Halifax, where he is attending school.

Miss Molly Terrio of Amherst, who spent the holidays with Mr. and Mrs. C. W. Harrington, West St. John, returned home today.

Stanley E. Elkin, M.P. and Mrs. Elkin left on Saturday for Winnipeg, where Mr. Elkin will attend a meeting of the directors of the Union Bank of Canada.

James S. Harding, of St. John, who has been seriously ill in the Ross Memorial pavilion of the Royal Victoria Hospital, Montreal, is making good progress towards recovery.

His Lordship Bishop Richardson, of Fredericton, was in the city yesterday.

Mr. and Mrs. Michael McLaughlin, of Buctouche, have announced the engagement of their daughter, Mary Aureole Helen, to Raymond Alfred Leger, a Moncton druggist.

Mr. and Mrs. E. Atherton Smith returned to St. John on Saturday evening, having spent the holiday season at Riviere du Loup, Quebec, the guests of Mrs. Smith's sister, Mrs. Maxwell Scott, and her husband at their residence in that city.

Mrs. F. J. Harding left on the Moncton train Saturday to visit Mr. and Mrs. E. J. Horne, Moncton.

BOB MAC HAS BEEN SOLD.

Amherst News.—"Bob" Mac, 211 1-4, the first provincial bred gelding to that mark on a maritime track, has been sold to parties in Sydney, and will be shipped to that destination sometime today, according to information given the News this morning. Our informant was unable to mention the sale price or give the names of the parties who made the purchase, but at the same time the amount of money changing hands would be sure to run over the thousand dollar mark. The Mac horse, as he is familiarly called, is one of the Commodore colts and is Island bred. He holds numerous track records, and has everything raised in the provinces surpassed as far as speed is concerned.

A Boy Escaped

Wentworth Kenney, an inmate of the Boys' Industrial Home in St. John, escaped from custody Friday afternoon and was reported to the Moncton police.

EAST INDIES TRY TO MEET DEMANDS

Remarkable Examples of Home Market Expansion Due to War Requirements Are Given.

Recent industrial developments in India provide remarkable examples of home market expansion due to war demands, to the failure of external sources of supply, and to war restrictions on imports which encouraged domestic manufacturers. In Calcutta, for instance, impetus has been given to the tanning industry and to the manufacture of leather goods, and it has been discovered that Bengal has an inexhaustible supply of both vegetable and chemical tanning materials. A very large amount of capital, mainly British, has now been invested in the tanning and leather industries, and the government of Bengal has approved a scheme for a research tannery in Calcutta.

The dependence of the tea industry upon imported tea chests in Bengal has been largely corrected. A British company has recently obtained a concession in the forests of Northern Bengal, with the object of supplying the demand for three-ply tea chests. While another British company has established a three-ply factory in Assam, a large rolling mill is also being erected and other mills, both for tea lead, are projected, which should make India self-sufficient in regard to these products. Tools and implements required by the tea industry are also being manufactured in the domestic plants. The attention of the government was first directed to the manufacture of ironing knives, very large quantities of which were required by the tea industry, now being produced within the Bengal provinces. Some difficulty was experienced in securing an adequate supply of suitable steel, but it has now been found that the Tata Iron and Steel Works, itself a war-developed organization, can produce the quality of steel required. Firms in India are also taking up the manufacture of hose, digging forks and other tools required by the tea industry.

Golvanising on a very large scale is now being done by two local plants, both of which existed before the war, but have greatly developed. Two other firms are installing plants for the manufacture of enameled ironware in India. A workshop for the production of vacuum brake material required by Indian railways, is also now in operation. Electrical and medical porcelain is being manufactured for the first time in Calcutta pottery works at Tangra. Plants for the manufacture of bolts, nuts and rivets are being imported.

In the textile industry before the war practically all the consumable stores and all the machinery were imported from the United Kingdom. The quality of the goods produced in India was poor, pickers, roller sticks, belting, porcelain thread guides and many other commodities, formerly imported, could be successfully produced in India and they are now being manufactured on a commercial scale. One of the largest producers of textile machinery in the United Kingdom is considering a scheme for the establishment of branch works in India for the manufacture of textile machinery.

The British engineering works spinners and fliers are being manufactured by the latest and most approved methods, and also spare parts for jute and cotton mill machinery. Fine iron and brass castings, such as before the war, were imported from England and malleable castings of many kinds are being made in local plants. The manufacture of agricultural implements in India is being considered. Indian steel is being considered. The Bengal Brass Company are now manufacturing all classes of brass and gun-metal work, and propose to import a complete wire-drawing plant.

The Tata Iron and Steel Company of India has undertaken very large extensions. The Bengal Iron and Steel Company has taken up the manufacture of steel at Kulti, and the Indian Iron and Steel Company will make pig iron and steel at Asansol.

As a result of war demands and difficulties of importation, the manufacture of chemicals in India has been greatly developed. Large works have been established at Budge-Budge to manufacture caustic soda from sodium carbonate imported from East Africa. Coal tar is being distilled on a small scale. Thymol, refined saltpetre, potassium carbonate, surgical dressings, fire extinguishers, many drugs and medicines, concentrated commercial glycerine, are all being produced in India for the first time on a commercial scale. A large factory has been established for the extraction of salt, and fire bricks and silica bricks are now being made in large quantities by three concerns.

Summarizing this development, J. C. K. Peterson, controller of munitions and director of industries in India, says: "The present industrial development has already effected a great deal. The air is full of new schemes and the country of new enterprises which are being rapidly developed to supply its wants. Public opinion is veering around from its former indifference and satisfaction to a discontent which means to see that India is in future self-supporting and that it commerce, trade, and industries shall no longer be dependent on external supplies. The material effects of these great causes can be traced in every industry in Bengal."

WILL MEET IN MONCTON

(Moncton Transcript.)
At a meeting of members of the New Brunswick Automobile Association in city hall last evening it was decided to await action to see what was to be done at a similar meeting to be held in St. John last night. The local meeting consequently was adjourned at the call of the chair.

After the meeting here a representative of the St. John association phoned to F. E. Dennison of the local automobile association and said that a committee of four had been appointed to come to Moncton and confer with the local committee.

This morning Mr. Dennison was again in telephonic communication with St. John and was informed that the St. John deputation will arrive in Moncton on January 7. A meeting will be held here on Wednesday evening, 7th inst., in City hall at eight o'clock.

TRIBUTE TO HARRY MCCLASKEY

(St. Croix Courier.)
Not in very many years has McCol Methodist church held such a great congregation as on Sunday evening of last week when Harry H. McClaskey of New York was announced to sing in the home church of his boyhood. Announcement had only been made of this event late Saturday afternoon, but so great was the desire to hear this now world famous soloist that the church was packed to its utmost capacity and several hundred were unable to gain admittance. Mr. McClaskey assisted the choir in the hymns and was heard in two solos, "If with all your heart" from the oratorio Elijah, and "Safe in the arms of Jesus," sung with such sweetness, power, grace and expression that each line seemed an inspiration and a benediction, and it was only with great restraint and with regard for the place that spontaneous applause was withheld. Miss Edna Nicholson, the accomplished organist of the church, was very efficient in her accompaniment.

A WAR ROMANCE

(Moncton Transcript.)
Cupid worked in a mysterious way last Tuesday, when his dove chariot by coincidence so fostered the love of two young people that a wedding took place. The wedding was performed by the Reverend Hammond Johnson, pastor of the Wesley Memorial church, when Harry McGee, a returned veteran, was united in marriage to Miss Ellen Clark, of Maitland, England, a nursing sister. The bride reached St. John on the S. S. Scandinavian the day following Christmas Day and was met at the dock by Mr. McGee, and the meeting overseas of a Canadian soldier—a wounded "Canuck" and a nursing sister was a happy culmination in Canada. Mr. McGee is a Moncton boy and is spending a few days in the city the guest of friends.

At present he is located in Edmonton, and is returning with his bride in the near future. To the young couple is wished all success in their married life.

A PROFESSIONAL PARTNERSHIP

A professional partnership has been formed between M. N. Cockburn, K. C., and his son, George H. L. Cockburn, B. A., LL. B., who has recently returned from active military service overseas. The new firm will do business under the name Cockburn & Cockburn, at the old Bank of Nova Scotia building, St. Stephen, where the senior member of the firm has carried on a business for the past six years. The firm will give attention to branch offices in St. Andrews and St. George as well.

Farmer-Cameron

At Swift Current, Sask., Miss Jean Frances Cameron, only daughter of the late Dr. W. M. Cameron and Mrs. Cameron, of Halifax, was recently united in marriage to William Belbourne Farmer, youngest son of Mr. and Mrs. Isaac Farmer, of Rockland, N. B.

ST. JOHN VOCATIONAL SCHOOLS

COMMITTEE—Dr. A. F. Emery, Chairman, A. Gordon Leavitt, Secretary, Mrs. W. Edmund Raymond, Mrs. Richard O'Brien, Alexander Wilson, J. D. P. Lewis, George P. Hennessy and Thomas Nagle.
