GOVERNMENT POWER LAUNCH
The new government inspection gasolene launch, Senawa Nabee, was taken on a trial trip last evening about the harbor and found to work satisfactorily, and she proved a source of gratification to those interested and especially to the builder. F. S. Heens, who is being complimented on his success. The boat is to be used by the department of public works for inspection purposes, and is expected to prove of valuable assistance. On her trial trip last night she accomplished more than fifteen miles an hour, and made the run from Sand Point light to Indiantown in twenty nine minutes. The new craft is 54 feet over all, has a beam of 9 feet 4 inches, and registers slightly more than 11 tons.

### THE GARBAGE **QUESTION TO** BE DEALT WITH

Board of Health Has Two Local Propositions and Some Information from Other Cities

article in St. John. Proposals have been received by Thomas Gorman, chairman of the board, from two city concerns relative to the matter, each offering a different solution of the problem of the garbage dis-

one concern writes asking to be considered in the construction of an incinerator for the burning of the refuse, while iron the other is a proposal to carry the waste some distance down the bay and dump it overboard. Objection taken to this is that unless the tide were setting out some refuse would probably float back to shore. Mr. Gorman declines to give out the names of those concerned in either company until today's meeting.

T. M. Bawns, secretary of the board, who being in touch with sanitary matters in the city, has been a strong advocate for an incinerator, has received replies from several cities to which he wrote asking for information regarding the disposal of garbage. In Montreal there is an inncinerator plant, the cost of construction of which was slightly more than \$40,000. The annual cost of operation is given as about \$7,000. Twice a week the garbage is collected and the burning proceeded with, and the plan is said to have worked quite satisfactorily. In Worcester, Mass., a novel method is adopted. The cleaning up of the waste matter is left with the municipal poor farm management and they have attended to the matter quite profitably.

Letters explanatory of the methods in vogue in other cities have been received, and the board today will hear how Winnipeg, Toronto, and other cities dispose of their refuse matter.
