CENSUS TAKERS HAVE THEIR OWN TROUBLES

Work Among Foreigners in City is Very Difficult, but the Chinese Laundryman is Worst of all.

Owing to the larger number of questions asked and the more complicated forms used this time, it is possible that the work of the census enumerators will take longer than it did ten years ago when three weeks were devoted to the job. Another reason for the work taking longer is the apparent increase in population in the last ten years. In spite of the steady exodus for the West, the city seems more crowded than ever, and it is expected that the census figures will show a substantial gain. The enumerators who have the better parts of the city in their districts are congratulating themselves on their luck when they hear stories of the difficulty experienced by other officials whose work lies among a more illiterate class of citizens. The hardest proposition of all is getting the required information from the residents of the foreign quarters. Many of the Assyrians, Italians and other foreigners have no idea what it is all about, but have a profound suspicion that it means more taxes to pay. Considerable patience and tact is needed before they can be persuaded to answer the questions. These people are difficult enough, but it is when the enumerator gets up against a bland and guileless Chinese laundryman that he decides that the job is not worth the money.

That the company owned fifty-five properties, containing seventy-one houses with two hundred and one tenants. The auditor's report showed the company to be in a strong financial position. DECIDE TO FIGHT THE EARLY CLOSING LAW

Meeting Last Night, of Those Opposed to Early Closing, Engaged Legal Counsel and will Contest the Law.

There was a largely attended meeting of the merchants who are opposing the early closing by-law in the Keith Assembly rooms last night. W. H. McDonald was elected permanent chairman, and Walter Amiesd, secretary-treasurer. Mr. McDonald in addressing the meeting stated the grievances of those present and declared the meeting open for discussion. Many of those present expressed their views on the subject, and the opinion was unanimous that the by-law was in restraint of trade, and an infringement on the commercial liberties of the merchant, and not at all in keeping with the idea of British Justice. Amon A. Wilson, K. C., and Daniel Mullin, K. C., addressed the gathering and both expressed the opinion that the city council were within their rights in passing the law. They pointed out the fact that the Supreme Court of Canada had given a decision in cases of a similar nature in Montreal and Manitoba, and in both instances had upheld the council. Both Mr. Mullin and Mr. Wilson advised that unless the merchants were prepared to carry the fight to the privy council, their case was almost hopeless, and the best thing to be done was to adhere to the law. A committee composed of A. Watson, Ernest Law, N. C. Scott, C. B. Pidgeon and L. Webber, was appointed and instructed to wait on the council and attempt to induce them to rescind the law. Contributions were called for to meet contingent expenses and \$150 was quickly raised. It was decided to employ counsel, and Amon A. Wilson, K. C., and Daniel Mullin, K. C., were retained to look after the interests of those represented. A resolution was passed to make a test case of one of the merchants reported for violating the law, and the case will come before the Police

TO ADVERTISE CANADA WITH MOVING PICTURES

Moving Pictures of St. John Scenes, in Natural Colors, Taken Yesterday for Use in C. P. R. Advertising.

St. John had its picture taken in natural colors yesterday and the pictures if successful will be shown all over the world in moving picture theatres of every description. John Mackenzie, representing the Natural Color Kinetograph Co. Ltd., London, who has been engaged by the C. P. R. to take the moving pictures of Canadian scenes from the Atlantic to the Pacific, arrived in the city yesterday accompanied by his son Oswald. In the afternoon they secured excellent pictures of the reversing falls and some other scenes. They leave for Digby in the morning and will travel through the Annapolis Valley and down to Halifax. A return visit will be made to St. John in the near future for the purpose of getting some more views. Mr. Mackenzie visited St. John a fortnight ago but found that he was too early in his spring and its climate advanced. He made good use of his time, however, and has already sent home 7,000 feet of films taken at Quebec, Montreal, Toronto, Niagara Falls, etc. The balance of this year will be spent getting pictures of typical scenes illustrating the beauties of the country, the natural resources and the industries. These pictures are to be used on a large scale by the C. P. R. in their advertising campaign in the old country, and will also be distributed to other parts of the world. The process used in getting the natural colored pictures is remarkable both in its effectiveness and its simplicity. Pictures can be shown an hour after they are taken, and at the recent unveiling of Victoria Memorial the pictures of the event were shown in the theatres on the same afternoon. The process has been in use in England for some time, and in a recent number of John Bull drew most flattering comment from Clement Scott, the famous art and dramatic critic. The colored pictures are now being shown in a Montreal theatre.

WILL CONTINUE THE CHILDREN'S OUTINGS

King's Daughters Decide to Hold More Fresh Air Parties this Year for Poor Children of City.

The commendable efforts of the King's Daughters to give some unfortunate children a holiday in the country will be carried on this summer on a larger scale than before. In addition to this work they will also take pity on some sick adults and give them a chance to recover their health away from the unfavorable conditions of their city homes. At a meeting of the members held last evening at the Guild rooms on Chipman hill, the plans for the summer were discussed. The outings and the holiday trips for the children, proved so successful last year, that it was decided to continue this work and have two outings instead of only one. The idea of giving a similar opportunity to other people who have been ill and need country air, was thoroughly discussed and it was decided to undertake the work. There are some funds on hand which can be devoted to these purposes, but a much larger amount is needed. Any one who is interested in this excellent work can send their contributions to Miss Pratt, the general secretary, of the King's Daughters, at the Guild. Magistrate this afternoon. There was no decision as to how far the case would be carried. A committee composed of I. Webber, W. H. McDonald, J. McCormack, A. Treacarten and J. Weisel was appointed to interview the merchants and obtain their signatures to a petition, asking the city council to rescind the by-law. The petition is to be circulated to interview the merchants and obtain their signatures to a petition. The gathering then adjourned to meet again at the call of the chair.

A Bad Headache

Is frequently a result of straining the eyes, and the cause is often not suspected because the vision is so good. But the strange thing to the sufferer is that there should be any eyestrain when he sees so well. If Eye Strain were poor vision or defective sight, then he could readily understand the headache because he did not see so well as he should. Eye strain is due invariably to the eyes doing more work than they should, and almost always the vision is as good as normal and oftentimes better. In such cases glasses are worn not to make the wearer see better but that the glasses shall do the extra work which the eyes have been strained to do. If you suffer with headaches come and let us tell you if Eye Strain is the cause.
