1880 Harper's Young People ILLUSTRATED.

The evils of sensational literature for the young are well known, and the want of an antidote has long been felt. This is supplied with Harper's Young People, a beautifully illustrated weekly journal, which is equally devoid of the objectionable features of sensational juvenile literature and of that moralizing tone which repels the youthful reader.

INDUCEMENTS FOR 1880.

Thirty Numbers of HARPER'S YOUNG PEOPLE will be furnished to every yearly subscriber to HARPER'S WEEKLY for 1880: or, HARPER'S YOUNG PEOPLE and HARPER'S WEEKLY will be sent to any address for one year, commencing with the first Number of HARPER'S WEEKLY for January 1880, on receipt of \$5.00 for the two Periodicals.

Remittances should be made by Post-Office Money Order or Draft, to avoid loss.

Newspapers are not to copy this advertisement without the express order of HARPER & BROTHERS.

Address HARPER & BROTHERS, New York.

J. W. ELLIOT'S Patent Saver HALL STOVE.

The advantages gained over all other stoves are it produces the greatest amount of heat from a given amount of fuel; this is accomplished by the flue pipe, which is bent down, around and underneath the base. Another object is to secure the greatest possible benefit of the fire which consists in placing around the body of the stove a series of internally projecting pockets overflapping the fire pot, and so formed that the air of the room is admitted into the lower end of the pockets, and, after passing through them, re-enters the room, having become intensely heated through contact with the inner sides of the said pockets, which are immediately over the hottest part of the fire, thereby producing far greater results from a

GIVEN AMOUNT OF FUEL THAN ANY OTHER STOVE.

An Evaporator which is part of the Stove.

The cover is a water tank, and becomes an effective evaporator, which produces a greater or less amount of vapor in proportion to the intensity of heat.

There is a double heater, by means of which heat can be conveyed to an apartment above, and supplied with sufficient vapor from the tank. Also a combined hot air and steam bath is thereby produced if desired.

It is Simple and Easy to Control.

The base plate is of cast iron in the place of zinc or other perishable material and is raised sufficient for the cold air on the floor to pass up through its raised and hollow cone-shape to the stove, and the circulation produced thereby equalizes the temperature of the room.

There are two grates similar to the base of a circular basket. They can be rotated together or separately.

The fire can always be re-lighted without removing the coal. No screening or stoving, and no waste whatever.
