BALDNESS.

A BEAUTIFUL HEAD OF HAIR is the grandest ornament belonging to the human frame. How strangely the loss of at changes the contenance, and prematurely brings on the appearance of old age, which causes many to recoil at being uncovered, and sometimes seen shun society to avoid the jests and so as f their acquaintance; the remainder of their of their acquaintance; the remainder of their lives is consequently spent in retirement. In short, not even the loss of property hits the generous thinking youth, with that heavy inking gloon as does the sess of his hair.— To avertail these mapicasmit circumstances, CLDRIDGE'S BALM OF CULUMBA stops the hair from failing off on the first pe-phention and a few hottles restres it again. It likewise produces eyelrows and whiskers; prevents the hair from turning groy, makes, in our boundardly, and trees it from sour. Auprevents the hair free a turning gray, makes it out boundarily, and frees it from souri. That the public may be able to form some idea of

That the public ray be able to farm some idea of Morrison's clair by their great consumption, the following calculation was made by Mr. VANO, Clerk to the Stamp thine, Somerset House, in a period of 4x years, (part only of the time that Morison's Fills have been before the public), the number of samps delivered for the medicine amounted to three allion, since hearized, at Jone thousand. The object in planing the foregoing before the public is to deduce therefrom the following powerful argument in favour of Mr. Morrson's system and to which the public attention is directed-pamely, that it was only by trying an innocuous purgative medicine to such an extent that the truth of the Hygenian system could possibly have been established. It is e'ear that all the medical men in England, or the word, put together, have not tried a system ed. It is even that all the medical mechan rangram, or the world, put together, have not tried a system of vegetable purgation to the extent and in manner prescribed by the Hygei is. How, therefore, can they (much less individually) know any thing about the extent of its properties
