annual general meeting for the transaction of business and election of offi-cers on the grounds of the Industrial Exhibition Association at Winnipeg on Thursday, July 26th, at 9 o'clock a.m., when it is hoped that a large number of those interested in the

number of those interested in the breed will assemble and thus give an additional stimulus to the breed-ing of the "Doddie" in Canada. Members are entitled to reduced rates for registration. The annual membership fee is \$2, payable to the

Special Ottawa Correspondence

Ottawa, June 11.—In a recent visit to Winnipeg Mr. J. B. Spencer, acting Dominion Live Stock Commissioner, completed arrangements for the admission of the Canadian Aberdeen Angus Breeders' Association to the National Records. The West has a large number of breeders of the Aberdeen Angus who have amalgamated with the eastern association to form the national association. The accom-plishment of the nationalization has not been without its difficulties. It was decided to make the standard of the American Aberdeen Angus Association the basis of admission. But some of the Canadian animals have not been included in the American. Others were not admitted to the Can-adian records until after the time limit of two years after birth required limit of two years after birth required by the American association. It has been decided to appoint two Ameri-can inspectors to visit all the herds and examine all the animals that have not been admitted according to the American rules. Those that come up to the desired standard will be ad-nitted to both the Canadian and mitted to both the Canadian and rejected. The coords and the remainder

The Central Experimental Farm, situated near Ottawa, recently closed the annual distribution of seed sam-

the annual distribution of seed samples. In weight these totalled about eighty tons. The number of applications for seed potators alone was 12,000. All these were sent by mail. The distribution was the largest in the history of the farm.

George H. Clark, seed commissioner, in recent evidence before the agricultural committee on smut in wheat, showed by figures from grain inspectors that this evil is greatly on the increase, particularly in the Northwest. The table given was as follows: follows:

**	Cars												rejected.						
Year.	inspected.																		
1899.										25									3
1900.								14	,8	86									11/2
1901.								53	.71	08									7-10
1902.								51	8										11/4
1903.								38	4	77									214
1904.								37	.8!										2 4-5
1905.								46	81										1316

Recommending means of preserving the vitality of seed wheat and purity of variety, Mr. Clark said that purity of variety. Mr. Clark said that much can be done to maintain the vigor of the crop by the use of the fanning mill. But this alone does not eliminate foreign varieties from the crop. A much further step in advance is the practice of providing each year ten acres or more of the best and cleanest land on the farm on which to grow pure seed. This wheat grown specially for seed should be allowed to get the providence of the control of the conto get fully mature before being cut. to get fully mature before being cut. It is advisable to use the best obtainable seed from which to grow seed wheat for the main crop. The practice of annually selecting large heads of grain from vigorous and fully ripened plants that are true to the desired type and variety, to furnish

seed for a breeding plot or base of supply of pure seed, has proved to be both a practicable and profitable means of keeping varieties pure, in-creasing the yield and improving the quality of the grain. Regarding smut Mr. Clark said that

If You Have Lost Your Colts

Last year, why should you do so again? It can be prevented by using

WILHELM'S BROOD MARE SPECIFIC

It will guarantee a good, strong, healthy foal, will prevent big knees and running naval. Don't wait till your mare has foal-ed—treat her now. Price \$1.50; special

rates for three or more.

Impotent and indifferent sires successfully treated. Why have a stallion that will only leave 25 or 40% if you may have 60 or 75%? For terms apply

VETERINARY COURSE AT HOME. \$1200 year and upwards can be made taking our Winary Course at home during spare time; ts in simplest English; Diploma granted, positions obtain a successful students, coat within ranch of all assistances. for successful students; cost within reach of all; satisfac-tion guaranteed; particulars free. Ontario Veterin-ary Correspondence School, London, Can. the consensus of opinion seemed to be that clear, healthy seed from an unaffected crop would be more likely to resist the fungus than that taken from a smutty crop. B should farmers select smutted crop. By no means

smutted crop.

It was inadvisable also to sow shrunken or weak seed. Deep sowing was not so good as shallow, as the latter gave the plant a chance for early development into the green leaf. In general, whatever weakened the vital energy of the seedling or depreciated the inherent vigor of the plant, rendered it more assecptible to such diseases as smut and rust, sopress, the seed commissioner mentioned the hot water treatment—that is, immersing the seed grain in hot is, immersing the seed grain in hot water, at about 132 to 135 degrees Fahrenheit for five minutes. Another was the bluestone treatment, with which all farmers are familiar. In regard to strength of the solution he recommended one pound of bluestone to 10 gallons of water.

Clydesdales for Quebec

Clydesdates for Quebec
A promising shipment of Clydesdales was made last week from Glasgow to Mr. George G. Stewart, Howick, Quebec. As is usual with Mr. Stewart's shipments, the animals were selected by Mr. T. R. McLagan, Williamston, Crieff. The shipment was made up of two colts and two fillies. One of the colts was Cambushinne. made up of two colts and two fillies. One of the colts was Cambushinne Laird, which, in the hands of Mr. McEwen, was second at Perth in 1905. He was got by the well-bred horse Sylvander, whose sire and dam were both noted prize winners, the dam having been first at the H. and A. S. Show with Sylvander a foal at foot. The other colt is Valdemar, which, Loudountill, was second at Galston He was got by the renowned prize horse Baron o' Buchlyvie, while his dam was by the celebrated Lord Lothian (5998), the sire of many prize winners. Of the fillies, one was by the Glasgow premium Clan Chattan, the sire of the H. and A. S. champion horse Royal Chattan, and the other was by the noted breeding and Cawdor Cup champion horse Revelanta. This filly was in the prize list at Ayr-Kilmarnock, and Galston when own sgot a shipment which ought to prove highly remunerative in Canada.—Scottish Farmer. highly remunerative in Canada.—Scot-tish Farmer.

Clydesdales for Ontario

Clydesdales for Ontario
Mr. John R. Beattie, Baurch Farm.
Annan, has shipped to the order of
Mr. J. D. Eadie, Hillsgreen Farm.
Vars, Ont., a capital selection of five
fillies and one stallion. The latter.
Royal Magnate (1918), is a six-yearold, bred by Mr. Beattie, and got by
the well-bred horse Balmedie Magnate, out of a mare by Prince of
Rosa, gr.-dam by Gartsherrie, and
tracing back to Challenger, Simon
Pure, etc. This is a weighty, wellcolored, thick horse, with good legs
and action. The fillies are a particularly level, nice lot, with grand feet
and legs, and first-rate colors. Itfield Fashion, out of a Lord Lothian
mare, gr.-dam by Lyon of Purdomstown, and dam of the great gelding
Masterpiece, shown so successfully by
Mr. William Clark a few seasons ago. Masterpiece, shown so successfully by Mr. William Clark a few seasons ago. This is an extra good filly, with size and quality. Another of the same age, Nancy Graham, was bred by Mr.
