

## De Laval Cream SEPARATORS

— Make —  
**HARD TIMES EASY!**

The  
**De Laval Separator Co.**  
173-177 William St. MONTREAL

### Twice as Good An Investment

When we say that the "Bissell" Disc Harrow is twice as good an investment, we mean just that.

The "Bissell" cuts cleaner and turns the soil over better, and all the time runs so easy that the work is done in half the time it takes with others. You can prove it by a comparison test.

## The "Bissell"

is easiest on the horses' necks. It is so perfectly adjusted that it is not necessary to carry the pole on the whiffletrees to lift the weight off the neck yoke. The "Bissell" Disc Harrow does not drag all the strength out of the horses, but saves it.

Surely, the harrow that does better work in half the time and is easiest on the horses is "twice as good an investment"—and that is the "Bissell." **Free Booklet** on request. Write Dept. W or ask your local dealer.

## Make the manure bring you \$4 a ton

Thousands of Successful Farmers Are Doing It

There is no charm or secret about it. You simply spread it with a machine, and thus make it go twice as far, get twice as much good from it on the first crop, do your land more permanent good, and save half the time and labor of handling.

Manure is generally estimated to be worth \$2.00 a ton handled the old way. There is no doubt that it is worth twice as much to the farmer who spreads with a machine.

Two of the most practical and valuable machines manufactured for farm use today are the **Corn King** and **Cloverleaf** manure spreaders. They are each made in a number of sizes.

These machines differ somewhat in construction and operation, but both are right-working and of great durability.

They are proven machines. They embody the best mechanical ideas, the materials used in construction are the best for the purpose, they are made as simple

as possible, and they handle manure in all conditions to the perfect satisfaction of users. Proof of all this is to be found in the record each machine has made in the field.

Is it not to your interest to own and use one of these spreaders on your farm?

Figure out for yourself and you must agree that it will be a paying investment, even if you do not have over twenty-five loads of manure to spread in a year.

You can't help but be pleased with the work, the easy handling, the light draft and the substantial making which saves you the annoyance of breakage and repairs.

Call and see these spreaders with the local International agent. He will gladly point out to you the superior features of these machines, as well as supply you with catalogue, colored hanger or other information.

The nearest branch house will supply you with any further information desired.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA**

(Incorporated)  
Chicago, U. S. A.

An automobile running wildly amuck will surely come to grief if it collides with the heaviest, strongest, stiffest wire fencing that can be erected—

### SAMSON - LOCK FENCING

A fence constructed in the Samson way is bound to be a superior article.

Lateral wires are of the highest grade of No. 9 hard steel wire, properly coiled; held neatly erect by the stiffest kind of No. 7 hard steel stays. At every point of intersection is the famous Samson Lock, which joins the wires in an immovable, vise-like grip. Impossible to crush the top wire down or force the bottom wire up in this rigid, unyielding fencing.

Weight and strength considered, Samson-Lock Fencing is the cheapest on the market.

**Agents Wanted** for this superior fencing. Easy to sell. Exclusive territory. Write to-day for our good proposition.

**LOCKED WIRE FENCE CO., Limited, LONDON, ONT.**

## POTASH

UNFERTILISED      COMPLETE FERTILISER      FERTILISER WITHOUT POTASH

Experiment on Potatoes, 1907. Conducted by H. Kipp, Chilliwack, B. C.

Fertilizers applied per acre, in pounds	160	400	400
Yield per acre, in bushels	160	433	192 1/2
			Sulphate of Potash Acid Phosphate Nitrate of Soda
