find a copy of a circular which has been issued by the secretaries of the executive body appointed for the purpose of giving effect to His Eminence's suggestion. The circular states that the Cardinal hopes that all will see the wisdom of acting in harmony with the movement he has started, "by which it is sought to unite and consolidate our scattered energies everywhere in Australia." Our friends under the Southern Cross are acting nobly towards the old cause, as they have always done; and their present special effort, as the Advocate points out, is largely inspired by their firm belief in the integrity, patriotism, and statesmanship of the present Irish Parliamentary Party.

Our faces ought to reflect back the sunshine of heaven and the joyful tones of our voices to seem the echo of its halloings.—E. P. Cobb.

**Something Entirely New!**

In spite of the advanced season, and of the clearing sales, we continue to open out new importations. We insist on keeping stocks up to the top notch of perfection.

We have just received from Switzerland a dress fabric that is entirely new to Montreal. It is called "Craponette," and is a very light and airy piece of goods, after the order of a fine mousseline. A new process of spinning the mercerized yarn gives a sparkle to its surface that is positively fascinating—and the shades of solid colors—and adds just that touch to the shades (solid colors only) that means perfection.

Altogether we consider it to be the most effective, and most appropriate fabric made for certain kinds of garden party dresses and evening wear, and as to the economy of it—well, there's a width of 47 inches for 30c a yard.

the appeal of the Prince and Princess by the sentence: "Non constat de pulchritate," that is to say, "The multiplicity of the Y. marriage has not been proven."

The Prince and Princess did not object to the verdict. They sought out fresh evidence and presented their case once more to the judgment of the Cardinals. The case came up at the last meeting of Propaganda, with the same result as before. This time, however, the decision as well as the entire controversy was laid before the Holy Father, who not only ratified the judgment of Propaganda, but gave orders that the matter should not be reopened. The decision is likely to cause a great sensation both in Rome and in America.

**WM. REDMOND IN AUSTRALIA.**

The Melbourne Advocate of April 22, which has just come to hand, in an editorial of Mr. Wm. Redmond's visit to Australia, dwells with special emphasis on the proposal made at the great Irish demonstration on St. Patrick's Day in Sydney by Cardinal Moran that the friends of Home Rule in Australia should make arrangements to subscribe a substantial sum to the cause annually until the measure is carried. "Mr. Redmond," says the writer, "is at present on a visit to Western Australia, and, as may be supposed, was warmly welcomed by the Irishmen and sympathizers with the Irish cause in that State. At Perth, Kalgoorlie, and other centres Mr. Redmond has been persuaded to address large gatherings of Home Rule sympathizers, and, although he made no appeal for contributions to the National fund, the handsome sum of £2000 has been subscribed as a result of his visit."

"This manifestation of patriotic feeling," the Advocate goes on to say, "is most opportune, and shows that the recent suggestion of Cardinal Moran for the formation of an organization to raise £2000 annually in Australia to aid the National cause is capable of achievement with the utmost ease. If we may be guided by the experience of the past year a very much larger sum than that suggested by His Eminence could be realized without any special effort." In another portion of the paper we

**MARRIAGE WITH THE UN-BAPTIZED.**  
(From the Tablet.)

The American papers have recently been very full of a famous marriage case which has been before the ecclesiastical tribunals of Rome for a considerable time. Last week they announced that it had been settled at last by a decision in favor of the validity of the second marriage of the Princess X. They were quite wrong, however, for the decision had been given the other way only a few days ago.

The facts are these: Some years ago a Catholic girl of the diocese of Baltimore became engaged to a Mr. Y. He was supposed to be a baptized Protestant, and a dispensation from the impediment "mixtae religionis" was, of course, necessary. Mr. Y. willingly agreed that the children of the marriage should be brought up Catholics, a dispensation was applied for and obtained, and the wedding took place with great splendor in Washington.

Some years later the domestic life of Mr. and Mrs. Y. was shattered. An appeal was made to the civil courts for a divorce, and a decree was issued, dissolving the marriage and giving both parties liberty to contract a new marriage. Mrs. Y., being a Catholic, very properly considered herself as still bound in the bond of wedlock until she learned one day that Mr. Y. had never been really baptized. She hunted up evidence of this, and the evidence was conclusive. She then proceeded to argue that, as she had been married to Mr. Y. on the supposition that he was a baptized Protestant, and as the dispensation from the impediment "mixtae religionis," supposed to have been granted on this hypothesis did not and could not cover her marriage with an unbaptized person, the marriage must have been null from the beginning. Apparently she took counsel on the subject and was assured that she was free to marry again.

Shortly after she made the acquaintance of Prince X. and an attachment sprang up between them. The Prince was duly informed of the tangled situation, but, to make a long story short, Prince X. and Mrs. Y. were married. Everything seems to have gone smoothly until the birth of an heir to the Prince, and then his next of kin declared that they would dispute the legitimacy of the offspring on the ground that the Prince's marriage with a divorcee during the lifetime of her husband was invalid in Italy in the eyes of the State as well as of the Church.

The Prince and the Princess determined to put their case before the Propaganda with full assurance that the Sacred Congregation would recognize the nullity of the first marriage. But the investigations of Propaganda led to an important discovery, to wit, that the dispensation granted for the first marriage was not in the eyes of the State as well as of the Church.

Both before and after the marriage of Mr. and Mrs. Y. it was the custom in the Baltimore archdiocese to apply for the dispensation from the impediment "disparitatis cultus" when one of the parties was not a Catholic. Propaganda therefore answered

**Montreal Wholesale Prices.**  
**HIGH PRICES RULE IN BUTTER MARKET.**  
Some unusual prices were paid on Saturday for butter on some of the boards in this district around Montreal. The expectation that the market would ease off and prices weaken was not realized, and it is evident that the competition for the British trade among Canadian exporters is keeping the prices up.

Prices paid were from 21c to 21c for unsalted, and 20c to 21c for salted. Local prices have been revised to meet the change, and 21c is being asked by dealers who supply the Montreal consumer.

**CHEESE MARKET QUIET BUT FIRM.**

At Brockville on Saturday, while less cheese than usual changed hands, the recent high price of 9c was well held. It is said that even at this price sellers were not anxious to do business.

The Belleville market was also steady at 9c; although a few small lots were turned over at 9c.

Many of the districts report showery weather, with pastures in excellent condition.

The local market is firm at about the same prices that have ruled for the last two or three days.

Jobbers report that very little cheese has been carried over from last week.

A cable advice from England states that there is a heavy consumptive demand for Canadian cheese coming principally from London. Owing to large shipments, it is said there is no danger of a shortage, and that is probably the reason for the unsatisfactory demand from importers, as reported by a local shipper.

Montreal prices are from 9c to 10c for Ontario, with an inclination towards the higher price, and 9c to 9c for Quebec.

**DULL CONDITION IN EGG MARKET—OLD EGG FILLERS RESPONSIBLE FOR SHRINKAGE.**

Dull conditions rule on the local egg market. The demand from buyers for the city trade is small, and the majority of requirements are for the "selected eggs" as packed by local jobbers. The shrinkage on straight stock is so great at present that local dealers are willing to pay 2c to 3c difference in the price rather than sell as boiling eggs some of the straight receipts that are coming in from the country.

We quote 15c to 16c for straight gathered stock; 18c to 19c for selects, and No. 1, 15c to 16c candled, and No. 2, 14c.

Shippers are making further complaints about the state of the fillers used in packing eggs. In many cases they are so damp and in such poor condition that it is not surprising that there is the great depreciation reported by the trade. The trouble is that the fillers are not renewed often enough. Owing to the carelessness with which the cases are left exposed to the weather, eggs are often brought to the city in a very bad condition, one dealer reporting a shrinkage of quite three dozen to the case, but while this is an extreme instance, there is no doubt that damp and old fillers are responsible in a great measure for the heavy loss suffered by dealers this season.
