PEOPLE SAID SHE HAD CONSUMPTION

Was in Bed for Three Months. Read how Mrs. T. G. Buck, Braebridge, Ont., was cured (and also her little boy) by the use of

DR. WOOD'S NORWAY PINE SYRUP

She writes: "I thought I would write and let you know the benefit I have received through the use of your Dr. Wood's Norway Pine Syrup. A few years ago I was so badly troubled with my lungs people said I had Consumption and that I would not live through the fall. I had two doctors attending me and they were very much alarmed about me. I was in bed three months and when I got up I could not walk, so had to go on my hands and knees for three weeks, and my limbs seemed of no use to me. I gave up all hopes of ever getting better when I happened to see in B.B.B. Almanac that Dr. Wood's Norway Pine Syrup was good for weak lungs. I thought I would try a bottle and by the time I had used it I was a lot better, so got more and it made a complete cure. My little boy was also troubled with weak lungs and it cured him. I keep it in the house all the time and would not be without it for anything." Price 25 cents at all dealers. Beware of imitations of Dr. Wood's Norway Pine Syrup. Ask for it and insist on getting the original. Put up in a yellow wrapper and three pine trees the trade mark.

(b) If the periods of reservation includes the months of June and July, five acres of the homestead must be broken during these months. Unless this requirement is complied with, the reservation may be withdrawn.

(c) Entry must be made within one month after the applicant reaches the age of eighteen years.

CEMENT FOR STABLE

How many bags of cement will it take to cement a horse stable 20 feet x 26 feet, also what proportions of cement, gravel and sand should be used? Man. READER.

Ans.—Cement is sold by the barrel usually, though handled in sacks, and the barrel is taken as the basis of measurement when estimating the amount of cement required. As you do not state whether it is a floor for the stable, or a foundation you desire an estimate for, it is difficult for us to advise you. If for a floor a layer of concrete two inches thick, laid on a good hard foundation, mixed in the proportion of one of cement to five of high-grade gravel, will be found sufficient. Laid this thickness and mixed in the proportions given, one barrel of cement will cover 120 square feet, hence four and a half barrels of cement would be required. If you refer to a foundation under your stable, you will have to furnish us with information as to the height and thickness of the proposed wall.

BEEF RING CHART

A number of readers have asked recently for a twenty member beef ring chart.

Ans.—The chart here given shows how the beef should be cut. To give each party, a boil and a roast it must be divided after the beef is cut down in halves. Cut across between numbers 7 and 12 leaving four ribs on the hind quarter. After laying the front quarter on the table for cutting up, cut off front shank No. 8; then cut from line B, making two pieces, numbers 10 and 9; then take off neck, No. 1; then take off roast No. 7—three ribs in it; roast No. 6, two ribs; roast No. 5, two ribs; then cut across the line to C, taking piece No. 4, boiling piece; then, No. 3, two ribs in it; leaving piece No. 2. After cutting up the two fore quarters, let down the hind quarter on the table, and cut from line D, leaving flank No. 4; then cut roast No. 12, three ribs in it; then follow along 13, 14, 15, 16; then cut across line E, rump roast No. 17; then cut off Nos. 18 and 19, leaving hind shank No. 20.

BEEF RING CHART.

This is a table by which the pieces are allotted:
