

The Famous Garden City Feeder

The only band-cutting and feeding device ever placed upon the market that actually feeds a threshing machine as it should be done

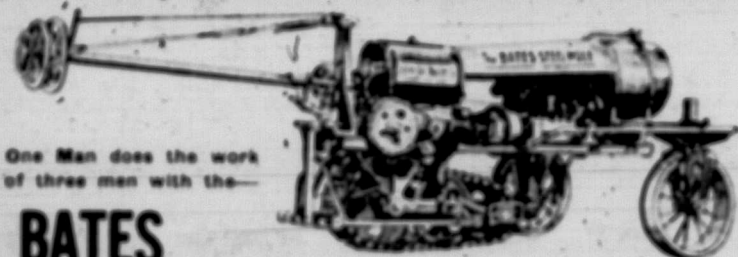

Now is the time to prepare for threshing; don't wait until harvest arrives, when everybody is overworked. You need a Garden City Feeder attached to your machine because it will make money for you, by feeding your separator so evenly that nine-tenths of the usual stops, break-downs and delays will not occur. It will prevent the troubles caused by careless, ignorant or mean pilfers. They may pile the grain in as fast as they please, or in any manner; the Garden City Feeder will deliver it to the separator in a constant and even flow; never too much; never too little, and every sheaf and first, thus securing the best possible work without any delays. Think what it would mean to you. No clogging; no overloaded straw racks or sieves; no clogged blower or broken belts; no cylinder tying out; no stops; no delays; just a steady run from morning till night, day after day, while the weather remains good. Your threshing done and your grain sold before winter.

Think it over. Satisfaction guaranteed or your money back.

Absolutely the Best Farm Tractor on the Market

One Man does the work of three men with the—

BATES STEEL MULE

The most critical crop and worst shortage of labor the country ever faced is upon us. "Worse bigger crops" is the cry. Machines must take the place of men—tractors that not only do more—quit more—save more—are more necessary than ever.

The Bates Steel Mule and one man will do more work every day than twelve horses and three men; over 4,000 farmers have proved it. Order yours at once for the coming harvest.

See this wonderful one-man tractor with the caterpillar tread at work at your nearest exhibition. WRITE NOW FOR FREE CATALOGUE TO—
