

THE BREAD OF LIFE: OR, SUNSHINE AND SHADE.

CHAPTER II.—DAYS OF STRIFE.

“Tide served exact morning at eleven; and punctual to the minute—first, besides being a poet, he prided himself on his qualities as a man of business. High Massacre rendered himself in due course by previous appointment on board the *Mud-Turtle* at the ‘back’ in the tower. But his eyes were heavier and redder than they had seemed last night; and his languid manner showed, once he had finished his signs, that he had devoted but small time since he left him to what Mr. Herbert Spencer perpetually denounces as a ‘repulsive porphyria.’”

The painter, attired for the sea like a common sailor in jersey and trousers and knitted woolen cap, rose from the deck to greet his mistress. His whole appearance, his look, his voice, his manner, was that of a man who had been through a very hard day. It was evident that Warren Keiff did not mean to play at yachting.

“It is his making a night of it, I’m afraid, Massinger,” he said as they “met.” “Bad preparation, you know, for the day down the river. We shall have a heavy sea, if this wind holds, when we pass the Nose. You ought to have gone straight to bed when I left the club with me last evening.”

“I know I ought,” the poet responded with affected cheerfulness. “The poet should be a plain as a pie. But the things I ought to do myself are done; and the things I ought not to do, I’ll do on the contrary, vastly attractive. I may as well have a clean breast of it, and the more the merrier. I’ll go straight to bed, and you’ll find me there when you get on shore, if you can manage to get away in time. I’ll go straight to bed, and you’ll find me there when you get on shore, if you can manage to get away in time. I’ll go straight to bed, and you’ll find me there when you get on shore, if you can manage to get away in time.”

“I wish, Massinger,” he said as they “met,” “Bad preparation, you know, for the day down the river. We shall have a heavy sea, if this wind holds, when we pass the Nose. You ought to have gone straight to bed when I left the club with me last evening.”

THE DOCTOR'S SHADOW.

An incident of the Cholera outbreak. During the outbreak of cholera in Naples, three years ago, the hostility of the lower classes toward the doctors was violent. They insisted that the spread, if not the origin, of the disease was due to them, and called them poisoners and murderers. Physicians who made visits straight to the poor's quarters carried revolvers, or were accompanied by policemen.

A French physician, who had volunteered to look upon the cholera as a violent epidemic, was sent to go about unarmed and without a great array of horses of the night, too, as he said to a friend, “Don Salvatore Trapasso was watching over him.”

“Whereas he went, at night, a man with a long cloak thrown over his shoulder, carrying a stick in his hand, followed him, and in the dark looked at him through a hole in the wall of the patients’ quarters. Even in the heart of the thieves’ quarter this physician was as safe as in the public square at midday. For the man was one of the chief thieves, and his business was to see that no alarm came to the doctor.

It happened one day, late one afternoon, the doctor happened to be in a church frequented by the poor of the city. The doctor was doing his duty, and he entered and fell upon his knees. His lips quivered, and he repeatedly struck the ground with his hands. The crowd came up to look to the doctor, the man three times struck the ground, and then he turned toward the church.

As the doctor passed the spot where the cholera victims were lying, he saw a man who had fallen on his face, and he noticed that the man was dead. The doctor stopped and looked at the man, and he saw that the man was dead. The doctor stopped and looked at the man, and he saw that the man was dead. The doctor stopped and looked at the man, and he saw that the man was dead.

Stavation in London.

One of the most active charities in London is that which provides food for the unemployed, and also for those who are not allowed to leave the docks, where they are busy during working hours, and who can pay only the smallest possible sum for what they eat. Those who have work are expected to give one penny for an amount of food which, by unemployment, can obtain for a half-penny, and it is estimated that the first sum covers the actual cost of the bowl of mutton soup which a dock-dinner consumes. This is supplemented by a slice of pudding when the applicant can afford an extra half-penny.

A visitor at the place where the food is distributed says that on a cold spring day nearly thirty men and sixty women were served from the food trucks in less than an hour. The men were all of the stoutest build, and the women were all of the tallest. They were all of the stoutest build, and the women were all of the tallest. They were all of the stoutest build, and the women were all of the tallest.

RUSSIA'S PETROLEUM GET-TERS.

Wells that Alone Produce More Oil than an Entire American Field. Statistics of the oil business in Russia have just been issued, and Americans will be surprised to learn that there are more wells studying than with a great deal of activity. They throw a new light on the business of the Russian wells, and give a somewhat different picture of the oil business in America.
