Don't Wake the Baby.

Did you know you could give medicine to your children while they were soundly sleeping? It is called Vapo-Creslene. You put some Creslene in the vaporizer, light the lamp, and place near the bed. The children quietly breathe in the vapor. There is nothing equal to it for whooping cough, croup, colds, cough, sore throat, and all other troubles of the throat and chest. It is economical, pleasant, safe.

Vapo-Creslene is sold by druggists everywhere. A Vapo-Creslene outfit, including the Vaporizer and Lamp, which should last a lifetime, and a bottle of Creslene, complete, \$1.50, extra supplies of Creslene 25 cents and 50 cents. Illustrated booklet, Vapo-Creslene physician's testimonials free upon request. Vapo-Creslene Co., 150 Fulton St., New York, U.S.A.

PLAYS AND PLAYERS.

Corinne, under the management of John R. Rogers, is to tour America in "Carmita."

Victor Maurel has retired from the operatic stage and will devote himself to teaching in Paris.

Guinea Baker, who plays the role of Angela in "Florodora," is a grandniece of Susan B. Anthony.

Kathryn Osterman has closed her vaudeville season and will not appear again for several months.

George Broadhurst has signed an agreement with Jacob Litt to write a new play for Willie Collier.

Scribner's Big Show has closed its season. Nat Willis and Ezra Kendall were the headliners of the organization.

HAVE YOU EVER STOPPED TO CONSIDER?

Have you ever stopped to consider the quality, composition and effects of the various foods you use? It is too extensive a subject to deal with in a short newspaper article. Take your dish of oatmeal porridge, and compare it with a dish of Malt Breakfast Food porridge, that tens of thousands are now using with the best results. What's the difference? Why a vast and important one as far as health is concerned. Your oatmeal is a blood heater and irritant, often causing skin eruptions and facial disfigurements, and it frequently deranges the stomach and digestive organs.

Malt Breakfast Food, so highly indorsed by physicians and food experts is a grain food entirely free from insoluble starch; it is adapted for young and old, the weak and strong. One package makes twenty-five meals. Try it and be happy. Grocers heartily recommend it.

The Hand in Health.

Let us shake hands with a man, and we will tell you something about his health. The firm, hearty handshake of a sincere man may be rather rough, so that one is taught he has a grip, but it indicates stamina. While denoting absence of tact and refinement, it points to physical strength. The fussy hand that returns no pressure belongs to the person who has no great strength of body or mind. The quick, nervous handshake of an excitable, nervous temperament, and its opposite, the nervous, passive one, belong to persons in ill health. The hand that threatens to collapse or give means fear. The feel of the hand called magnetic indicates health and kindness and a desire to help others. In many ways we may decide character by the hand as well as by the brain—London Doctor.

Women of Means and Social Standing Use the DIAMOND DYES.

Home dyeing is always a subject of interest to thrifty and economical women. It means scores of dollars saved to the family each year when women can re-color their faded and soiled dresses, skirts, blouses, jackets, capes, feathers, ribbons and suits for man and boys. If, in the past, you have saved for a few cents per pound your cast off garments to the ragman, save your goods and materials, and test the magical powers of the Diamond Dyes. In these popular dyes you can get the newest and most fashionable colors, and observing the simple directions, you can have a new dress, skirt, suit or overcoat at a cost of from ten to twenty cents. This dyeing and economical work is done by thousands of women of means and good disposition. Try the Diamond Dyes and you will be successful.

Why is a conundrum like a monkey? Because it is far-fetched and full of nonsense.

IMITATIONS abound, but insist upon getting the genuine "The D. & L." Menthol Plaster. "The D. & L." has stood the test of years. It cures. Its imitations are impotent. "The D. & L." is made by the well-known Davis & Lawrence Co., Ltd.

Why are sinners like corn and potatoes? Because they have eyes, yet see not, and ears, yet hear not.

To cure a cold in a night—use Vapo-Creslene. It has been used extensively during more than twenty-four years. All Druggists.

It is not necessary to act the fool in order to demonstrate that you are one.

Vapo-Creslene quickly cures colds, coughs, sore throat, whooping cough and croup.

FORCEFUL EXPRESSIONS.

The Power of Illustration in the Turn of a Phrase.

James Russell Lowell said, "There's a deal of solid kicking in the meekest looking mule." If the statement had been, "There's a good deal of obstinacy covered by apparent amiability," the remark might have passed without a moment's notice, but attached to such a figure as the poet used it will be difficult for the mind ever to get rid of it.

Mazzini says, "Labor is the divine law of our existence." This is little more than commonplace, but when he added, "Repose is desertion and suicide," the commonplace was transfigured into a memorable illustration.

A French writer said, "The really efficient laborer will be found not to crowd his day with work." That seems to be forgettable. When he adds, "He will saunter to his task surrounded by a wide halo of ease and leisure," the halo serves the purpose of an explanatory illustration.

President Garfield once said, "Nine times out of ten the best thing that can happen to a young man is to be tossed overboard and compelled to sink or swim for himself." The tossing overboard was the illustration. The sagacious president gave it significance and emphasis by personal reference, "In all my acquaintance I never knew a man to be drowned who was worth the saving."

When Lavater said, "Habit is altogether too arbitrary a master for me to submit to," it was the word "master" that constituted the memorable illustration.

Carlyle, a great master of metaphor, said truly: "No man lives without jostling and being jostled. In all ways he has to elbow himself through the world, giving and receiving offense." The doctrine of this sentence might easily have become a mere platitude, but it is fixed upon the memory by jostling and being jostled and the elbowing of oneself through the world. This illustration is the very making of the argument—Joseph Parker, D. D., in Homiletic Review.

SOME METALS.

Iridium, worth more than \$780 a pound, is the hardest metal known and is used to tip gold pens.

Lithium, worth more than \$1,100 a pound, is used only in medicine, its salts being valuable in rheumatic affections.

Tungsten, worth 80 cents a pound, is largely used in metallurgy and gives to steel qualities similar to those imparted by molybdenum.

Molybdenum, worth \$144 a pound, is used in metallurgy. Molybdenum steel possesses the rare quality of preserving its hardness even when heated to redness.

Selenium, which has the curious property of losing its resistance to the electric current under the influence of light, is used in the telegraph and is worth \$22 a pound.

Uranium, worth \$80 a pound, is used in the glass and porcelain industries. It has been found that uranium carbide is superior to nickel or tungsten in the manufacture of high grade steel.

Palladium, which has the smallest coefficient of dilatation, is used for the mounting of astronomical instruments. The standard meter of France is made of palladium. The pure metal costs \$4.82 a pound.

Vanadium oxidizes in air with great difficulty, melts at 2,000 degrees and becomes red-hot in hydrogen. Neither hydrochloric acid nor nitric acid attacks it. It costs \$502 a pound and is used in coloring glass and in making indelible inks.

Italy's Marriage Brokers.

Marriage brokers are a regular institution in Italy. In Genoa there are several marriage brokers who have pocket-books filled with the names of the marriageable girls of the different classes, with notes of their figures, personal attractions, fortune and other circumstances. These brokers go about endeavoring to arrange matrimonial alliances in the same offhand mercantile manner which they would bring to bear upon a purely business transaction, and when they succeed they get a commission of 2 or 3 per cent upon the dowry, with such extras of bonuses as may be voluntarily bestowed by the party.

Animals in Turkey.

In Turkey the partridge is detested because once it betrays the prophet to his enemies, and its legs are red because they were dipped in the blood of Hassan. If a man kills a panther, he is imprisoned for twenty-four hours and then is handsomely rewarded. The crane is respected, and it is a crime to kill it.

The Crocodile.

The crocodile's lower jaw is not socketed in the skull, as is the case with other animals, but the skull is socketed in the jaw, so that the animal can lift the upper part of its head as upon a hinge and so capture without going to the trouble of getting upon its legs.

What He Wanted to Say.

"Prisoner at the bar," said the judge, "is there anything you wish to say before sentence is passed on you?" The prisoner looked wisely toward the door and remarked that he would like to say "Good evening," if it would be agreeable to the company.

Not a Sensible Man.

Daughter—Oh, mamma, I do wish I were pretty!

Mother—You needn't, dear. Sensible men think very little about beauty.

Daughter—But it isn't sensible men I'm thinking about, mamma; it's Charles!

THE Immense Pines of Canada furnish the basis for that peerless cough and cold remedy, Piny-Balsam. It cures quickly and certainly. Of all druggists, 25c. Made by proprietors of Perry Davis' Pain-Killer.

WHEN DANGER THREATEN YOU BE FULLY ARMED.

Paine's Celery Compound Will Enable You to Vanquish Every foe.

When dangers threaten you common sense, care and attention should direct your course.

If you are a victim of disease and looking for restoration to health, as soon think of stopping the raging of the boisterous ocean by a wave of the hand as of getting rid of your troubles by the use of any of the various remedies in our land at the present time. Medical investigations, tests and proofs of cures point to one infallible disease banisher—Paine's Celery Compound, the only medicine that goes directly to the very root of your trouble. It nourishes nerves and blood, cures dyspepsia, neuralgia, rheumatism, liver complaints, kidney troubles, tones up the system and makes the weak strong.

Mrs. T. O. Smith, Victoria, B. C., says: "I would prove an ungrateful woman if I refrained from doing justice to Paine's Celery Compound. Having suffered for many years from chronic constipation and general debility, I at last got low. I was given up to die by the doctors. Just at this time I was recommended Paine's Celery Compound by a friend, and in two days found some relief. After using the medicine for three months I am as well as ever before, and enjoy good health."

Amity Between Horses.

When the Duke of Wellington was fighting in Spain, there were two horses which had always drawn the same gun, side by side, in many battles. At last one was killed, and the other, on having his food brought as usual, refused to eat, but turned his head around to look for his old friend, and neighed many times as if to call him. All care was in vain. There were other horses near him, but he would not notice them, and he soon afterward died, not having once tasted food since his former companion was killed.—Our Dumb Animals.

STRETCH OUT.

Many a man is unable to stretch his arms or legs because of rheumatism. There is no excuse for this state of affairs. Dr. Hall's Rheumatic Cure will remove the disease in short order. In the case of Henry Hasler, Plinton, Ont., two bottles made him as good as ever. He had suffered from muscular rheumatism in his arms and legs for two months and was perfectly helpless. This great blood purifier is put up in bottles containing 50 cents at all drug stores or The Dr. Hall Medicine Co., Kingston, Ont.

His Reward.

"You remember Blacky, who bought a house on each side of his own dwelling so he could choose his own neighbors?"

"Yes. What of him?"

"Well, he fitted up those houses elegantly and rented them to first class tenants, and they won't associate with him at all because he's merely a landlord."

Out of the Shadow.

The discouragement, the despair of ill-health, out into the noonday glory of health, vigor and strength. Are you wishing to replace weakness by strength, despondency by hope and expectation, pale cheeks and listless eyes, by the rose's bloom and sparkling eyes. If you will make rich, red blood, your nerves will grow strong, old time vigor will return and with it endurance that will enable you to live, active, energetic and successful in life. Remember the name, Ferrozone. Sold by McCall & Co.

HOW THE CHINESE GET RAIN

Peculiar Practices in Vogue in the Celestial Kingdom.

It is one of the peculiarities of the Chinese that, while they have developed elaborate philosophies, none of them has led to any confidence in the uniformity of nature. Neither the people nor their rulers have any fixed opinion as to the causes of rainfall. The plan in some provinces when the need of a rain is felt is to borrow a god from a neighboring district and petition him for the desired rain. If his answer is satisfactory, he is returned to his home with every mark of honor; otherwise he may be put out in the sun as a hint to wake up and do his duty. A bunch of willow is usually thrust into his hand, as willow is sensitive to moisture.

Another plan in extensive use is the building of special temples in which are wells containing several iron tablets. When there is a scarcity of rain, a messenger starts out with a tablet marked with the date of the journey and the name of the district making the petition. Arriving at another city, he pays a sum of money and is allowed to draw a new tablet from the well, throwing in his own by way of exchange. On the return journey he is supposed to eat only bran and travel at top speed day and night. Sometimes he passes through districts as gently in need of rain as his own. Then the people in these places way-lay him and, temporarily borrowing his tablet, get the rain intended for another place.

Prayers are usually made in the fifth and sixth months when the rainfall is always due, and a limit of ten days is set for their effective operation. Under such conditions rain usually falls during the prescribed time. When the prayers are in progress, the umbrellas, among other objects, comes under the ban. In some provinces foreigners have been mobbed for carrying this harmless article at that time.

DEATH BY ARSENIC.

The Way This Poison Acts Upon the Human System.

When a single dose of arsenic in sufficient quantity to be felt has been taken, colicky pains, bowel disorder and perhaps nausea result. In the course of an hour after a poisonous dose has been taken an intense burning pain is felt in the esophagus and stomach. This spreads to the entire anterior portion of the lower part of the trunk. A sense of constriction at the throat and an acrid, metallic taste accompany the pain. Then vomiting and relaxation of the bowels begin. As the case progresses the symptoms increase in intensity. Then comes a third stage when the victim will not allow, although it apparently increases the stomach disturbance. The victim groans and writhes.

Now he implores the doctor to save him. Then he begs to be killed and put out of pain. The extremities become icy. The pulse is small, feeble and frequent, and the breathing is labored and embarrassed and painful because of abdominal tenderness. The surface of the body becomes dark and of that bluish color that medical men call cyanosed. Violent cramps add their tortures, exhaustion becomes collapse, convulsions or coma ensues, and death ends the agony. This torture lasts sometimes from five to twenty hours.

In some cases these symptoms occur, but in a modified form, and the doctor will apparently get the better of the disease. The remission will be but for a day or two. Then the abdomen will swell, and icy coldness will pervade the frame. Shivering will become pronounced trembling, then cramps, convulsions and death.

Birds Are Like Human Beings.

Canaries, like human beings, vary very much in character, some cocks being so indifferent and idle that they will let the hen do all the work of building and rearing, while they themselves sit and plume their feathers. Others, again, are perfect gentlemen in their manners, waiting on the hen with a quiet courtesy and seeing that all she requires is at once brought to hand. Again, the hens vary in disposition, some being behavior in a quiet, modest way, attending to their young ones with regularity, while others are in a constant state of chatter with their husbands, pecking and arguing with them every time they go near. Thus we see that these little birds have their traits and domestic quarrels, not unlike ourselves.

To Cure the Stammerer.

It is said that stammerers rarely if ever show any impediment of speech when speaking in whispers. On this fact a method of treatment has been advocated, which is as follows: For the first ten days speaking is prohibited. This will allow rest to the voice and constitutes the preliminary stage of treatment. During the next ten days speaking is permissible in the whispering voice, and in the course of the next fifteen days the ordinary conversational tone may be gradually employed.

CATARRH.

Called an American disease, is cured by an American medicine, originated and prepared in the most catarrhal of American countries.

That medicine is Hood's Sarsaparilla. It cures radically and permanently, in that it removes the cause, cleansing the blood of scrofulous and all the impurities. It overcomes all the effects of catarrh, too, and builds up the whole system.

Persistence becomes a decided annoyance when it assumes a chronic form.
