REMAINS A TORY BUT HE WILL VOTE FOR RECIPROCITY

Dr. Ralston, Hamilton, Says Party Has Gone Back on Principles.

The Loyalty Cry is a Pure Fake

Were Reciprocity Defeated There Might Be Talk of Annexation.

Hamilton, Sept. 11. - One of th many lifelong Conservatives in this part of the country who will support the Liberal Government and recipro-city in the approaching election is Dr. Ralston, 85 Gore street, a well-known physician. The doctor owns a large apefruit form in Cuba. The Ameri can government imposes a duty on grapefruit from Cuba, so that Dr. Ralston figures that as berries are to be admitted free to Canada in the ear-ly months, when grapefruit is in de-

"Sir Wilfrid is a Better Man To-day Than He Has Ever Been"-Sir Lomer Gouin.

Quebec, Sept. 11-"Sir Wilfrid is a better man today than he ever has been," said Sir Lomer Gouin, premier of Quebec, at Mon-treal. Sir Lomer expressed the opinion that the Liberal party would be returned by a large majority, "Somebody has made predictions that the Liberals would lose a few seats in Quebec, but I can't see it. I can see, instead, where they will gain a few. The prospects all over are

very bright. And why should they not be?" he asked. "Sir Wilfrid is a better man today than he ever has been. He has the experience, he has the confidence of the people and look how splendidly he is physically. Moreover, he thinks of nothing but the welfare of his country. He never thinks of himself at all. He works unselfishly and he is like a young man in his capacity for work. Oh, yes, I think you will find that the people of the country will return him to power as long as his country has need of him."

ONTARIO FARMERS ARE HOLDING THEIR BARLEY

Brewers Unable to Secure Winter Stock Even Though They Have Increased Price to Eighty Cents. -Farmers Waiting for Reciprocity.

Toronto, Sept. 11-A fact has developed in connection with the brewing and malting industry of this province, which affords a significant index to the attitude of a large body of farmers toward the question of reciprocity. A prominent malster states that at this time of year it is usual for the brewers and malsters to lay in their winter stock of barley. The send out their travellers, who visit the various barley-growing districts, and purchase their necessary supplies. By this time the crop has been harvested and most of it threshed. Under ordinary circumstances the major part of the purchases would now have been made, but this year, strange to relate, there is practically no barley offering for sale. The reason is a very simple one. The farmers are convinced that if reciprocity carries there will be a marked increase in the value of their barley and almost

to a man they are holding their grain until after Sept. 21. "At this time last year," continued the speaker, "we were buying parley at about 65 cents per bushel. We have this year advanced the price to 80 cents in the hope of inducing holders to sell, but without appreciable effect. There have been two short crops in the States and as a consequence the ruling price for a good quality of barley in that country is \$1.15. This difference of 35 cents between the Canadian and American price is about represented by the duty and freight, and the Canadian farmer not unnaturally imagines that his barley, which is generally of a higher grade than the American, will command a higher rate if he has access to

the American market."
