glun

remarkable feats of salvage heen performed within recent but perhaps the most thrilling raising of the great Italian in Leonardo da Vinei, which and by enemy action in the har-of Taranto in 1916. The vessel d over and came to rest in mud sea bottom, from which not biggest crane could life her.

in and with the electric power mished, holes were drilled to he rivets which would hold the or the great rents in the

he power-station to work the essors, and immediately the ad rendered a number of coments watertight, the salvage men to pump compressed air into the gradually forcing out the vers next cut away the turnnels, which were stuck in

tiously, but at last the vessel, hy the compressed air, rose surface. Still turned upside e was towed to dry dock specially prepared channel nigh the sea bed. After redry dock, she was taken into and by allowing the water to the compartments on the d side, the leviathan turned ide up. The work occupied four half years, and cost £135,000. incident as thrilling in every rewas the salving of the K13, a which went down in the

rescue-party managed to mbers of the crew alive until of the submarine was raised e water and a hole was burnnlates through which the were dragged to safety. men were still alive, and ve hours they had been cona prison that might have

mer had the rescue work eted than the wires holdessel gave way, and the K13 own again. By means of comir the submarine was raised

of the most novel and ingeninstances of salvage work was ided at Folkestone some time vessel caught fire, and was deliberately close to the quay med over on her side, and the ifficulty that presented itself in vage operations was the quesof how to get her righted. This was overcome by attaching o five large locomotives on lese, when all was ready,

the ship over. nother occasion. a sunken vas cut in two while under aised to the surface, fitted ew bulkheads, and brought be fitted together again. had not been for the help ed by such inventions as diving and tanks, in which divers can with safety under water; telephones; oxy-acetylene which burn even in water, and the diver to cut through a vessides; lifting tugs and floating lifting magnets, and innumerdety devices, the work of raisfive hundred odd vessels have been salved during and

the war might never have been
