

THREE MILES FROM POST OFFICE AND BUSINESS
PORTION OF THE CITY.

ACREAGE

MORE TRAFFIC PASSES THIS POINT THAN ANY
OTHER ROAD LEADING INTO CALGARY.

DO NOT BUY ACREAGE until you have satisfied yourself that what your selection has been is the best that is being offered. There is a very large and varied selection to choose from.

What is it that fixes the prices of property? The demand.

What is it that causes the demand? The advantages that one property has above another. What advantages has this property above others that are being offered.

1st There is no other property offering that is first class land, within the same radius of the postoffice, at the price.

2nd. There is none on this highway of traffic to the city that is being offered in acreage, that is as near the city limits.

3rd. The supply of acreage in the vicinity of this property is very limited.

4th. The way in which this property is surveyed allows the purchaser the advantage of laying same out in town lots without any additional expense or loss of property.

5th. More traffic passes this property than on any other road leading into the city. It is the main highway to the whole north.

A greater profit will be had from purchasers of this property, in a shorter time, than from any other that has been brought before the public for a considerable time. Lots adjoining this property are now selling at from \$45 to \$60 each.

There is none of our property that is more than a mile from a good school and none more than three miles from city schools. It is situated on the banks of the only spring lake that is anywhere near Calgary, and from movements of other lands in this vicinity, it will be but a very short time till this will be made one of the beauty spots of our city. The telephone is on the property now. First-class water can be had at 30 feet deep.

A beautiful view can be had of the whole surrounding country from any part of the acreage that we offer.

Our price is \$175 per acre, with 1-4 cash, balance over two years.

IF YOU WANT A HOUSE AND HAVE
NOT BEEN ABLE TO FIND WHAT YOU
WOULD LIKE, LET US BUILD YOU ONE.

Wage-Workers' Symposium

(Continued on page 10.)

Increased membership of nearly 1000. The federation has issued 102 charters to newly formed local unions directly affiliated, as against 52 charters for the corresponding five months of last year. The affiliated international unions report the issuance of 149 charters within the last five months.

Railway Brotherhood and A. F. & L.

There is now a quiet movement on foot among all the railway brotherhoods to become a part of the American Federation of Labor. The railway brotherhoods have always been looked upon as very conservative organizations, but the fact is becoming apparent that the railway organizations and all their conservatism are looked upon as inimical to the interests of the railway corporations and the manner in which petitions from various brotherhoods have been recently spurned by the railway magnates is opening the eyes of the membership to the fact that the solidarity of labor must be brought about in the very near future if victories are to be won from the employers—John M. O'Call.

The Belcourt Amendment

Senator Belcourt's proposed amendment to the criminal code, making criminals out of international trade unionists, was too raw even for the Ottawa Free Press, a federal government organ. After generally condemning the Belcourt proposal the Free Press observes: "It is unfair to the class as professional agitators all head-quarters representatives of the United States unions with which Canadian unions are affiliated, who may come to Canada to assist in the organization of our unions. The experience of the Free Press with these men is that they are anything but 'agitators.' They come here almost invariably in the role of peacemaker and as a rule they are successful. They have frequently been able to avert trouble."

Population of Canada.
The estimated population of Canada at the present time is 7,000,000, an increase of 33 per cent in ten years. With the increase has come increased responsibilities, gigantic industrial combines, and all that goes with the "development" of a country. The same forces and conditions prevailing in the older countries are at work, and the policy of emigration and immigration so far from solving the unemployment problem, has merely transferred the scene of its being and ultimate solution. In the new hope, activities and determination of the stuff that makes pioneers lies the triumph of Labor on this western continent. The "final struggle for political supremacy" might as well be held in Canada as any place else, so let them all come.

Unions and Politics

Wage-workers who still believe in unions, as unions, should go into politics might read profitably what the official paper of Seattle's central body has to say. Considering the United Record: "With more than 18,000 members of organized labor in Seattle, the vote cast for the 'United Labor' candidate looks like a rebuke to those members who would drag the unions into politics." Unionists the continent over are slowly learning that the working class political and industrial organizations must be conducted separately to prove

successful. This for the reason that economically the interests of the workers conflict, but politically their interests are identical. Hence in the latter organization only can the workers internationally unite.

Opposed Belcourt Bill

Messrs. Wm. Gockling, president, Toronto; Gustave Franco, vice president, Montreal; and P. M. Draper, secretary-treasurer, Ottawa, representing the executive of the Dominion Trades and Labor Congress; Mr. J. J. Donohue and J. H. Barnett, Toronto; J. A. Flett, Hamilton; John Tweed, London, representing the 5,000 members of the Brotherhood of Carpenters; J. B. McLachlan, Springfield, N.S., representing a great many members of the United Mine Workers of the Maritime provinces, and Mr. Campbell, Toronto, third vice-president of the railway telegraphers, were at Ottawa on April 14, to oppose the Belcourt bill in the Dominion Senate, by Senator Belcourt of Ottawa, and which concerns international unionists as it aims at preventing Americans or foreigners in any way directing strikes or troubles in Canada. When it came to a show down, however, Senator Belcourt never even moved for a second reading of his previous amendment.

The Cigar-Makers' Union

The following are branches, officers and addresses of the International Cigar-Makers' Union in Canada:
21, John Dampblon, room 106, 88 Church street, Toronto, Ont.
55, P. Hough, 190 Duke street, Hamilton, Ont.
58, A. Garlepy, 230 Ave. Hotel de Ville, Montreal.
50, F. Mathew, 75 Greenwich street, box 165, Brantford, Ont.
140, Leo T. Coyle, 2 Court street, St. Catharines, Ont.
214, J. Lovell Smith, 2515 First St., Victoria, B.C.
278, Wm. Heslop, 52 Blackfriars St., London, Ont.
R. Schriber, 134 Fullerton street, London, Ont.
340, J. J. Donovan, 69 St. Moore St., St. John, N.B.
357, John P. Feuser, Mainland Cigar Co., Vancouver, B.C.
423, J. C. Goesslin, 59 Marquette St., Sherbrooke, Quebec.
378, O. J. Olson, 730 12th St. Brandon, Man.
411, J. H. A. Fortier, box 36, Brockville, Ont.
414, W. B. Rose, 258 Manitoba Ave., Winnipeg, Man.
420, J. Pearce, box 154, 20 Regent St., St. Thomas, Ont.
422, S. Welheuser, 150 E. King St., Perth, Ont.
424, James Hagarty, 139 Center St., Stratford, Ont.
423, W. H. Menchall, Nelson, B.C.
H. S. Pike, box 756, Nelson, B.C.
461, Francis H. Bruce, box 912, Edmonton, Alta.
465, M. Walsh, 1 St. James St., Quebec.
466, Herman Knudson, box 613, New Westminster, B.C.

Marx on Strikes

At the same time, and quite apart from the general servitude involved in the wage system, the working class ought not to exaggerate to themselves the ultimate working of these everyday struggles. They ought not to forget that they are fighting with effects, but not with the causes of those effects; that they are retarding the downward movement but not changing its direction; that they are applying palliatives, not curing the malady. They ought, therefore, not to be exclusively absorbed in these unavoidable guerrilla fights incessantly springing up from the ever-ceasing encroachments of capital or changes of the market. They ought to understand that, with all the miseries that it imposes upon them, the present system simultaneously engenders the material conditions and the social forms necessary for an economical reconstruction of society. Instead of the conservative "A fair day's wages for a fair day's work," they ought to inscribe on their banner the revolutionary watchword, "Abolition of the wage system."—Karl Marx in 1866.

get that they are fighting with effects, but not with the causes of those effects; that they are retarding the downward movement but not changing its direction; that they are applying palliatives, not curing the malady. They ought, therefore, not to be exclusively absorbed in these unavoidable guerrilla fights incessantly springing up from the ever-ceasing encroachments of capital or changes of the market. They ought to understand that, with all the miseries that it imposes upon them, the present system simultaneously engenders the material conditions and the social forms necessary for an economical reconstruction of society. Instead of the conservative "A fair day's wages for a fair day's work," they ought to inscribe on their banner the revolutionary watchword, "Abolition of the wage system."—Karl Marx in 1866.

Using Purgatives INJURES HEALTH
What You Need in Spring is a Blood Building Tonic
A spring medicine is an actual necessity to most people. Nature demands it as an aid in carrying off the impurities that have accumulated in the blood during the indoor life of winter. But unfortunately thousands of people who do recognize the necessity of a spring medicine do not know what is best to take and do themselves with harsh, gripping purgatives. This is a serious mistake. Ask any doctor and he will tell you that the use of purgative medicine weakens the system but does not cure disease. In the spring the system needs building up—purgatives cannot do this—they weaken you still more. The blood should be made rich, red and pure, and only a tonic medicine can do this. The best blood building, nerve restoring tonic medical science has yet discovered is Dr. Williams' Pink Pills. Every dose of this medicine actually makes new, rich blood. This new blood strengthens every organ, every nerve and every part of the body. This is why Dr. Williams' Pink Pills cure headaches and backaches, rheumatism and neuralgia, banish pimples and eruptions, and give a glow of health to the most sallow skin. Men, women and growing boys and girls who take Dr. Williams' Pink Pills eat well, sleep well and feel bright, active and strong. If you need a medicine this spring—and most likely you do—try this great reviving tonic, and see the new life, new health and new strength it will put into you.

RADIUM HAS NEW RIVAL
Active Polonium Has Wonderful Properties and Costs \$4,450,000 Ounce (Brooklyn Eagle).
With London quotations upon radium recently at \$390,000 an ounce the nonscientific observer of things scientific is absolutely overwhelmed with awe when he is informed that polonium another radioactive "emanation," is 5,000 times more rare than radium, and consequently at least that number of times more valuable. It was Mme. Curie, who discovered radium, who isolated polonium from radium. This was in 1898, and the name was suggested as an honor to the Polish home of Mme. Curie.

Since the announcement of the discovery of the so-called X-rays the public has grown accustomed to scientific wonders made known from time to time by the Paris experts. The phenomena and the different kinds of rays given out by substance have been discussed by such scientists as Sir William Ramsay, and it was at a recent dinner given in his honor at the Authors' Club in London that he talked very entertainingly of the wonderful properties of the element and its strange power.

It was the most concentrated form of energy known, he said, but that it was not so concentrated as all that. One could say that there had been things favorable to that suggestion. Within the last few years scientists have been paying special attention to many of the rare metals, and tungsten, molybdenum, vanadium, tantalum, boron, silicon, titanium and chromium are some of the names given to valuable additions to the minerals used in manufacture nowadays. Uranium, too, is a word in the scientist's mouth these days, for it was from uranium that pitchblende was secured, and from pitchblende came radium. Uranium mines, then, are eagerly being

sought the world over these days. The pitchblende necessary to produce three milligrams of polonium, according to one authority, is 15 tons.

It now assumed that there are three different kinds of rays given out by radium. The rays that can be kept in a glass tube easily are known as the Alpha rays. Then come a second kind known as the Beta rays, which are able to pass through the tube, and are also known as cathode rays. The third, Gamma rays, are the most penetrating and can pass through non-transparent substances, such as six inches of lead.

Austria appears to have practically a monopoly in the production of radium. Uranium, from wherever it is found the world over, is sent there to be treated for the pitchblende it contains, which, in turn, is rid of the radium it holds. The sale of radium is controlled by the Austrian government, the experts of the Vienna Physical Institute have found a comparatively satisfactory way of handling it.

What is sold, however, is not pure radium, for that, the scientists say, cannot be found. But what is sold as radium is radium barium chloride in three different grades of strength. Large scale there is no record of any sale being made that necessitated the use of postoffice or express office for its transportation. In every case where a sale has been made it has been made personally to the buyer or a representative sent expressly to Vienna for that purpose. The price per ounce, too, is subject largely to the quality of the substance, the sum of \$380,000 per ounce being only comparative, some sales having been made at the rate of \$2,375,000 per ounce.

ZANGWILL ON ZIONISM.

Advices Immigration to the United States Rather Than to Turkey.

London, April 21.—Israel Zangwill, writing on the Jewish problem in the Fortnightly Review, finds Zionism, confined as it is to the quest of a home in Palestine, impossible, and suggests that the solution of the settlement question, if immigration on a large scale is to be adopted, will be found rather in America than in Turkey.

Mr. Zangwill, who is a former Zionist worker and a leader of the Jewish Territorial Organization, does not write in very hopeful vein of the prospects of the "Jewish Palestine" (Jewish Territorial Organization) in its efforts to found a settlement in any country in which the conditions are favorable. With regard to Mesopotamia, he is convinced that should the Turkish grand vizier favor a Jewish autonomous settlement in that country, Zionists would unite with territorialists as cheerfully as anti-Zionists with Zionists.

Turkey May Cease Alliance.
"But," he continues, "nations are not always guided by economic advantages, and it is always possible that Turkey will refuse the proposed Jewish alliance."

"If the Zionists," says Mr. Zangwill, "insist on Palestine or nothing, it will probably be nothing." He then refers to the work of the "Jews," forecasting the possibility of the fallure of the Zionist and territorial efforts alike, began three years ago to divert the stream of Jewish emigration which congested New York and the eastern cities of the United States toward the half populated regions west of the Mississippi.

Future of the Jews.
"If the only future of the Jews is peaceful citizenship as a religious minority," says Mr. Zangwill, "it is better they should become more Americans than Ottomans."

It is, therefore, not unlikely that the work of diverting Jewish emigration to the less populous districts of America, heretofore a subsidiary undertaking of the "Jews," will be transformed into its main activity.

A Hint to Young Mothers

Don't walk up and down the floor with a cross, restless child. Nothing can be more demoralizing to the little one and it is a serious tax upon the mother's strength and nerves. When a child is peevish and cross there is probably some little derangement of the stomach or bowels, and a dose of Baby's Own Tablets will remove the cause of the trouble and enable the little one to sleep soundly. Mrs. W. Bouffard, Poplar, Que., says: "I have found Baby's Own Tablets superior to all other remedies for curing constipation and making teething easy. They also promote 'bedfast' sleep, and I recommend them to other mothers." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

If you can fool half the people half the time that's enough. Don't be a hog, even if pork is high.

Best Buy on First Street West

We are the owners and can deliver 80 feet on First street west, by 100 feet deep, next to lane with spur track, opposite Underwood Block. Price for a few days \$20,500. \$5,500 cash, \$2,750 in three months, \$2,750 in six months, balance one and two years.

OVANS BROS & CO.

2 ALBERTA BLOCK. PHONE 222. Opposite Alberta Hotel.

To Homeseekers

Cheapest Acreage

IN

East Calgary

THIS ACREAGE IS LEVEL, THE SOIL IS THE VERY BEST AND IT IS ALL FENCED IN. ALL OF THIS HAS BEEN CULTIVATED. WE STILL HAVE (50) ACRES FOR SALE IN BLOCKS TO SUIT PURCHASERS. PRICE \$150 PER ACRE. ADJOINING ACREAGE IS SELLING AT \$250.

A FORTUNE HERE ---

For the Man Who is Quick

528 ACRES \$200.00 PER ACRE 528 ACRES

This is without a doubt the very best, close in, sub-dividing property obtainable within the 3 miles radius that can be bought at the above price. Almost every acre of this splendidly located land can be used for sub-dividing purposes. 400 acres of this lies due east of what is known as Nose Hill, and immediately north of La Grange, where 25 ft. lots are selling from \$50 upward. This land, situated as it is on a sort of plateau, commands an excellent view of the city and surrounding country, and would make an ideal spot for a suburban house. The other 128 acres which borders on Nose Creek and N. Balmoral, is meadow land, and cannot be excelled for garden purposes. On this property is built a \$2,500 house, also out-buildings and everything necessary for an up-to-date dairy. The terms on the above property is 1-3 cash and balance to cover five years. We will consider selling in parcels from 180 acres up. We are safe in saying that this property will double in value in 3 years time. Come while the chance is open and make money.

The Calgary Realty Co.,

EXCLUSIVE AGENTS. ROOM 2 LINEHAM BLOCK.

ELLSMERE

Is in the southern part of the Hill Division adjoining Pleasant Heights. It lies high and level. The lots measure 25 x 128 feet to a 20 foot lane, and front on full 66 foot streets. There were 50 of these lots. Ten have already been sold and the balance will not remain long on the market at the price and terms.
