SEVEN YEARS

Then She Took "Fruit-a-tives" and Is Now Well.

Arnprior, Ont., Nov. 27, 1908.

I was an invalid for seven years from fearful Womb Trouble. I had falling womb, with constant pain in the back and front of my body and all down my legs. There was a heavy discharge and this made me weak, sleepless, restless and miserable. Often I was obliged to be in bed for a month at a time. I was treated by several doctors, but their treatment did me no permanent good.

Eastern capitalists promise to establish a big steel tipple industry at Fernie.

The provincial government is considering the desirability of establishing a land registry office at Revelstoke.

DRAWNS IN BROTHER'S SIGHT

Frederick Ash Loses His Life By Accident at Rivers Inlet
Cannery.

With his brother within but a few feet of where he sank, Frederick Ash, employed as fisherman by the Kildala Cannery, Rivers Inlet, was drowned about hoon on August 5. The report of the man's death was received yesterday by Superintendent Hussey, of the Provincial police department. The two brothers, Fred and James Ash, were out in their fishing boat and were lying in Big Bay. James left in a small boat to go along the net, leaving the other behind to gook dinner. When but a few feet away from the boat, James heard a shout and the sound of a splash. Looking around he saw his brother sink beneath the water. He rowed back as fast as he could, but Fred never rose to the surface. The report to Superintendent Hussey states that evidently Fred was leaning over the edge of the boat to wash some utensils when he fell forward into the water. The deceased's home was in Vancouver, where he lived on Alexander street.

PROVINCIAL NEWS TOLD IN FEW

The new Great West Life Insurance Company building at Winnipeg is being constructed throughout of Kootenay granite.

The B. C. Electric Railway Co. is preparing to being the actual laying of steel on the first section of its Chil-ilwack line next Monday.

William Burrows, the logger who was run over by a C. P. R. train in Vancouver Thursday, both legs being out off, died of his injuries at the general hospital twenty hours later.

The highest wedding ever celebrated in Vancouver took place a few days ago when Mr. Edward Langor and Miss Iona Fuller were married in the cupola of the new Dominion Trust skyscraper, 165 feet above the ground. The bride is a daughter of Edward Fuller, the foreman carpenter on the building, her husband being one of the carpenters employed in the construction brigade.

The highest wedding ever celebrator in Vancouver took place a few days so when Mr. Edward Langor end Miss Ions Fuller were minded Miss Ions Fuller with the cupols of the cupols of

PLENTY OF FREE GOLD.

important Find Made in the Old Enterprise Claim of the Rossland Camp.

Specimens that glisten and gleam with the reflection of free gold in nugget and granular forms are baing shown around Rossland by Ed Tergick and R. Lelich. They are very rich specimens and are from the Enterprise

claim, located in the Norway mountain section, which Messrs. Terzick and Lelich own and which they have energetically developed for the past five years. They have lots of ore in sight and a find as rich as they have made would have caused a stamped of prospectors in the early daysof the camp. The Enterprise is an old claim and has been staked and restaked and considerable work has been done upon it in former years. The ledge is from two inches to four feet in width and is richest where it is narrowest. The ore carries a considerable quantity of free gold besides galens. Nine tons of ore has been sacked and considerable remains on the dump. The sacked ore is being hauled to the Columbia & Western rallway and is to be shipped to the Consolidated smelter at Trail. In order to ship their ore the owners had to build a mile of wagon road to connect with the government road built to the Cascade mine. The Enterprise is situated about five miles from the Columbia & Western rail-

meon of a Popular Nanaimo Couple.

There is an element of peculiar pathos attached to the death at the Nanaimo General Hospital on Wednesday morning of Mrs. Marian Hodgson, at the early age of twenty-one, she having been an inmate of that institution only since the previous Saturday, when an operation was decided to be necessary. It was performed successfully, but the patient falled to rally from the sheek to her nervous system. Mrs. Hodgsen was a nailye of the district, and on the 14th ultimo-less than a month from the date of her death-had been united in marriage to Herbert Hodgson, son of Mayor Hodgson, of the Coal City. They reutrined from their wedding tour only three days hefore the bride was seized with her fatal illness.

TAR AND FEATHERS PROPOSED

A few months ago, I was persuaded to try "Fruit-a-tives." I took several boxes, and from the outset of this persentent I was better, the Constipation was cured, and the discharge lessened. I took, for the paleness, several bottles of the Iron Mixture as recommended in the "Fruit-a-tives" in look, but I feel that it was "Fruit-a-tives" most book, but I feel that it was "Fruit-a-tives" in look, but I feel that it

last Sunday, endeavored to end her troubles by shooting herself. The bullet lodged in her shoulder and serious results are anticipated, as blood poissoning has set in.

Okanagan College has been forging ahead very rapidly of late, and a new sit-5000 building for the accommodation of lady students is to be erected inmediately. The first year's income of the college was \$4,000; last year it was just three times this amount.

Careful investigation disproves the theory that the man known as McGinty, who committed suicide at Revelstoke not long ago, was John John John Son, of Encild avenue, Thronto, for whom the police have been searching during several weeks past, and who has disappeared mysteriously semewhere this side of Winnipee.

The young boy Mincono, who received serious injury to an eye at Kamloops a short time ago, has been removed to Vanceuver for treatment. The boy had improvised a guin from a section of a bicycle frame tubing, and who have the cause to had on the river loaded up this crude weapon to shoot at a feath with the desperation of a pleycle frame tubing, and own in a boat on the river loaded up this crude weapon to shoot at a feath who with streament and admitsting the responsable to see during my residence in the cause of comment and admitsting the responsable to the propose of gaining to the police have been searching the propose of gaining at the propose of gaining at the propose of gaining and by a mighty affort succeeded in the police have been searching the propose of gaining and by a mighty affort succeeded in the goldated to be proposed to the cause of comment and admitstic the gold the propose of the college to the recent imperfal press conference in the function. He does not be leave that time but the does not believe that the other time the comment of the drive on Mabel and when in a boat of the relation of a favoring the propose of gaining and by a mighty affort succeeded up this crude weapon to shoot at a feat with the gain and the propose of the college to the propose of the colleg

Rather Than incendiariem.

Investigation tends to show that the terrifile fire which consumed the Okanagan hotel at Vernon last Tuesday was occasioned accidentally, not deliherately, by a drunken man whom Constable Balley found on the sidewalk close to the hotel shortly after 11 o'clock, and kindly put into the hallway until he should "sleep off" his libations. Had he been sent to the station the fire would probably never have occurred. The man was a comparative stranger, and unidentified Heperished in the fire. There was one other unidentified body recovered last advice, while the ten known victims of the holacaust were: Wilbur Smith, carpenter; J. J. Funston, laborer; James Anderson, baker's assistant;

awarding contracts to the Fairfield yards on the Clyde for the building of a number of submarines, which will be officered by Australian naval men, and will be used for the protection of the Australian coast. We went to the Clyde and saw the first of these being built. New Zealand on the other hand, though the first colony to make an offer for the building of a Dreadnought, is strongly wedded to the proposition of relying for protection on the general improvement of the navy, and would much prefer increasing its contribution in money than by the supplying of battleships or the starting of an independent navy. Sir John Ward, our prime minister, is now attending the defence conference in London, and is a strong supporter of a policy of making a liberal contribution for the upkeep of the British navy.

Reduction in Cable Rates

Julius G. Fuerst, barteader; M. Chabtree, laborer; George Gannett, cement worker; George McKay, cement worker; George Seltgast, painter; Archibeld Hickling, laborer, the hero of the fire; and William Cook, prospector. The Okanagan hotel was one of the old landmarks of Vernon, built in 1892 by the late George Milligan, who subsequently made several additions to the original structure. It was purchased a year or so ago from Milligan by Albers & Sigalet, for \$26,000, and they too have added and improved, so that the loss of the hotel represented a money loss of hetween \$25,000 and \$30,000. There was insurance of \$12,000. Immediately upon being informed the fire by The Evening Post, Premier McBride despatched the appended telegram expressive of sympathy. Victoris, August 10.

To Price Ellison, M. P. P.
Have just learned of the terrible fire at Vernon, with sad loss of life. Kindly express to the mayor my deep sympathy, and that of my colleagues in the government.

RECHARD McBRIDE.

To Price Elison, M. P. P.
Have just learned of the terrible fire at Vernon, with sad loss of life. Kindly express to the mayor my deep sympathy, and that of my colleagues in the government.

RICHARD McBRIDE.

BROTHERHOOD OF ST. ANDREWS.

Many Delegates From Far and Near to Attend Convention at Vancouver.

At Jeast two hundred delegates are expected to attend the Pacific coast convention of the Brotherhood of St. Andrew's of the Church of England, which will be held in Vancouver from September 9th to 12th. All the western section coast states will address the various conferences. In preparation for this gathering the Canadian western sections coast states will be well represented. Prominent clerical and lay speakers will address the various conferences. In preparation for this gathering the Canadian western sections of St. Barnabas' church. The boys of the Churchs is St. Savisour's church, Vintoris, West. In the swenting he will address the congregation of St. Barnabas' church. The boys of the Cak Bay Mission Sunday school will be addressed by Mr. Birmingham in the afterance. During the week he will address meetings in the following local churches: St. Savisour's church, Vintoris & St. Savisour's church, Wintoris & St. Savisour's church, The boys of the Cak Bay Mission Sunday school will address meetings in the following local churches: St. Savisour's church, The boys of the Churches: St. Savisour's church, Monday evenings, boys 7 o'clock, and me at \$500 m. ANGLO-GERMAN SITUATION DISCUSSED

cheir inclination to reach out. Germany has forty or fifty millions at people, and she must had colonies for them. My own idea of what will happen is that she will find colonies for them on the Adriatic sea. Germany stands with France, Austria and Russia guarding her borders—atriple alliance. But Austria appears to be tottering. It is not unlikely that on the death of the present Emperor part of Austro-Hungary at least will be absorbed by the Germans, and before many years you may see Trieste and other ports on the Adriatic under the German flas. Germany must find new territory, and that is the most logical view of solving the problem that I can suggest.

"I can not see that there is danger

that I can suggest.

"I can not see that there is danger of war between Britain and Germany. One must recognize that England has been indulging in a good deal of spread-eagleism, building Dread-neughts and taking no pains to conceal her defiance, and if she gets some of the backwater it is not to be wondered at. The feeling in the old country is being assisted by a section of the press that is anti-German, just the same as there is an anti-British section of the press in Berlin—and I can tell you that in that capital some of the newspapers speak on this question very boldly.

Colonial Opinion

Colonial Opinion

"Much of the time of the press conference was spent in a discussion of the navy question. We listened to speeches from such recognized leaders as Premier Asquith, Mr. Balfour, Lord Roberts, Sir John French and Lord Charles Beresford. There was a strong feeling in the conference that the time had arrived when the chief colonies, Canada and Australia, would have to provide for a larger share of the upkeep of the navy for imperial defence. What form this should take, whether the colonies themselves should provide additional battleships, or should contribute money to the imperial defence council should be formed to sit in London as an advisory board, and upon that body overseas dominions should be given direct representation. On behalf of Canada, both in the conference and on several public platications and politics took a prominent part, the feeling was pronounced that Canada would inaugurate a naval policy that would be dictated from Ottawa.

Australia Building Submarines

"Australia Building Submarines

"Australian delegates expressed themselves much along the same lines, and that colony has already given effect to her determination by siven effect to her determination by siven

much as 25,000 words a nay across the Atlantic at five cents a word.

Permanent Organization

"Another tangible result of the conference was the formation of what is called the British Press union, a permanent organization, for which the first executive has been nominated under the presidency of Hon, Mr. Lawson of the London Telegraph. He is supported by such mem as Lord Northcliffe, Mr. Moberly Ball of the Times, Mr. Spender of the Gazette, Mr. Gardinet, Mr. Park, Mr. Phillips of the Yorkshire Post and Mr. C. A. Pearson. They have agreed to reassemble in three years. For Canada, Winnipeg is making a strong bid for the meeting, and South Africa is trying to arrange to have it held in the Transvaal. By the present arrangement about 500 words of press matter will be daily exchanged between Vancouver and Sydney." Permanent Organization

COLOR IN THE FLOWER

In her new book on this Tekyll says that 'to plant and man border, with a good scheme for means the easy thing that is supposed." This is true, and consists in the maintaining e in the planting. That, indeed that not very long ago there w e only one way of doing itup all the plants and replace th twice a year. And yet, when common practice, no one schemes of color at all. If the tude of flowers violently contr dener was satisfied. At that were grown for their flowers an The problem was to have the sn proportion of leafage to the la proportion of flowers. When a in flower it was held to be no weed, unless, indeed, it played part in some pattern of carp which case its flowers were p fore they came out.

This kind of gardening is innumerable cases which prov no limit to the perversions of once its original purpose is lost ing in the world is so ugly as verted art, and no kind of uglier than a garden in which pl only for their flowers. The good gardening is to grow plant of their beauty, beauty of hab as well as beauty of flower. done can there be either good form in the garden; for the co need the foil of leafage if their to be revealed, just as the for need the same foil. The wond wild flowers is the result, not of nature, which we cannot far of those intermixtures of flower those delicate contrasts of fo which often come by chance w gardener eager to cover every with simultaneous blossom knows this well, but she is not these contrasts to chance. Sh garden ought to be, so far as provement on Nature-not, ind est particular beauties of Natu would be impossible, but on he age; for Nature's beauties a lived, and she cares nothing whereas the gardener's problem garden both neat and beautif of the year as he can.

This problem, though still comes easier as soon as he is

reasonable proportion of flower soon as he comes to love plants beauty of their growth and their flowers. Miss Jekyll l plants, and she delights in com that the growth of one plant to the flowers of another. She the pursuit of such contrasts, full of them, both described the result of years of observament. She herself has a large writes mainly for those who p dens. But many of the effects tions are possible also in small small gardens, for instance, th to plant these ferns in drifts an to put drifts of early flowering Jekyll gives a plan of a bank s the bulbs arranged so that they in color and also provide a suc som for a good many weeks There are drifts of Corydalis bulbosa, dog-tooth violet, Sc sibirica, Anemone blanda, Chi cari, Scilla bifolia, white crocu Narcissi, minor, nanus, and all of which are easily grown, soils, while the bare spaces v when they die down will be ferns as they grow up in later case, of course, there is no at constant succession of flower abundance of blossom at a tin are often almost flowerless, w of leafage to follow until far i This is only one instance out skilful combinations which scribes. The others she mu speak of herself. Many of th to fill up nooks and corners others are meant for the mai plan with these is to have planted so as to be in their p times of the year. Thus she den, where tulips are not gr regiments, but, as they shoul with the leafage of other plan a space for the interval betw summer; then the June garden enumerates many delicate and trasts; then her main hardy which is planted to be at its p part of the summer; and th September alone. She also give dens of special coloring-ora blue and green. tivation and skilful arrangen

In all these cases, by mean to a splendour beyond the r tunate or assiduous gardeners who have not even the ambit all her plans may learn man from her book. Her system known and has often been main idea of it is the contri of color passing one into t strong contrasts, or with strong rarely introduced. Thus at
